Member

(Mrs. Jariya Visitpanich)

Date: 11 July 1990

ACKNOWLEDGMENTS

This humble piece of work would not have been possible without the many people who in various ways gave invaluable contributions to make this a reality.

I am particularly indebted to the members of my thesis committee especially Dr. Manas Titayavan, who acting as my supervisor and chairman of the committee, gave his all-out support and encouragement, and confidence in the outcome of my study, and freely of his time and advice; Dr. Vichian Hengsawad, for his invaluable comments and suggestions; Dr. Kanok Rerkasem, for his constructive criticisms and generosity in sharing me many research materials, and Mrs. Jariya Visitpanich, for her many helpful suggestions. Sincere thanks is also due to Dean Nakorn Nalampang of the Faculty of Agriculture; Acharn Phrek Gypmantasiri, Associate Director, Multiple Cropping Center; Dr. Methi Ekhasingh, chairman of the Agricultural Systems Program; and all the professors of the program, for without their caring and skill as teachers, my studies would not have been the enjoyable intellectual experience it was.

I would also like to mention that my conversations with several fellows from SUAN (Southeast Asian

Universities Agroecosystem Network) especially Dr. Percy J. Sajise, Dr. Terry Rambo, Dr. Le Thong Cuc, and Dr. Jeff Romm were very illuminating and beneficial.

I am also grateful to Dr. Sati Budharugsa, chairman of the Department of Entomology of Chiangmai University for my unlimited use of the laboratory facilities of the department throughout my laboratory work; Khun Supaluck, for her assistance in the laboratory; Dr. Sanit Ratanabhumma for taking the slides of my insect specimens; Dr. Tavatchai Radanachaless for giving me advice and assistance on weed identification; Kathy Delate and Bob Turnbull, for painstakingly carrying my insect specimens to other institutions for further identification; Khun Pradit, my student assistant, whose help speeded up my dissection studies, and Khun Jumlong, manager of the MCC Farm who extended enormous help in in many aspects of my fieldwork. Several others extended innumerable help especially Ellen, Don, Wittti, K.Prasong, P.Serie, Sirichai, Somsak and Chanchai. The generosity of Archarn Pattanun Woodtikarn in loaning me various books during my studies and the help of Khun Pong Vesurai in facilitating many paperworks are very much appreciated.

Grateful acknowledgment also goes to the FORD

Foundation for the financial support which made my studies in Thailand possible. The additional thesis support from SUAN (Southeast Asian Universities Agroecosystem Network) is also greatly appreciated.

Several fellow graduate students especially my colleagues in the international Agricultural Systems Program shared many ideas and suggestions on many occasions. I would therefore thank especially Ying Jifeng, Sanan Peukrai, Nguyen Ngoc De, and everyone of the first batch in the international Agricultural Systems program also for the camaraderie throughout my studies. The last batch students of the AGS Thai program also deserve special mention in that they were very helpful during my initial months to the program. Sharing stories and experiences with colleagues especially Ellen Pantollana, Don del Castillo, Pimolrat Thongrod, Anang Gunawan, Tony Abamo and Johan Iskandar provided fun in between work and studies.

Being so far away from family and friends, there were intermittent periods of loneliness. But these were immeasurably lightened by so many people without whom I would not have ably finished my studies. To them my abiding thanks: Dr. Jintana Sujjanun of the Faculty of

Education, Chiangmai University, for her cheerfulness and warmth; Pe Kiew for carrying my mails everyday; Khun Po Nived and Khun Mae Drawan Panayangkul and family, who did not only provide me a comfortable place to stay in Chiangmai but also a home away from home; Hiroko Seki and Jeraporn Pattanapong, for their invaluable help during my initial stay at Drawan Dorm; and the friendliness of fellow dorm mates. The warmth of the Filipino community in Chiangmai especially Manong Diego and Manang Clara Elauria and Thelma; Mrs. Vicki Naemanahaeminda and family; and several others is very much appreciated.

I was also fortunate that while in Chiangmai I became affiliated with THAIDHRRRA Foundation (Thailand Development of Human Resources in Rural Asia). My field exposures with them in the villages and hilltribe areas of Chiangmai and Chiangrai deepened my knowledge and understanding of the Thai rural society. To Rev. Phaiboon Chareonsap, the director, and Khun Samreung Buanuam, field sociologist, my sincere appreciation for the rare opportunity accorded me which also made my stay in Chiangmai sociologically rewarding.

The Chiangmai alumni of the Southeast Asia Rural-Social Leadership Institute (SEARSOLIN) of the College of

Agriculture at Xavier University in the Philippines especially Kong, Na, Khun Kamchad, and Vorapat were very helpful and hospitable throughout my stay.

Many people, colleagues and friends at the College of Agriculture, Xavier University in the Philippines were also instrumental in the success of this undertaking. Fr. Tony J. Ledesma, S.J. and Mrs. Thelma A. Zablan, Dean and retired Associate Dean of the College of Agriculture, the "Bagets" faculty (Lope T., Floro D., Vic T., Sir Sid Lico, Nennette I., Mayette R., Sylvia A., Danny P., Bong O., Alex J., Allan V., Jojo L., Clark C., Allan O., and Kiting F.) and the "Forgets" especially Engr. B. Noble, for their moral support.

I would like to single out my thanks to Dr. Frank Aclan, my supervisor and former chairman of the Department of Agronomy of the College of Agriculture at Xavier University, for his constant support and encouragement which kept me going especially during my trying years in teaching at Xavier University.

To Ngengen, Mila, Nancy, Jovi, Hansel, Lope, Floro, Danny, Tootsie, Alex, Allan, Jojo T., and Jojo L., for all the fun times.

To Chona, for the starry and starless nights, and

to Dodge, and all wonderful people who helped make my stay in Manresa all the more filled with pleasant memories.

To Bruce, for the little things which helped a lot.

My appreciation to Joe Buttaro and Liza Sandy for their friendship which is a valued gift and for their many kindnesses for which I shall always be grateful.

Last but not the least, I have almost taken for granted the abiding support, encouragement, inspiration, and prayers of my parents and other members of the family which gave me the strength to endure during all those difficult times.
