ACKNOWLEDGEMENT

This study would not have been completed without the contribution of many faculty members, staff and friends of Agricultural Systems Program, to all of whom I am sincerely indebted.

I express my deepest gratitude and respect to Dr. Songsak Sriboonchitta, chairman of my thesis committee, whose generous support, advises, recommendations and criticisms have guided me throughout my graduate program to the final completion of this research. I am specially grateful to him for introducing me to the area of quantitative techniques for applied research by imparting his expertise and insights in this field.

I am also sincerely indebted to Dr. Aree Wiboonpongse, my thesis committee member, in outlining the research problem and providing valuable comments, criticisms and suggestions at various stages of this research.

Comments and criticisms from the other members of my thesis committee, Mr. Phrek Gypmantasiri and Dr. Methi Ekasingh are gratefully acknowledged. I am also thankful to Dr. Manu Seetisarn, my academic adviser, for kind support and advises during my entire graduate program.

Special thanks are due to the Department of Agricultural Extension, through the subject matter specialist Khun Nirudh and Agricultural Extension Officers in each district who shared their precious time to help me during the survey.

I am specially thankful to the farmers whose patience and sincerity in answering the lengthy survey questionnaire made this study possible.

I am also grateful to Pee Tospol whose pivotal role in maintaining contacts with government officials and data collection supervision had eased much of my limitations in terms of language barriers and cultural ignorance.

The generous help extended by Tipathorn, Wararat and Khun Pisut have been substantial. I offer my heartfelt thanks to them. Congeniality, friendship and warm relation provided by friends and colleagues during this two-year of graduate study had been stimulating and cheerful, particularly, Naba, Bijaya, Gan, Yuan and Salma.

Special thanks are due to Ford Foundation (Bangladesh) for their generous scholarship support and Bangladesh Rural Advancement Committee (BRAC) for providing me with the study leave. Encouragement from Dr. AMR Chowdhury and Md. Golam Sattar of RED, BRAC have been stimulating.

Above all these, I am blessed with the love, patience and encouragement from my father, who is my source of inspiration and dedication. Also, my brothers, sisters and friends (Dipu and Babul Bhai) for their understanding and encouragement throughout my stay in Thailand.

Sanzidur Rahman
