SEPTEMBER 1994

## ACKNOWLEDGEMENT

I am pleased to take this opportunity to thank all too briefly, particularly to those individuals and institutions whose contribution have made the completion of this work possible.

I wish to extend my profound gratitude to Dr. Songsak Sriboonchitta, the Chairman of my thesis advisory committee for his intellectual stimulation, invaluable guidance and whole hearted support for the timely completion of this thesis research. Similarly, I also express my sincere gratitude to Dr. Aree Wiboonpongse, the member of my thesis advisory committee for her critical comments, genuine help and invaluable guidance in shaping the research framework and improving the content of the manuscript. Equally, special appreciation goes to other members of the committee: Dr. Methi Ekasingh and Dr. Benchaphun Shinawatra for their constructive comments and invaluable suggestions.

I am also equally grateful to my academic advisor Dr. Manu Seetisarn for his guidance and advises throughout the graduate study. All the faculty members of Agricultural Systems Program also deserve special appreciation for their inspiring and thoughtful teaching.

I am very much thankful to Winrock International Institute for Agricultural Development for the fellowship and thesis research grant for my graduate study at Chiangmai University. Special thanks are due to Ms. Rose L. Bautista and Ms. Victoria Sesbastian at Asian Regional office, Manila for the administrative supports and Dr. Gerry Gill and Dr. Ganesh Thapa, Winrock, Nepal for facilitating my graduate study and also for the supplemental funding of my field research in Nepal. I am also thankful to National Maize Research Program, Rampur and Nepal Agricultural Research Council (NARC), for granting me the study leave for the whole graduate study period.

My field research in Nepal was greatly facilitated by the constant company and active cooperation of Mr. Govinda Sharma, Hasera Agricultural farm Patlekhet, and Iswor Rijal, Asst. Industrial Entomologist, Khopasi Sericulture Research station, Kavre for whom I am very much grateful. Despite the busy schedules of farm works during my field survey, all the farmers of the study areas responded me with warm hospitality. They deserve my special thanks for their patience, understanding and timely responses in making my field survey possible. I also thank to Mr. P.B. Shah, team leader, Mountain Resource Management Project, ICIMOD for his kind help in providing some data and information support for one of my research site at Jikhikhola Watershed, Kavre.

I wish to acknowledge the friendly company of my senior AGS 1991 friends Naba Raj Devkota and Bijaya Bajracharya for a year in Chiangmai and also as the resource persons for the PRA during my field survey in Nepal. I am also pleased to express my thanks for the friendly company and warmth cooperation extended by my classmate AGS 1992, Khun Tospol, Daeng, Lung, Pisut, Pilai, Tawilkarn, Kinh, Hao and also all the Nepalese friends in Chiangmai: J. Pant, Milan, Chhabi, Rojee, S. Thapa, R. Thapa and Bhim Adhikari.

Above all, the source of inspiration and moral support for this whole graduate study comes from my family members in Nepal, especially my beloved wife Suja and my newly borne son, for their understanding, patience and sacrifices.

Devendra Gauchan
