ACKNOWLEDGEMENT	i
ABSTRACT	iii
TABBLE OF CONTENTS	viii
LIST OF TABLES	xi
LIST OF FIGURES	xiii
CHAPTER I : INTRODUCTION	1
1.1 Statements of the problem	1
1.2 Rationale of the Study	3
1.2.1 Fruit tree Integration as an Alternative Strategy	3
1.2.2 Prospects for Citrus Integration	4
1.2.3 Need of Optimum Farm planning	6
1.3 Objectives	7
1.4 Usefulness of the Study	8
1.5 Literature Review	9
CHAPTER II: METHODOLOGY	14
2.1 Scope of the Study	14
2.2 Data Collection	15
2.2.1 Informal Survey	15
2.2.2 Formal Survey	15
2.3 Methods of Data Analysis	17
2.3.1 Descriptive Statistics	17
2.3.2 Classification of Sampled Farm households	17
2.4 Model Formulation	18
2.4.1 Objective Function	22
2.4.2 Decision Variables	22
2.4.3 Resource Constraints	26
2.4.4 Programming Softwares for Data Analysis	28

CHAPTER III: RESOURCE BASE AND FARMING SYSTEMS	29
3.1 Resource Base	29
3.1.1 General Charecterisitics	29
3.1.2 Natural Resource Base	32
3.1.3 Human Resource Base	35
3.2 Existing Farming Systems of the Study Areas	41
3.2.1 Annual Crop Based Systems	41
3.2.2 Citrus Based Sytems	43
3.2.3 Income and Employment Generation	51
3.3 Summary	53
CHAPTER IV: OPTIMUM FARM PLANS AND PRODUCTION	55
4.1 Assumption of the Model	57
4.2 Data and Coefficient Used	60
4.3 Basic Optimum Plan	
4.3.1 Existing an Optimum plan for the Crop based Systems	64
4.3.2 Existing and Optimum plan for the Citrus based Systems	66
4.3.3 Comparison between two Systems: With and Without Orange	69
4.3.4 Integration of Citrus into Existing Systems	71
4.3.5 Comparison between existing and simulated system with orange	74
4.4 Summary	75
CHAPTER V: POLICY ANALYSIS	76
5.1 Scenario I: Changes in Price	77
5.1.1 Changes in Price of Orange	77
5.1.2 Sensitivity to price and yield decline	79
5.2 Scenario II: Changes in Demand for Off-farm Labor	82
5.3 Scenario V: Capital Borrowing	85
5.4 Scenario III:Changes in Off-farm Wage Rates	86
5.5 Scenario IV: Changes on Discount Rate	88
5.6 Scenario VI:Fully Upland Situation	89

5.7 Scenario VII: Effect of Improved Technology and Marketing	91
5.8 Scenario VII: Intercropping of Food Crops with Orange	94
5.9 Summary	95
CHAPTER VI: CONSTRAINTS AND BENEFITS TO CITRUS INTEGRATION	97
6.1 Constraints	97
6.2 Discussion for Major Constraints	101
6.2.1 Land Constraints	101
6.2.2 Capital Constraints	102
6.2.3 Labor Constraints	103
6.2.4 Marketing Constraints	103
6.2.5 Technological Constraints	104
6.2.6 Socio-cultural Constraints	105
6.3 Summary	106
6.4 Assessment of Benefit of Citrus Integration	107
6.4.1 Economic Benefits	107
6.4.2 Soil Conservation Benefits	108
CHAPTER VII : CONCLUSION AND POLICY IMPLICATIONS	110
7.1 Summary and Conclusion	110
7.2 Policy Implications	116
7.3 Limitation and Further Research Areas	119
BIBLIOGRAPHY	121
APPENDICES	125
CURRICULUM VITAE	132

LIST OF TABLES

	Page
Table 1 Comparative costs and returns of selected fruit trees and cereal crop production in the hills of Nepal	4
Table 2 Analysis of comparative advantage and fruit tree production	5
Table 3 Classification of sampled farms into different farm sizes	17
Table 4 Land resource endowments in the study sites	33
Table 5 Average number of fruit trees in various farm groups	33
Table 6 Demographic features of sampled households, Patlekhet site	37
Table 7 Demographic features of sampled households, Sankhu site	38
Table 8 Average labor availability per household by farm type	39
Table 9 Capital (cash) used per hectare by farm group	40
Table 10 Economics of crop production, Patlekhet site	43
Table 11 Relationship between farm enterprise and farm resources	46
Table 12 Comparative economics of orange and traditional crops	48
Table 13 Farm and Off-farm income and their % share in total income	52
Table 14 A simplified structure of multiperiod linear programming Model (MLP)	62
Table 15 Farming systems in existing and optimal plan in Patlekhet	64
Table 16 Net present value of income and shadow prices of limited resources in the optimum plan in Patlekhet	66
Table 17 Farming systems in existing and optimal plan in Sankhu.	67
Table 18 NPVI and shadow prices of limited farm resources in the optimal plan in Sankhu.	68
Table 19 Comparative analysis of NPVI: Systems with and without orange in Sankhu.	70
Table 20 Farming systems in existing and optimal plan (simulated) Patlekhet	73
Table 21 Net Present Value of Income (NPVI) and shadow prices of limited farm resources in the optimum plan in Patlekhet	73

Table 22	Potential contribution of citrus integration (simulated) into existing systems in Patlekhet	74
Table 23	Effect of change of orange price on NPVI by farm size	78
Table 24	Effect of change of orange price on optimal plan	79
Table 25	Effect of price decline on NPVI in Sankhu	79
Table 26	Effect of price decline on optimal plan in Sankhu	80
Table 27	Effect of yield decline on NPVI in Sankhu	81
Table 28	Effect of yield decline on optimal plan in Sankhu	82
Table 29	Effect on NPVI due to change in the demand for off-farm work in Sankhu	83
Table 30	Effect on optimal plan due to change in demand for off-farm Sankhu	84
Table 31	Effect of off-farm labor wage rates on NPVI for different farms in Sankhu	87
Table 32	Effect of off-farm labor wage rates on optimal plan	87
Table 33	Effect of changes of discount rate on NPVI in different farm types in Sankhu	88
Table 34	Effect of changes on discount rate on optimal crop plan	89
Table 35	NPVI and optimal crop plan in upland situation in farm group I in Sankhu	90
Table 36	Effect of improved technology and management practices of citrus on NPVI and optimal plan for farm group I	90
Table 37	Impact of improved marketing practice of citrus on family income (NPVI) and optimal plan for farm group I in Sankhu	93
Table 38	Change in optimal plan and income (NPVI) by intercropping crop with orange trees for group I in Sankhu	94
Table 39	Farmers' response of constraints that impede citrus integration into existing farm systems	98
Table 40	Scoring of major constraints to citrus integration	99
Table 41	Views of farm households about orange and its profitability	107
Table 42	Farmers' perception of citrus in soil conservation	108

LIST OF FIGURES	Page
Figure 1 Frame work for Multiperiod Linear Programming Model	21
Figure 2 Agroecological regions of Nepal	30
Figure 3 Net benifit from orange over its economic life	49
Figure 4 Constraints to citrus integration	100

APPENDIX FIGURE

Appendix Figure 1 Climatic data of Baluwa, Jikhikhola watershed, Kavre, District.	131
---	-----

APPENDIX TABLES

Appendix Table 1 Consumer units and man equivalent index	125
Appendix Table 2 Estimation of consumption expenditure function	125
Appendix Table 3 Minimum consumption requirement per household	126
Appendix Table 4 Land and labor use over the planning horizon in Sankhu	127
Appendix Table 5 Land and labor use over the planning horizon in Patlekhhet	128
Appendix Table 6 Gross margin and labor use in orange per tree	129
Appendix Table 7 Matrix Ranking for citrus fruits against other production systems	130
