ACKNOWLEDGEMENT

The author would like to express his profound gratitude to his supervisor, Dr. Kanok Rerkasem, for his invaluable suggestions and comments during the field experiment and the process of this manuscript.

Deepest appreciation are also due to his committee members, Assoc. Prof. Thanom Klodpeng, Assist. Prof. Songchao Insomphun, and Assist. Prof. Suthat Julsrigival for their valuable advice and comments.

It is also a pleasure to acknowledge Dr. Reynaldo L. Villareal, Head of CIMMYT Wheat Improvement Training and Mrs. Villareal, for taking the time reading this manuscript during their visit to Thailand. Their comments and suggestions are most gratefully acknowledged.

The author wish to thank Mr. Jamlong Pothacharoen and Mr. Sithichai Lodkaew, for their help in the field experiment and laboratory work, and to the technical staff of Multiple Cropping Center for their helpful co-operation during the study.

Thanks are also extended to his classmates during the study at Chiang Mai University, his colleagues at Samoeng Upland Rice and Temperate Cereals Experiment Station, and at the Office of Agricultural Research and Development Region 1. Their assistance and encouragement are very much appreciated.

This research can not be conducted without financial support. Thus, his special gratitude are also given to his donor, the Ford Foundation.

Finally, his special thanks go to his parents, Mr. Khamtan and Mrs. Noo Manakul and to his wife, Pannee and his son, Kittitat, for their encouragement during his study.
