ACKNOWLEDGMENTS	iii
ABSTRACT	v
THAI ABSTRACT	x
TABLE OF CONTENTS	xiv
LIST OF FIGURES	xvii
LIST OF TABLES	xx
CHAPTER 1 INTRODUCTION	1
1.1 General background	1
1.2 Statement of problems	4
1.3 Rational of the study	8
1.4 Objectives of the study	10
1.5 Usefulness of the study	11
CHAPTER 2 LITERATURE REVIEW	13
2.1 Characterization of natural resources	13
2.1.1 Climatic resources	13
2.1.2 Edaphic resources	17
2.1.3 Upland rice cultural practices	19
2.2 Factors affecting upland rice environment and thesis	

	Page
Priorities	22
2.3 Rice/pigeon pea intercropping systems for upland rice- based cropping systems in northern Laos	23
CHAPTER 3 RESEARCH METHODOLOGY	27
3.1 Household survey	27
3.1.1 Site selection	27
3.1.2 Data collection	27
3.1.3 Data analysis	28
3.2 Field experiment	28
3.2.1 Experimental site	28
3.2.2 Experimental design	29
3.2.3 Crop management	30
3.2.4 Data collection	31
3.2.5 Data analysis	31
3.2.6 Economic analysis	32
CHAPTER 4 RESULTS AND DISCUSSION	33
4.1 Upland rice-based cropping systems in Luang Prabang province	33
4.1.1 Upland rice environment	33
4.1.2 Socio-economic resources	38

	Page
4.1.3 Animal production	39
4.1.4 Upland rice production practices	44
4.2 Agronomic performance of rice/pigeon pea intercropping	46
4.2.1 Effects of intercropping on the growth of rice and pigeon pea	46
4.2.2 Effects of intercropping on biomass production and yield of rice and pigeon pea	51
4.2.3 Productivity of rice/pigeon pea intercropping	52
4.3 Potentials and constraints of introducing upland rice/pigeon pea intercropping systems based on household survey and field experiment	55
CHAPTER 5 CONCLUSIONS AND RECOMMENDATIONS	58
REFERENCES	64
APPENDICES	69
CURRICULUM VITAE	83

LIST OF FIGURES

Figure	Page
1.1 The general concept of the ongoing research activity	3
1.2 Importance of rainfed upland rice among agricultural regions of the Lao PDR	5
1.3 Rice production in Luang Prabang province	5
1.4 Relationship between weeding requirement and fallow periods	7
1.5 Population growth and rice production trend of the Luang Prabang province for 1976-1998	7
1.6 Production of some common upland crops for the last 20 years (1976-97)	12
1.7 Trend in rice yield for different rice environments over the last 20 Years	12
2.1 Rainfall pattern for the Luang Prabang province	15
2.2 Trend in Amount of Rainfall for Luang Prabang Province over the last 20 Years (1976-1997).	15
2.3 Maximum and minimum temperature in Luang Prabang province for the last 20 years (1975-1997)	18
2.4 Radiation intensity ($\text{MJ m}^{-2} \text{d}^{-1}$) for Luang Prabang province	18
2.5 Effect of rice/pigeon pea intercropping on rice yields	26
4.1 Rice production in Xieng Ngeune district, Luang Prabang province	35
4.2 Annual rainfall for Xieng Ngeun district and Luang	

	Page
Prabang province during 1988-1994	35
4.3 Population distribution by age in Xieng Ngeun district	40
4.4 Rice consumption in Xieng Ngeun district for 1997 and 1998	41
4.5 The main reasons for rice deficiency	41
4.6 Income distribution of upland households in Xieng Ngeun district	42
4.7 Source of cash income of upland households in Xieng Ngeun district	42
4.8 Common animals raised by farmers in Xieng Ngeun district	43
4.9 Reason for not raising more animals cited by upland farmers	43
4.10 Upland crops often grown together with upland rice	45
4.11 Biomass accumulation of rice under treatments tested	50
4.12 Biomass accumulation of pigeon pea under treatments tested	50
Appendix	
1. Layout of the field experiment	70
2. Treatment 1 (Sole rice)	71
3. Treatment 2 (Sole pigeon pea)	72
5. Treatment 3 (Rice:Pigeon pea, 50:50%, strip cropping)	73
5. Treatment 4 (Rice:Pigeon pea, 75:25%, strip cropping)	74
6. Treatment 5 (Rice:Pigeon pea, 25:75%, strip cropping)	75
7. Treatment 6 (Rice:Pigeon pea, 50:50%, row intercropping)	76
8. Treatment 7 (Rice:Pigeon pea, 75:25%, row intercropping)	77

9. Treatment 8 (Rice:Pigeon pea, 25:75%, row intercropping)

LIST OF TABLES

Table	Page
2.1 Soil characteristics of Luang Prabang province	19
2.2 Factors affecting upland rice environment and thesis priority	23
2.3 Effects of pigeon pea on rice yields	26
3.1 Selected soil chemical properties of Mea Hia Research Station	29
3.2 Description of treatment tested	30
4.1 Land use and forest types of Xieng Ngeun district	36
4.2 Land distribution by slope classes of Xieng Ngeun district	37
4.3 Selected soil chemical properties of Xieng Ngeun district	37
4.4 Rice sample variability	48
4.5 Pigeon pea sample variability	49
4.6 Analysis of Variance results	53
4.7 Land Equivalent Ratio of rice/pigeon pea intercropping	54
Appendix	
1. General rice production statistics for the Lao PDR – 1997	79
2. Targeted decrease in upland rice planted area and production in Lao PDR and Luang Prabang province	80
3. Policy targets for changes in rice planted areas in the Lao PDR and Luang Prabang province.	80
4. ANOVA of rice straw at harvest	81

	Page
5. ANOVA of rice yield	81
6. ANOVA of pigeon pea yield at harvest	82
