Acknowledgements	iii
Abstract in English	iv
Abstract in Thai	vii
Table of Contents	x
List of Tables	xiv
List of figures	xvii
CHAPTER 1: INTRODUCTION	1
CHAPTER 2: LITERATURE REVIEW	3
2.1. Green manures	3
2.2. Green manure and rice's soil productivity	3
2.3. <i>Sesbania rostrata</i> as potential green manure species in lowland rice	5
2.4. Nitrogen forms and availability fluctuation within the soil	7
2.5. Nitrogen cycle in paddy soil ecosystem	9
2.6. Dynamics of ammonium nitrogen (NH ₄ ⁺ -N) in the lowland paddy field following incorporation of <i>Sesbania rostrata</i>	11
CHAPTER 3: MATERIALS AND METHODS	12
3.1. Farmer field survey	12
3.2. On-farm research	12
3.3. On-station study	13
Part I: Agronomic effect	
3.3.1. Experiment design	13
3.3.2. Cultural practices	14
3.3.3. Data collection	14
Part II: Nitrogen-dynamics	16
3.3.4 Nitrogen-dynamics experiment treatments	16
3.4. Laboratory experiment	17
3.4.1. Nitrogen mineralization experiment	17

CHAPTER 4: STUDY AREA AND FARMER PRODUCTION	18
SYSTEM OF <i>SESBANIA ROSTRATA</i>-RICE	
4.1. Description of study Area	18
4.2. Cropping System	19
4.3. On-farm research in rainy season rice in 1999	20
4.4. Follow-up field survey on farmers' fertilizer management practices following the introduction <i>S. rostrata</i> (2000)	21
4.4.1. Fertilizer management by farmers in the study area	21
4.4.2. Chemical fertilizer-based management practice	22
4.4.3. <i>S. rostrata</i> -based management practice	23
4.5. Cost of using of <i>S. rostrata</i> as green manure in lowland rice	23
4.6. Cost and return of lowland rice production system	24
4.7. Return of rainy season rice production system of fertilizer application and incorporating of <i>S. rostrata</i> as green manure	26
4.8. Discussion	27
CHAPTER 5: RESULT OF ON STATION EXPERIMENT	32
5.1. Climatic and edaphic conditions	32
5.2. <i>Sesbania rostrata</i>	33
5.3. Effect of nutrient management on plant height and yield characteristics of selected of varieties of glutinous and non-glutinous rice	34
5.3.1. Total straw yield	35
5.3.2. Total biomass yield	36
5.3.3. Percent filled grain	36
5.3.4. Harvest index	36
5.3.5. Plant height	37
5.3.6. Panicles per square meter	37
5.3.7. Tillers per square meter	38
5.3.8. The 1000 grain weight	39
5.4. Effect of nutrient management on plant height and yield characteristic of selected quality rice varieties	40
5.4.1. Total straw yield	41
5.4.2. Total grain yield	41

5.4.3. Total biomass yield	42
5.4.4. Total filled grain yield	42
5.4.5. Plant height	43
5.4.6. Panicles per square meter	43
5.4.7. Percent productive tillers	43
5.5. Effect of nutrient management on plant height and yield characteristics of modern HYV rice varieties	44
5.5.1. Total straw yield	45
5.5.2. Total grain yield	46
5.5.3. Total biomass yield	46
5.5.4. Total filled grain yield	47
5.5.5. Percent filled grain	47
5.5.6. Harvest index	47
5.5.7. Plant height	48
5.5.8. Panicles per square meter	48
5.5.9. Tillers per square meter	49
5.5.10. Percent productive tiller	49
5.5.11. The 1000 grain weight	49
5.5.12. Discussion	51
CHAPTER 6: NITROGEN DYNAMICS EXPERIMENT RESULT	60
6.1. Shoot dry weight of Chinat rice variety	60
6.2. N content and N uptake of Chinat rice variety	61
6.3. Grain yield of Chinat rice variety	63
6.4. Nitrogen dynamics in lowland rice system as affect by nutrient management practices	64
6.4.1. Panicle initiation stage	64
6.4.2. Flowering stage	65
6.4.3. 15 days after flowering stage	67
6.4.4. Harvesting stage	67
6.5. Nitrogen mineralization of <i>S. rostrata</i>	71
6.6. Discussion	71

CHAPTER 7: CONCLUSION AND RECOMMENDATION	74
REFERENCES	77
APPENDICES	84

LIST OF TABLES

Table	Page
1. Timetables for soils and rice plants samplings	16
2. Four sampling soils and it property	17
3. Average amount of chemical fertilizer application by farmers	22
4. Average yield of rice under each management practice	23
5. Cost of the using of <i>S. rostrata</i> as green manure in lowland rice	24
6. Variable cost of lowland rice production system receiving chemical fertilizer application	25
7. Variable cost of lowland rice production system receiving <i>S. rostrata</i> as green manure	26
8. Return of rainy season rice production system of fertilizer application and incorporating of <i>S. rostrata</i> as green manure	27
9. Pre-rice <i>Sesbania rostrata</i>	34
10. Analysis of variance of yield characteristics of selected varieties of glutinous and non-glutinous rice	35
11. Analysis of variance of yield characteristics of selected varieties of glutinous and non-glutinous rice	35
12. Plant height and yield characteristics of selected varieties of glutinous and non glutinous rice as affected by nutrient managements	38
13. Plant height and yield characteristics of selected varieties of glutinous and non glutinous rice as affected by varieties	39
14. Plant height (cm.) of glutinous and non-glutinous rice as affected by interaction between nutrient managements and varieties	39
15. Percent productive tiller of glutinous and non-glutinous rice as affected by interaction between nutrient managements and varieties	40
16. Analysis of variance of yield characteristics of selected quality rice varieties	41
17. Analysis of variance of plant height yield characteristics of selected quality rice varieties	41

18. Plant height and yield characteristic of selected quality rice varieties as affected by nutrient managements	44
19. Plant height and yield characteristic of selected quality rice as affected by nutrient managements	44
20. Analysis of variance of yield characteristics of modern HYV rice	45
21. Analysis of variance of plant height yield characteristics of modern HYV rice	45
22. Plant height and yield characteristics of modern HYV rice as affected by nutrient management	50
23. Plant height and yield characteristics of modern HYV rice as affected by varieties	50
24. Total straw yield ($t^{ha^{-1}}$) of modern HYV rice as affected by interaction between nutrient management and varieties	51
25. Total biomass yield ($t^{ha^{-1}}$) of modern HYV rice as affected by interaction between nutrient management and varieties	51
26. Harvest index of modern HYV rice as affected by interaction between nutrient management and varieties	51
27. Total grain ($t^{ha^{-1}}$) yield of the selected of glutinous rice and non-glutinous rice varieties as affected by nutrient management and varieties	54
28. Total filled grain yield ($t^{ha^{-1}}$) of the selected of glutinous rice and non-glutinous rice varieties as affected by nutrient management and varieties	54
29. Total grain yield ($t^{ha^{-1}}$) of selected of quality rice varieties as affected by nutrient management and varieties	56
30. Total filled grain yield ($t^{ha^{-1}}$) of selected of quality rice varieties as affected by nutrient management and varieties	56
31. Total grain yield ($t^{ha^{-1}}$) of modern HYV rice varieties as affected by nutrient management and varieties	58
32. Total filled grain yield ($t^{ha^{-1}}$) of modern HYV rice varieties as affected by nutrient management and varieties	58
33. Analysis of variance of shoot dry weight of Chinat rice variety in different growth stages and weight of panicle, straw an stubble at harvest	60

34. Effect of nutrient management on shoot dry weight of Chinat rice variety in different growth stages (g/m^2)	61
35. Analysis of variance of % N content of Chinat rice variety in different growth stage	62
36. %N of Chinat rice variety in different growth stage	62
37. Analysis of variance of N uptake of Chinat rice variety in different growth stage	63
38. Effect of nutrient management on N uptake of Chinat rice variety in different growth stage (gN/m^2)	63
39. Effect of nutrient management on yield characteristics of Chinat rice variety	64
40. Total inorganic N in each growth stage of Chinat rice variety in different nutrient management system	69
41. Apparent and actual N uptake by Chinat rice variety at different stage of growth	69
42. Nitrogen dynamics in lowland rice (Chinat variety), which received different nutrient management system in each growth stage of rice	70
43. Percentage of N released from <i>S. rostrata</i> in different soils	71

LIST OF FIGURES

Figure	Page
1. Schematic representation of nitrogen cycle in paddy soil ecosystem	10
2. Diagram showing procedures for study nitrogen dynamics in the field	16
3. Cropping pattern in the study area	20
4. Maximum and minimum temperature (°C) Jan-Dec 1999	32
5. Solar radiation (MJ/m ²) and rainfall (mm) during Jan to Dec 1999 at the Irrigated Research Station of Multiple Cropping Center	33
6. Nitrogen dynamics at panicle initiation stage	65
7. Nitrogen dynamics at flowering stage	66
8. Nitrogen dynamics at 15 days after flowering stage	67
9. Nitrogen dynamics at harvest stage	68
