<b>Table of Contents</b>	viii
<b>List of Tables</b>	xii
<b>List of Figures</b>	xiii
<b>Abbreviations</b>	xvi
<b>Chapter 1 Introduction</b>	1
<b>Chapter 2 Literature Review</b>	5
<b>Chapter 3 Materials and Methods</b>	17
<b>3.1 Study area and period</b>	17
<b>3.2 Experimental design</b>	18
3.2.1 Greenhouse experiment	18
3.2.2 Field experiment	21

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
<b>3.3 Materials preparation</b>	25
3.3.1 Plant materials	25
3.3.1.1 <i>Greenhouse corm preparation</i>	25
3.3.1.2 <i>Field banana suckers preparation</i>	26
3.3.2 Cytokinin preparation	27
3.3.3 Greenhouse planting bed setup	28
<b>3.4 Data collection</b>	30
<b>3.5 Data Analysis</b>	30
3.5.1 Temperature Analysis	30
3.5.2 Statistical Analysis	32
<b>Chapter 4 Results and Discussion</b>	33
<b>4.1 Greenhouse study</b>	33
4.1.1 Number of plantlets	33
4.1.2 Time to plantlet emergence	38
4.1.2.1 <i>Cumulative days to plantlet emergence</i>	38

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
4.1.2.2 <i>Growing degree days to plantlet emergence</i>	41
4.1.3 Mean final circumference of plantlets	45
4.1.4 Other factors	48
4.1.4.1 <i>Temperature in greenhouse bed</i>	48
4.1.4.2 <i>Pests and diseases</i>	51
4.1.5 Greenhouse discussion	52
<b>4.2 Field study</b>	<b>58</b>
4.2.1 Number of emerged plantlets	59
4.2.2 Time to plantlet emergence	59
4.2.2.1 <i>Cumulative days to emergence</i>	59
4.2.2.2 <i>Growing degree days to emergence</i>	63
4.2.3 Mean final circumference of plantlets	65
4.2.4 Other factors	67
4.2.4.1 <i>Temperature</i>	67
4.2.4.2 <i>Pests, diseases and flood</i>	69

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
4.2.5 Field discussion	70
<b>Chapter 5 Conclusion</b>	74
<b>Chapter 6 References</b>	76
<b>Curriculum Vitae</b>	83

**LIST OF TABLES**

<b>Table</b>	<b>Page</b>
1 Greenhouse and Field Experiment Treatments across Sites	24
2 Number of emerged plantlets as a function of the interaction of treatment and run	36

## LIST OF FIGURES

<b>Figures</b>		<b>Page</b>
1	Banana morphology	5
2	Early sucker development produces two morphologically different types of suckers: (a) sword suckers and (b) water suckers	7
3	Molecular structure of 6-benzylaminopurine	13
4	Map of Thailand	17
5	Average Temperature and Rainfall for (a) Chiang Mai and (b) Mae Ai over a 30 year period	19
6	Treatment of greenhouse corms	22
7	Treatment of field bananas	23
8	Preparation of cytokinins included (a) 6-Benzylaminopurine and (b) mature, green coconuts	28
9	Greenhouse planting beds	29
10	Average number of plantlets as a function of repeat, in the lowlands (a) and uplands (b)	35
11	Average number of plantlets for lowlands and uplands in the rainy season (a) and dry season (b)	37

**LIST OF FIGURES (Continued)**

<b>Figures</b>	<b>Page</b>
12 Average cumulative days to plantlet emergence as a function of repeat, for lowlands site (a) and uplands site (b)	39
13 Average cumulative days to emergence for lowlands and uplands in the rainy season (a) and dry season (b)	40
14 Average cumulative days to emergence as a function of repeat, across sites and treatments	41
15 GDD to emergence as a function of repeat, for lowlands site (a) and uplands site (b)	42
16 GDD to emergence as a function of site (a) and repeat (b)	43
17 Average GDD to emergence for lowlands and uplands in the rainy season (a) and dry season (b)	44
18 Circumference as a function of repeat, for lowlands site (a) and uplands site (b)	46
19 Mean final circumference of plantlets for lowlands and uplands in rainy season (a) and dry season (b)	47
20 Circumference as a function of treatment	48
21 Temperature measurements for lowlands (a) and uplands (b) greenhouse planting beds and lowlands (c) and uplands (d) ambient temperatures	50

**LIST OF FIGURES (Continued)**

<b>Figures</b>	<b>Page</b>
22 Pest and disease problems in the greenhouse experiment	51
23 Ratio of emerged plantlets as a function of site (a) and treatment (b)	60
24 Average number of plantlets across sites and treatments	61
25 Mean cumulative days to emergence as a function of site (a) and treatment (b)	62
26 Average cumulative days to emergence between sites and treatments	63
27 Mean GDD to emergence as a function of site (a) and treatment (b)	64
28 Average GDD to emergence between sites and treatments	65
29 Mean circumference of plantlets as a function of site (a) and treatment (b)	66
30 Mean final circumference between site and treatment	67
31 Temperature measurements for lowlands (a) and uplands (b) field study	68
32 Pest problems in field study	69
