ACKNOWLEDGEMENTS

I would like to express my sincere gratitude for the help, support and co-operation of all teachers and staff of Agricultural Systems Program of Chiang Mai University for assisting in the process and completion of this study. My profound gratitude and respect to Dr. Benchaphun Ekasingh, my academic and thesis advisor, whose generous support, advice, and recommendation have guided me throughout my graduate program and to finally in the completion of this research. I am also sincerely indebted to Ajarn Phrek Gypmantasiri, Dr. Jirawan Kitchaicharoen, and committee members for their help, valuable comments, and encouragement.

I also extend my deepest thanks to the Department of Technical and Economic Cooperation (DTEC), Thailand for granting me scholarship to study in MCC; all my teachers and colleagues of Forestry Faculty of Hue University of Agriculture and Forestry for their encouragement provided during the entire academic duration in Chiang Mai. Especially, I extend my heartfelt thanks to the Rector and Vice-rectors of Hue University of Agriculture and Forestry as well as to the Department of Foreign Affairs for its promotion, and support extended in providing me this opportunity to attend the graduate program in Agricultural Systems. Many thanks to the farmers and authorities of Huong Phu, Huong Loc, and Thuong Quang commune as well as to the authorities of Nam Dong district for their support rendered in the gathering of data for this study. I am very much delighted to pay thanks for the warm and cordial friendship provided by all AGS students, especially, all my classmates for their helpful assistance and congeniality. My hearty thanks and appreciation go to all oversea Vietnamese for their genuine help during my two years in Chiang Mai.

Finally, a sincere, heartfelt thank to my parents and my wife, my older sisters and brothers, younger brothers and sisters who have been supporting and encouraging me to complete this study.

Ngo Tung Duc
