Abstract (Thai)	v
Abstract (English)	viii
Table of contents	xi
List of tables	xv
List of figures	xvii
List of appendices	xviii
Abbreviations	xix
CHAPTER I Introduction	1
1.1 Background	1
1.2 Rationale of study	4
1.3 Literature review	5
1.4 Objectives of study	8
1.5 Usefulness of study	9
CHAPTER II Research methods	10
2.1 Site selection	10
2.2 Sampling technique.....	11
2.3 Data collection	12
2.3.1 Secondary data	12
2.3.2 Primary data	12
2.4 Data analysis	13
CHAPTER III Characteristics of the study area	21
3.1 Biophysical environment	21
3.1.1 Climate.....	22
3.1.2 Soil	24
3.1.3 Distance to Vietnam border	25

3.2 The agricultural sector	26
3.2.1 Major crops	26
3.2.2 Area under different fruit trees	26
3.2.3 Animal raising	27
3.3 The maize subsector	28
3.3.1 Land use for maize	28
3.3.2 Popular maize varieties	29
3.3.3 Maize-based cropping patten	29
3.3.4 Farmers' field practices in maize production	31
3.3.5 Socio-economic characteristics	33
3.3.6 Farm size	34
3.3.7 Cultivated maize area and land tenure of maize	35
3.3.8 Characteristic of the farm household	36
3.3.9 Family income	39
3.4 Institutional development	40
3.4.1 Access to technical advice	40
3.4.2 Access to output market	41
3.4.3 Access to input market	41
3.4.4 Access to credit	42
3.4.5 Access to irrigation	42
CHAPTER IV Problems and potential of maize production	44
4.1 Household maize objective	44
4.2 Farmers' use of maize	44
4.3 Problems of maize production	46
4.3.1 Rainfall and flood	46
4.3.2 Irrigation	46
4.3.3 Seed	47
4.3.4 Production problem	47
4.3.5 Institutional constraints	48
4.4 Potential of maize production	49
4.4.1 Geography and soil fertility	49

4.4.2 Market of maize	50
4.4.3 Credit	51
CHAPTER V Profitability of maize production	52
5.1 Yield of local and hybrid maize varieties	52
5.2 Input use and cost analysis	53
5.2.1 Input use	53
5.2.2 Cost analysis of local and hybrid maize varieties in study area	58
5.3 Profitability analysis	60
5.3.1 Return to gross margins of local and hybrid maize varieties	61
5.3.2 Return to family land, labor, and management (RFLLM) of local and hybrid maize varieties	63
5.3.3 Return to family land, labor, and management per day (RFLMD) of local and hybrid maize varieties ..	65
5.3.4 Comparison of local and hybrid maize varieties in rainfed condition and sold as dry grain.....	66
5.3.5 Comparison of local maize sold as fresh ears and hybrid maize sold as dry grain under rainfed condition	69
5.3.6 Comparison of local maize sold as dry grain and local maize sold as fresh ears under rainfed condition.....	72
5.3.7 Comparison of hybrid maize sold as dry grain and hybrid maize sold as fresh ears under irrigated condition.	75
5.4 Sensitivity analysis	78
CHAPTER VI Logistic regression analysis of adoption of hybrid maize varieties	80
6.1 Results	80
6.2 Discussion of results	86
CHAPTER VII Conclusions and recommendations	89
7.1 Conclusions	89
7.2 Recommendations.....	92

List of Tables

Table	Page
1.1 Crop production in Cambodia, 2004	2
2.1 Definition of variables for adoption study	17
3.1 Distance to Vietnam border.....	25
3.2 Land use under different crops in study area	26
3.3 Land use under different fruit trees in study area	27
3.4 Livestock population	28
3.5 Maize productions in study area	28
3.6 Percentage of hybrid varieties grown in the study area	29
3.7 Administrative division and population, Koh Thom district	34
3.8 Cultivated maize area and land tenure of maize in study area	35
3.9 Total population and households in study area	36
3.10 Education of households' head and labor available in the family in study area	37
3.11 Length of stay in the villages	38
3.12 Years of experience in growing maize	38
3.13 Family income in the study area	39
3.14 Source of household income per year	40
3.15 Access to technical advice, input and output markets, and credit	41
4.1 Average minimum and maximum yields of local and hybrid maize sold as dry grain	48
4.2 Price of local and hybrid maize by output types and areas	50
4.3 Market price and credit price of inputs of maize production	51
5.1 Cost of local and hybrid maize varieties in rainfed condition and sold as dry grain	55
5.2 Cost of hybrid maize varieties in rainfed and irrigated conditions and sold as dry grain	56
5.3 Average yields, prices, costs and returns of local and hybrid maize in rainfed and sold as dry grain	68
5.4 Average gross incomes, costs and returns of local maize sold as fresh ears and hybrid maize sold as dry grain in rainfed condition	71

5.5	Average gross incomes, costs and returns of local maize sold as dry grain and local maize sold as fresh ears in rainfed condition	74
5.6	Average gross income, costs and returns of hybrid maize sold as dry grain and sold as fresh ears in irrigated condition	77
6.1	Logit regression analysis for adoption of hybrid maize varieties in the study area	82
6.2	Probability of combination of the four important factors influencing the adoption of hybrid maize varieties	84
6.3	Omnibus tests of model coefficients	85
6.4	Classification table (a)	85
6.5	Model summary	86
6.6	Hosmer and Lemeshow Test	86

List of Figures

Figure	Page
1.1 Maize productions in Cambodia from 1996-2004	2
2.1 Map of Cambodia and location of study area	11
3.1 Map of study area	22
3.2 Distribution of rainfall of study area	23
3.3 Three-year climatic data of study area	24
3.4 Soil fertility in the study area from farmers' interview, 2005	25
3.5 Maize-based cropping patterns in the study area	31
3.6 Percentage distributions of farm size in study area	35
3.7 Percentage distributions of age categories.....	36
4.1 Use of local maize output by farmer households	45
4.2 Use of hybrid maize output by farmer households	46
4.3 Percentage of local maize yield in the study area	48
5.1 Yield of local and hybrid maize varieties in study area	53
5.2 Total cost of local and hybrid maize varieties in study area	58
5.3 Input, hired labor, and family labor costs of local and hybrid maize varieties	60
5.4 Return to gross margins of local and hybrid maize varieties	62
5.5 Return to family land, labor, and management of local and hybrid maize varieties	64
5.6 Return to family land, labor, and management per day of local and hybrid maize varieties	65

List of Appendices

Appendices	Page
Appendix A Local maize varieties sold as dry grain: Sensitivity analysis on enterprise gross margin with changing maize yields and prices	97
Appendix B Hybrid maize varieties sold as dry grain under rainfed condition: Sensitivity analysis on enterprise gross margin with changing maize yields and prices	98
Appendix C Hybrid maize varieties sold as dry grain in irrigated condition: Sensitivity analysis on enterprise gross margin with changing maize yields and prices	99
Appendix D Local maize varieties sold as dry grain: Sensitivity analysis on enterprise gross margin after including other income from corncob and thinned plants with changing maize yields and prices	100
Appendix E Hybrid maize varieties sold as dry grain under rainfed condition: Sensitivity analysis on enterprise gross margin after including other income from corncob with changing maize yields and prices	101
Appendix F Hybrid maize varieties sold as dry grain under irrigated condition: Sensitivity analysis on enterprise gross margin after including other income from corncob with changing maize yields and prices	102

Abbreviations and Definitions

ACLEDA	= Association of Cambodian Local Economic Development Agencies
CIMMYT	= International Maize and Wheat Improvement Center
CP	= Charoen Pokphand
df	= Degree of freedom
GDP	= Good domestic product
GI	= Gross income
GM	= Gross margin
GMA	= Gross margin after including other income from corncob and thinned plants
Ha	= Hectare
Kg	= Kilogram
Km	= Kilometer
MAFF	= Ministry of Agriculture, Forestry, and Fisheries
Prob.	= Probability
RFLLM	= Return to family labor, land, and management
RFLLMA	= Return to family labor, land, and management after including other income from corncob and thinned plants
RFLLMD	= Return to family labor, land, and management per day
RFLLMDA	= Return to family labor, land, and management per day after including other income from corncob and thinned plants
Sig.	= Significance
t	= Ton
