<b>Abstract in Thai</b>	<b>v</b>
<b>Abstract in English</b>	<b>vii</b>
<b>Table of Contents</b>	<b>ix</b>
<b>List of Tables</b>	<b>xiii</b>
<b>List of Figures</b>	<b>xv</b>
<b>List of Abbreviations</b>	<b>xvi</b>
<b>Chapter I Introduction</b>	<b>1</b>
1.1 Background	1
1.2 Problem of rice production in Bangladesh	2
1.3 Rice pest status in Bangladesh	3
1.4 Current pest management practices	3
<b>Chapter II Literature Review</b>	<b>5</b>
2.1 Pest surveillance in rice production	5
2.2 Current situation of rice pest surveillance in Bangladesh	6
2.3 Three major rice insect pests of Bangladesh	7
2.4 Integrated Pest Management (IPM)	9
2.4.1 Current situation of rice IPM in Bangladesh	12
2.4.2 Impact on IPM training	13
2.4.3 Integrated pest management (IPM) policy developments	14
2.4.4 Developments of community IPM	14
2.4.5 Farmer-farmer training	15
2.4.6 IPM in schools	15
2.4.7 IPM clubs/IPM congress	16
2.5 Geographic information systems (GIS) and IPM	16
2.6 Pest population mapping	18

<b>Chapter III Research Methodology</b>	21
3.1 Research procedures	22
3.2 Field and household survey	22
3.2.1 Sampling techniques	25
3.2.2 Data collection	25
3.2.2.1 Primary data collection	25
3.2.2.2 Secondary data collection	26
3.3 Data Analysis	26
3.3.1 GIS analysis	26
3.3.1.1 Software	27
3.3.1.2 Data acquisition	27
3.3.1.3 Design requirements	27
3.3.1.4 How to input data	28
3.3.2 Multiple regression model for factors influence benefit-cost ratio	29
3.3.3 Multinomial logistic model for adoption of surveillance method	29
<b>Chapter IV Description of the Study Site</b>	32
4.1 Description of Bangladesh socio-economic characteristics	32
4.1.1 Location and topology	32
4.1.2 Climate of Bangladesh	33
4.1.2.1 Rainfall	33
4.1.2.2 Temperature	34
4.1.3 Land use pattern in Bangladesh	35
4.1.4 Role of agriculture in Bangladesh economy	36
4.1.5 Rice farming in Bangladesh	37
4.1.6 Status of rice cultivation in different ecosystem	38
4.2 Description of Gazipur district	39
4.2.1 Socio-economic condition of Gazipur district	40
4.2.2 Problems of rice cultivation in Gazipur district	41
4.2.3 Pest infestation in Gazipur district	42

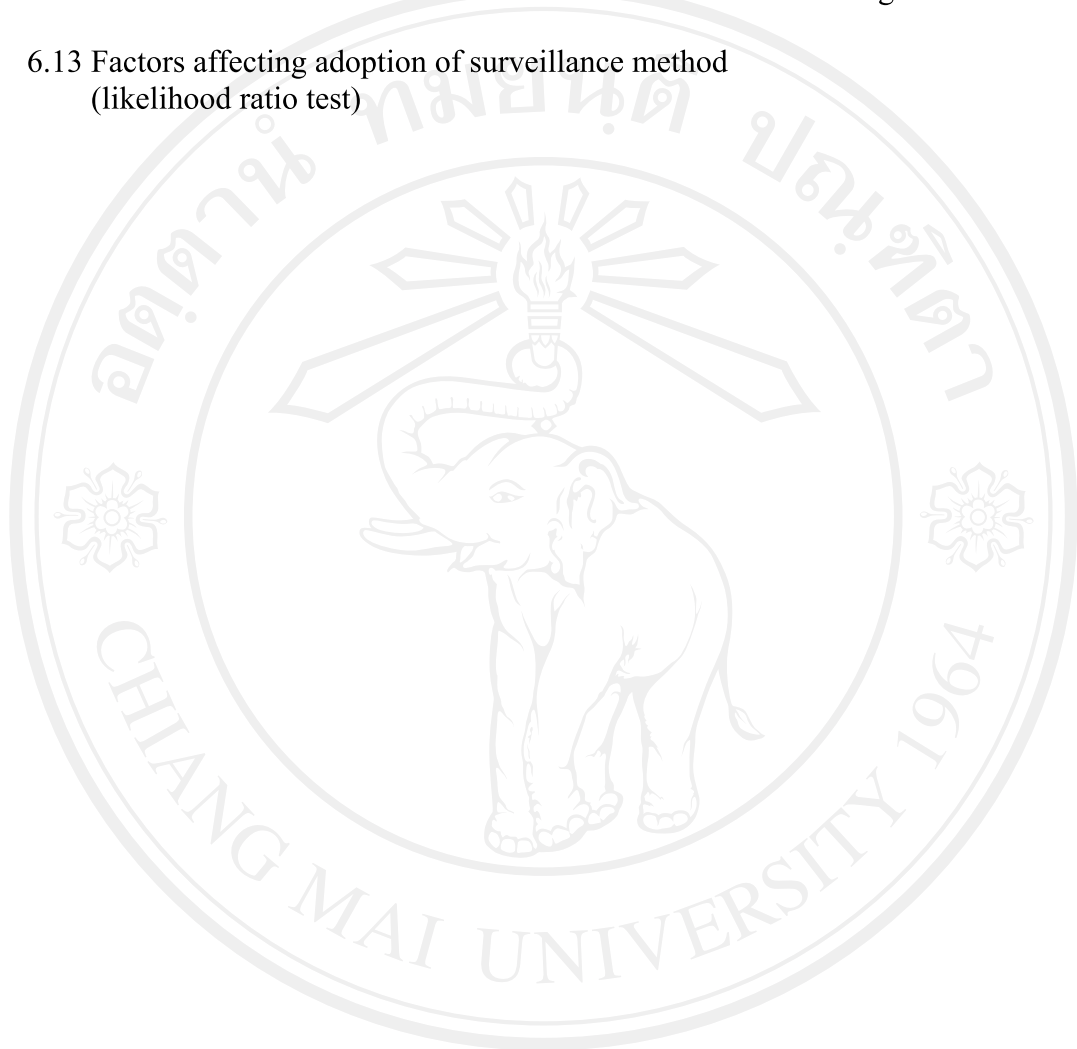

<b>Chapter V Spatially-explicit Pest Infestation in Bangladesh</b>	43
5.1 Spatial analysis three major insects of rice in 64 districts of Bangladesh	43
5.1.1 Stem borer infestation during the Year 1999-2008	44
5.1.2 Brown planthopper infestation during the year 1999-2008	50
5.1.3 Rice hispa infestation during the year 1999-2008	56
5.2 Conclusion	62
<b>Chapter VI Comparison of Surveillance Method and Adoption of Surveillance Method</b>	64
6.1 Types of farmers and sample size	64
6.1.1 Farming system practices by different types of farmers	67
6.1.2 Historical profile of major pest infestation record (7 years record)	67
6.1.3 Frequency of crop field visit by farmers in a week	68
6.1.4 Method of pest control	69
6.1.5 Analysis of pest-defender ratio in different farmer's field	70
6.1.6 Comparison of percentage of pest infestation in rice field	71
6.1.7 Comparison of labour force engaged in different types of rice farming	72
6.1.8 Comparison of benefit-cost ratio in different types of farmer's practice	73
6.2 Factors affecting benefit-cost ratio in different types of farmers	74
6.2.1 Benefit-cost ratio in different parameters in IPM farmer	74
6.2.2 Benefit cost ratio in different parameters in Non-IPM farmer	76
6.2.3 Benefit-cost ratio in different parameters in contact farmers' group	78
6.2.4 Benefit-cost ratio in different parameters for all farmers (n=125)	79
6.3 Multinomial logit model for farmers' surveillance method adoption	81
6.3.1 Factors affecting adoption of surveillance method	84

<b>Chapter VII Summary of the Finding and Recommendations</b>	86
7.1 Summary of the finding	86
7.1.1 Spatially-explicit finding	87
7.1.2 Socioeconomic sustainability comparison	87
7.1.3 Ecological sustainability comparison	88
7.1.4 Agronomic sustainability comparison	89
7.1.5 Overall sustainability comparison	89
7.2 Recommendation	89
7.2.1 Training and extension	90
7.3 Future research	90
7.4 Limitation of the study	91
<b>References</b>	92
<b>Appendices</b>	95
Appendix A	96
Appendix B	98
Appendix C	99
<b>Curriculum Vitae</b>	104

## List of Tables

<b>Table</b>	<b>Page</b>
3.1 Comparison of monitoring system	23
4.1 Average temperature and rainfall	34
4.2 Land cover types and extent of Bangladesh 1992-1993	36
5.1 Spatial distribution of stem borer infestation during ten years period (district number and percentage)	47
5.2 Spatial distribution of BPH infestation during ten years period (district number and percentage)	53
5.3 Spatial distribution of rice hispa infestation during ten years period (district number and percentage)	59
6.1 Rice cultivated land extent in the sample	66
6.2 Farming system practices by different types of farmers	67
6.3 Historical profile of major pest infestation record (7 years record)	68
6.4 Frequency of crop field visit by farmers in a week	69
6.5 Different method taken for pest control	70
6.6 Pest-defender ratio in three types of farmer's field	71
6.7 Percentage of pest infestation in three different types of field	71
6.8 Average labour forces engaged in different types of farming	72
6.9 Average benefit-cost ratio in different types of farming	74
6.10 (a) Determinants of benefit-cost ratio in different parameters in IPM farmer	76
6.10 (b) Determinants of benefit cost ratio in different parameters in Non-IPM farmer	77
6.10(c) Determinants of benefit cost ratio in different parameters in contact farmers' group	79

6.11 Determinants of benefit cost ratio in different parameters for all farmer (n=125)	81
6.12 Definition of variables and variables values in multinomial regression	82
6.13 Factors affecting adoption of surveillance method (likelihood ratio test)	85

## List of Figures

<b>Figure</b>	<b>Page</b>
4.1 Map showing location of Gazipur district	40
5.1 Map showing stem borer infestation during the year 1999- 2002	48
5.2 Map showing stem borer infestation during the year 2003- 2006	49
5.3 Map showing stem borer infestation during the year 2007- 2008	50
5.4 Map showing brown planthopper infestation during the year 1999-2002	54
5.5 Map showing brown planthopper infestation during the year 2003-2006	55
5.6 Map showing brown planthopper infestation during the year 2007-2008	56
5.7 Map showing rice hispa infestation during the year 1999- 2002	60
5.8 Map showing rice hispa infestation during the year 2003- 2006	61
5.9 Map showing rice hispa infestation during the year 2007- 2008	62
6.1 Graph shows the land size frequency for different number of farmers	66

## Abbreviations and Symbols

AESA	= Agro Eco-system Analysis
AEZ	= Agro Ecological Zone
BARI	= Bangladesh Agricultural Research Institute
BIRRI	= Bangladesh Rice Research Institute
CRSP	= Collaborative Research Support Program
DAE	= Department of Agricultural Extension
DANIDA	= Danish International Development Agency
FAO	= Food and Agriculture Organization
FFS	= Farmer Field School
FT	= Farmer Trainer
GIS	= Geographic Information System
GMO	= Genetically Modified Organism
HYV	= High Yielding Variety
ICP	= Inter Country Program
IPM	= Integrated Pest Management
NAP	= National Agricultural Policy
SFS	= Student Field School
SWTRC	= Southwest Technical Resource Center
TOT	= Training of Trainers
UNDP	= United Nations Development Programme
