

TABLE OF CONTENTS

	Page
Acknowledgements	iii
Abstract (English)	v
Abstract (Thai)	viii
List of tables	xv
List of figures	xvi
Chapter 1 General introduction	
1.1 Fungal definition and importance	1
1.2 Principle, theory, and rationale	2
1.3 Research objectives	3
1.4 Usefulness of the Research	3
1.5 Research content	4
Chapter 2 Literature review	
2.1 Ecology of fungi and their roles in ecosystem	6
2.1.1 Endophyte	8
2.1.2 Pathogens	9
2.1.3 Saprobes	10
2.2 Fungal Taxonomy and Species Concepts	11
2.2.1 Morphological Species Concept	11
2.2.2 Biological Species Concept	12
2.2.3 Phylogenetic Species Concept	13
2.3 Fungal specificity	14
2.4 Importance of fungal plant pathogens	15
2.5 Fungi on exotic plantations	17
2.5.1 Exotic fungal plant pathogens	17

TABLE OF CONTENTS (CONTINUED)

	Page
2.5.2 Host shift and host jumping	17
2.6 <i>Eucalyptus</i>	19
2.7 Studies of fungi on <i>Eucalyptus</i>	22
2.7.1 First study	22
2.7.2 Major Contributions	22
2.7.3 Biodiversity of fungi on <i>Eucalyptus</i>	25
2.7.4 Selected important fungi on <i>Eucalyptus</i>	26
<i>Coniella</i> Höhn.	26
<i>Cylindrocladium</i> Morgan	28
<i>Harknessia</i> Cooke	30
<i>Mycosphaerella</i> and associated anamorphs	31
<i>Quambalaria</i> J.A. Simpson	33
2.7.5 Phylogenic studies of selected fungi on <i>Eucalyptus</i>	35
<i>Schizoparme</i> and <i>Coniella</i>	35
<i>Calonectria</i> and <i>Cylindrocladium</i>	36
<i>Wuestneia</i> and <i>Harknessia</i>	37
<i>Mycosphaerella</i> and associated anamorphs	37
<i>Quambalaria</i>	38
2.8 Number of fungi on <i>Eucalyptus</i>	39
2.8.1 Checklist of fungi on <i>Eucalyptus</i> (1880-1994)	39
2.8.2 Updated checklist of fungi on <i>Eucalyptus</i> (1995-present)	40
Chapter 3 Species of <i>Mycosphaerella</i> and related anamorphs on <i>Eucalyptus</i> leaves from Thailand	
3.1 Introduction	72
3.2 Materials and methods	73

TABLE OF CONTENTS (CONTINUED)

	Page
3.2.1 Isolates	73
3.2.2 DNA isolation, amplification and analyses	74
3.2.3 Morphology	77
3.3 Results	
3.3.1 Phylogenetic analysis	78
3.3.2 Taxonomy	81
3.4 Discussion	93
Chapter 4 Taxonomic status of <i>Cryptosporiopsis eucalyptus</i> and its associated telemorph	
4.1 Introduction	96
4.2 Materials and methods	
4.2.1 Isolates	98
4.2.2 DNA isolation, amplification and analyses	98
4.2.3 Morphology	101
4.3 Results	
4.3.1 Phylogenetic analysis	101
4.3.2 Taxonomy	104
4.4 Discussion	119
Chapter 5 Clarified taxonomic status of <i>Heteroconium</i> and <i>Heteroconium</i>-like species occurring on <i>Eucalyptus</i>	
5.1 Introduction	123
5.2 Materials and methods	
5.2.1 Isolates	124
5.2.2 DNA isolation, amplification and analyses	124
5.2.3 Morphology	125

TABLE OF CONTENTS (CONTINUED)

	Page
5.3 Results	
5.3.1 Phylogenetic analysis	126
5.3.2 Taxonomy	128
5.4 Discussion	135
Chapter 6 New and interesting eucalypt microfungi	
6.1 Introduction	136
6.2 Materials and methods	
6.2.1 Isolates	138
6.2.2 DNA isolation, amplification and analyses	138
6.2.3 Morphology	141
6.3 Results	
6.3.1 Phylogenetic analysis	141
6.3.2 Taxonomy	144
6.4 Discussion	198
Chapter 7 General Discussion	
7.1 Diversity of fungi on <i>Eucalyptus</i>	201
7.2 Molecular techniques for fungal studies	202
7.3 <i>Eucalyptus</i> fungal specificity	204
7.4 Fungi in exotic plantations	204
7.5 Suggestions and comments	205
References	207
Curriculum Vitae	248
Publications	250

LIST OF TABLES

Table	Page
2.1 Ecosystem services provided by fungi	7
2.2 Interesting fungi associate with <i>Eucalyptus</i>	23
2.3 Updated checklist of fungi on <i>Eucalyptus</i> (1995-present)	40
3.1 Isolates of <i>Mycosphaerella</i> or its anamorphs used for DNA analysis and morphological studies	75
4.1 Isolates of <i>Cryptosporiopsis</i> and <i>Pseudoplagiostoma</i> used for DNA analysis and morphological studies.	99
4.2 Culture characteristics of <i>Pseudoplagiostoma</i> spp. after 15 days of incubation at 25°C in the dark.	117
6.1 Isolates of microfungi used for DNA analysis and morphological studies.	140

LIST OF FIGURES

Figure	Page
3.1 One of 1000 equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the ITS sequence alignment of <i>Mycosphaerella</i> and related anamorphs.	79
3.2 One of 1000 equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the LSU sequence alignment of <i>Mycosphaerella</i> and related anamorphs.	80
3.3 Single most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the combined ITS, EF and ACT sequence alignment of <i>Mycosphaerella</i> and related anamorphs.	81
3.4 <i>Mycosphaerella irregulari</i>	83
3.5 Line drawing of <i>Mycosphaerella irregulari</i>	83
3.6 <i>Mycosphaerella pseudomarksii</i>	85
3.7 Line drawing of <i>Mycosphaerella pseudomarksii</i>	85
3.8 <i>Mycosphaerella quasiparkii</i>	87
3.9 Line drawing of <i>Mycosphaerella quasiparkii</i>	87
3.10 <i>Penidiella eucalypti</i>	89
3.11 Line drawing of <i>Penidiella eucalypti</i>	90
3.12 <i>Pseudocercospora Chiangmaiensis</i>	92
3.13 Line drawing of <i>Pseudocercospora Chiangmaiensis</i>	92
4.1 The first of 1,000 equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the LSU sequence alignment of <i>Cryptosporiopsis</i> -like fungi	102
4.2 The first of 212 equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the combined ITS and TUB sequence alignment of <i>Pseudoplagiostoma</i> spp.	103

LIST OF ILLUSTRATIONS (CONTINUED)

Figure		Page
4.3	<i>Cryptosporiopsis californiae</i>	106
4.4	<i>Cryptosporiopsis caliginosa</i>	108
4.5	<i>Pseudoplagiostoma eucalypti</i>	111
4.6	Line drawing of <i>Pseudoplagiostoma eucalypti</i>	112
4.7	<i>Pseudoplagiostoma oldii</i>	115
4.8	<i>Pseudoplagiostoma variabile</i>	116
4.9	Line drawing of <i>Pseudoplagiostoma</i> spp.	118
4.10	<i>Pseudoplagiostoma</i> spp. in culture after 15 days	118
5.1	The first of two equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the LSU sequence alignment of <i>Heteroconium</i> -like fungi	127
5.2	<i>Alysiidiella suttonii</i>	130
5.3	<i>Heteroconium citharexyl</i> Petrak	131
5.4	Leaf and petiole lesions associated with <i>Alysiidiella</i> spp.	132
6.1	One of 27 equally most parsimonious trees obtained from a heuristic search with 100 random taxon additions of the LSU sequence alignment of micro fungi on eucalypt	142
6.2	<i>Antennariella placitae</i>	145
6.3	<i>Bagadiella lunata</i>	148
6.4	<i>Blastacervulus eucalypti</i>	151
6.5	<i>Cladoriella paleospora</i>	153
6.6	<i>Cladoriella rubrigena</i>	155
6.7	<i>Cyphellophora eucalypti</i>	157
6.8	<i>Elsinoë eucalypticola</i>	159
6.9	<i>Foliocryphia eucalypti</i>	160
6.10	<i>Leptoxyphium madagascariense</i>	163

LIST OF ILLUSTRATIONS (CONTINUED)

Figure		Page
6.11	<i>Minimedusa obcoronata</i>	165
6.12	<i>Neofabraea eucalypti</i>	167
6.13	<i>Parasymphodiella elongata</i>	169
6.14	<i>Parasymphodiella eucalypti</i>	172
6.15	<i>Parasymphodiella laxa</i>	174
6.16	<i>Penidiella corymbia</i>	176
6.17	<i>Polyscytalum algarvense</i>	178
6.18	<i>Pseudocercospora palleobrunnea</i>	180
6.19	<i>Pseudoramichloridium henryi</i>	182
6.20	<i>Quambalaria simpsonii</i>	185
6.21	<i>Rachicladosporium americanum</i>	187
6.22	<i>Selenophoma australiensis</i>	189
6.23	<i>Sphaceloma tectiferae</i>	191
6.24	<i>Strelitziana australiensis</i>	193
6.25	<i>Sydowia eucalypti</i>	195
6.26	<i>Zeloasperisporium eucalyptorum</i>	197
