	Page
<b>ACKAWLEDGEMENTS</b>	iii
<b>ABSTRACT (Thai)</b>	v
<b>ABSTRACT (English)</b>	vii
<b>TABLE OF CONTENTS</b>	ix
<b>LIST OF TABLES</b>	xiii
<b>LIST OF FIGURES</b>	xv
<b>CHAPTER I INTRODUCTION</b>	1
<b>CHAPTER II LITERATURE REVIEW</b>	
2.1 Vegetable and flower production	9
2.2 Pesticides and its effects	12
2.3 Why do farmers continue to use pesticides?	16
2.3.1 Pesticides utilization in crops production	18
2.3.2 Factors leading to pesticides residue contamination in vegetables and flowers	22
2.4 Factors influencing the awareness of farmers	24
2.5 Use of Tobit regression model in other related studies	26
<b>CHAPTER III RESEARCH METHODS</b>	
3.1 Site selection	28
3.2 Sampling technique	29

**TABLE OF CONTENT (Continued)**

	<b>Page</b>
3.3 Data collection	29
3.3.1 Primary data	29
3.3.2 Secondary data	31
3.4 Data analysis	32
3.4.1 Tobit model	32
3.4.2 Factor analysis	37
3.4.3 General Hypotheses	38
3.4.4 Developing Awareness Index and Behavioral Index	39
(a) Developing Awareness Index (AI)	39
(b) Developing Behavioral Index (BI)	42
 <b>CHAPTER IV RESULTS: STUDY AREA AND RESPONDENTS' PROFILE</b>	
4.1 Biophysical environment	44
4.1.1 Location and area	44
4.1.2 Climate	45
4.1.3 Soil	46
4.2 General characteristics of the study area	48
4.2.1 Growing area of vegetables and flowers	48
4.2.2 Cropping systems	49
4.2.3 Current use pesticides in the study area	50
4.2.4 Major pests and diseases in the study area	53
4.3 General characteristics of the sampled respondents	54
4.3.1 Socioeconomic status	54

**TABLE OF CONTENT (Continued)**

	<b>Page</b>
4.3.2 Exposure to information and knowledge status	58
4.3.2.1 Extension content	58
4.3.2.2 Training experience	59
4.4 Pesticides used	60
4.4.1 Sources of information to use pesticides	61
4.4.2 Intensity of reliance on pesticides used	62
4.4.3 Potentiality of pesticides used	62
4.4.4 Use of pesticides with care	63
4.5 Farmers' behaviors towards the use of pesticides	64
4.5.1 Reading the instructions	64
4.5.2 Amount, times and kinds of pesticides used	65
4.5.3 Materials using in preparing pesticides application	67
4.5.4 Using recommended rate of pesticides	69
4.5.5 Places for storing and destroying pesticides containers	69
4.5.6 Preventive measures practiced by the farmers	71
<b>CHAPTER V HARMFUL EFFECTS OF PESTICIDES</b>	
<b>AWARENESS AND FARMING BEHAVIORS</b>	
5.1 Actual scores of Awareness Index (AI)	73
5.2 Actual scores of Behavioral Index (BI)	78
5.3 The results of factor analysis	81
5.4. The results of Tobit regression analysis	84

**TABLE OF CONTENT (Continued)**

	<b>Page</b>
5.4.1 The relationship between AI and factor scores of the main components	84
5.4.2 The relationship between AI and BI	86
5.5 Alternative method	87
5.6. Summarized inference	90
<b>CHAPTER VI DISCUSSIONS</b>	<b>93</b>
<b>CHAPTER VII CONCLUSIONS AND RECOMMENDATIONS</b>	
7.1 Conclusions	102
7.2 Policy recommendations	105
7.3 Recommendations for further studies	107
<b>REFERENCES</b>	<b>108</b>
<b>APPENDICES</b>	<b>114</b>
APPENDIX A	115
APPENDIX B	121
APPENDIX C	127
<b>CURRICULUM VITAE</b>	<b>130</b>

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1.1 Production of vegetables in Myanmar (2008-2009)	3
3.1 Variables and measurements in the factor analysis	33
3.2 Vegetable growers' harmful effects of pesticides awareness based on their knowledge	40
3.3 Scoring system by the orientation of the statement	41
3.4 Scoring scheme for Behavioral Index on pesticides used	43
4.1 Production area of vegetable crops in Pyin Oo Lwin (2009-2010)	49
4.2 Current use of pesticides in the study area	51
4.3 Common pests and diseases in the study area	53
4.4 Summarized description of the selected variables	57
4.5 Sources of information to use pesticides	62
4.6 Preventive measures practiced by the farmers (during spraying)	72
5.1 The percentage, average, minimum and maximum scores of farmers' awareness on harmful effects of pesticides on each question	77
5.2 The percentage, average, minimum and maximum scores of farmers' behaviors on pesticides practices on each question	79
5.3 Components extracted by factor analysis showing the total variance explained	81
5.4 Rotated component matrix of first method	82

**LIST OF TABLES (Continued)**

<b>Table</b>	<b>Page</b>
5.5 Components extracted by PCA and their independent variables (first method)	83
5.6 Result of AI (dependent) and main components in Tobit regression model	85
5.7 Correlation between AI and BI	86
5.8 Tobit regression model of BI (dependent) and AI (independent)	87
5.9 Components extracted by PCA showing the total variance explained (second method)	87
5.10 Rotated component matrix of second method	88
5.11 Components extracted by PCA and their independent variables (second method)	89
5.12 Result of BI (dependent) and main components with AI in Tobit regression model (second method)	89

## LIST OF FIGURES

<b>Figure</b>	<b>Page</b>
2.1 Total pesticides utilization in Myanmar (MT)	18
3.1 Location of the study area, Pyin Oo Lwin township, Mandalay division, Myanmar	29
4.1 Monthly maximum and minimum temperature of the study area (2009)	45
4.2 Distribution of rainfall (mm) and rainy days in the study area (2009)	46
4.3 Soil map of Mandalay Division	47
4.4 Crops production area in Pyin Oo Lwin (2009- 2010)	48
4.5 Cropping patterns in the study area	50
4.6 The percentage of age of the respondents in the study area	54
4.7 Farm distribution of sampled respondents per cent	55
4.8 Years of using pesticides (% of respondents)	60
4.9 Reading the instructions (% of respondents)	65
4.10 Amount of pesticides which are well-instructed in Myanmar language used by farmers	66
4.11 Time of pesticides used when the farmers see the pests in their field (% of respondents)	67
4.12 Percentage of respondents in using the materials when applying pesticides	68
4.13 Percentage of respondents in spraying pesticides by themselves or by hired labor	68
4.14 Using the recommended rate of pesticides by farmers (% of respondents)	69

## LIST OF FIGURES (Continued)

Figure	Page
4.15 Places for storing pesticides (% of respondents)	70
4.16 Places for destroying the empty pesticides containers (% of respondents)	70
