

## TABLE OF CONTENTS

	<b>Page</b>
ACKNOWLEDGEMENTS	iii
ABSTRACT (English)	v
ABSTRACT (Thai)	xiii
TABLE OF CONTENTS	xii
LIST OF TABLES	xv
LIST OF FIGURES	xix
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEW	3
2.1 Cassava agronomy	3
2.2 Factors affecting germination and establishment of cassava stakes	7
2.3 Nutrition of the planting material	8
2.4 Priming	9
CHAPTER 3 MATERIALS AND METHODS	10
3.1 Experiment 1: Effect of cassava stake priming with complete nutrient solution on growth and yield	10
3.2 Experiment 2: The response to stake priming in KU 50 from different sources in Lao PDR on growth and yield	15

3.3 Experiment 3: Response to stake priming in cassava varieties from different sources in Thailand on growth, yield and nutrient accumulation	19
3.4 Experiment 4: Response to stake priming with nutrient solution on germination and early growth	24
CHAPTER 4 RESULTS	27
4.1 Experiment 1: Effects of cassava stake priming with complete nutrient solution on growth and yield	27
4.2 Experiment 2: The responses to stake priming in KU 50 from different sources in Lao PDR on growth and yield	39
4.3 Experiment 3: Response to stake priming in cassava varieties from different sources in Thailand on growth, yield and nutrient accumulation	51
4.4 Experiment 4: Response to stake priming with nutrient solution on germination and early growth	75
CHAPTER 5 DISCUSSION	86
5.1 Experiment 1: Effect of stake soaking on various cassava varieties	86
5.2 Experiment 2: The responses to stake priming in KU 50 from different sources in Lao PDR on growth and yield	87

5.3 Experiment 3: Response to stake priming in cassava varieties from different sources in Thailand on growth, yield and nutrient accumulation	87
5.4 Experiment 4: Response to stake priming with nutrient solution on germination and early growth	89
5.5 General discussion	90
CHAPTER 6 CONCLUSION	92
REFERENCES	93
CURRICULUM VITAE	100

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1    Approximate classification of soil chemical characteristics according to the nutritional requirements of cassava	5
2    Chemical and physical characteristics of the soil used for experiment 1	12
3    Nutritional characteristics of the stake used for experiment 1 before priming	12
4    Elements and salts used in the complete nutrient solution	13
5    Chemical and physical characteristics of the soil used for experiment 2	18
6    Nutritional characteristics of the stake used for experiment 2 before priming	18
7    Chemical and physical characteristics of the soil used for experiment 2	20
8    Nutritional characteristics of the stakes used for experiment 2 before priming	20

9	Effects of stake priming on root fresh weight of 5 cassava varieties at 12 months after planting	28
10	Effects of stake priming on total dry aboveground weight of cassava varieties at 12 months after planting	31
11	Effects of stake priming on root number per plant of cassava varieties at 12 months after planting	32
12	Effects of stake priming on starch content in fresh roots of cassava varieties at 12 months after planting	33
13	Effects of stake priming on starch yield of cassava varieties at 12 months after planting	34
14	Effects of stake priming in KU 50 from different sources on fresh root weight	40
15	Effects of stake priming in KU 50 from different sources on root number	41
16	Effects of stake priming in KU 50 from different sources on fresh aboveground weight	42
17	Effects of stake priming in KU 50 from different sources on starch content at 4 months after planting	43
18	Effects of stake priming in KU 50 from different sources on starch yield at 4 months after planting	44

19	Effects of stake priming in KU 50 from different sources on fresh root weight	46
20	Effects of stake priming in KU 50 from different sources on starch content	49
21	Effects of stake priming in KU 50 from different sources on starch yield	50
22	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Maharakham and Mukdahan on dry above ground weight	54
23	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Maharakham and Mukdahan on root number	55
24	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Maharakham and Mukdahan on fresh root weight	63
25	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Maharakham and Mukdahan on dry above growth weight	64
26	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Maharakham and Mukdahan on N content in the whole plant	71

27	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on P content in the whole plant	72
28	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on K content in the whole plant	73

## LIST OF FIGURES

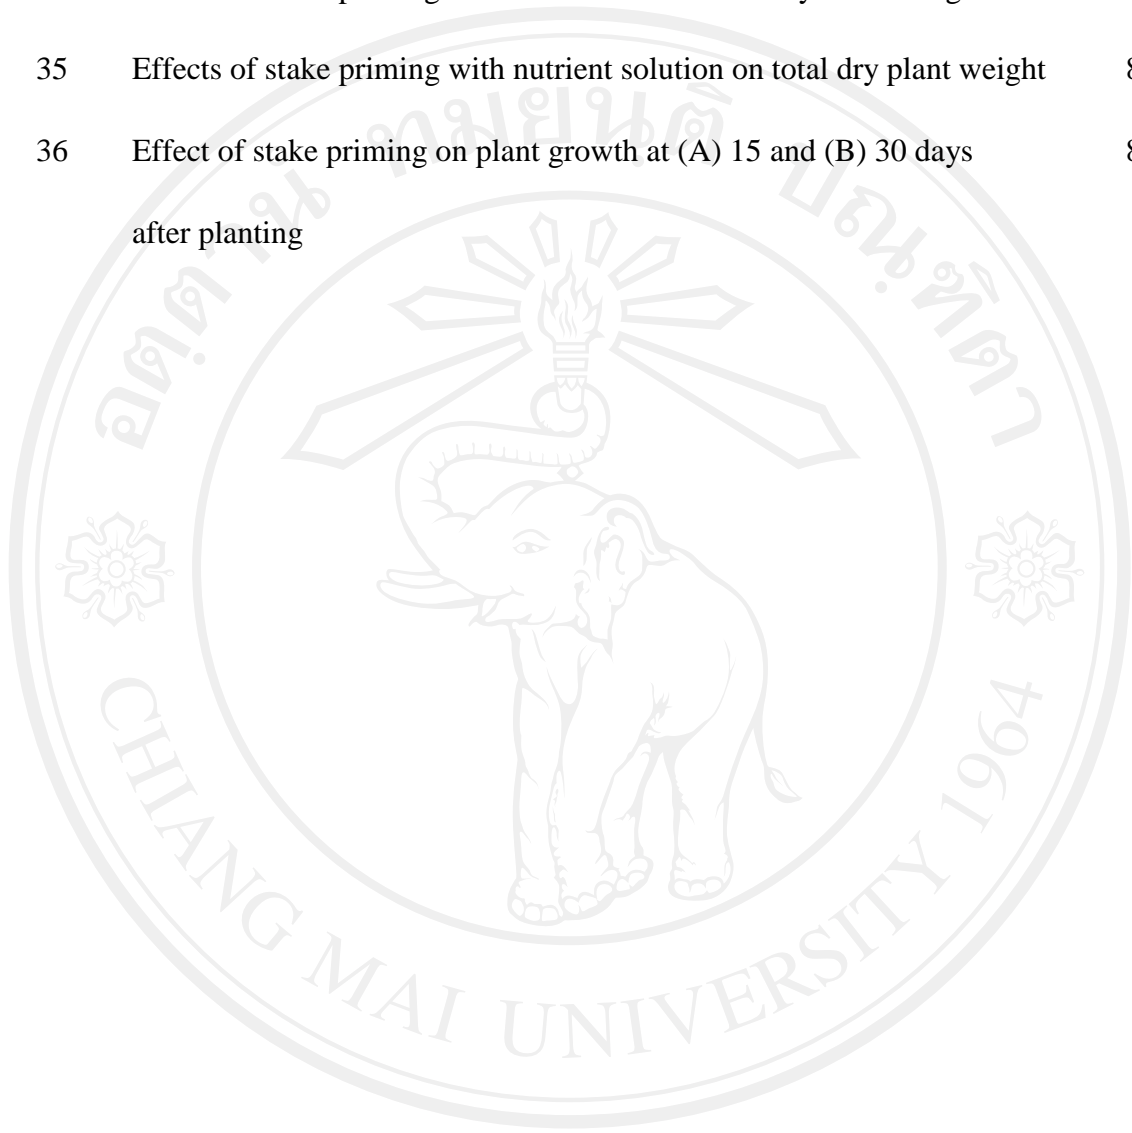

<b>Figure</b>	<b>Page</b>
1 Mean temperature data at Mea Hai Research Station and Training Center during the period of the trial, 2009–2010	14
2 Rainfall at Mae Hia Research Station and Training Center during the period of the trial, 2009–2010	14
3 Location of the plot site and stake source for experiment 2 in Lao PDR	17
4 Mean temperature at Mea Hai Research Station and Training Center during the period of the trial, 2010–2011	21
5 Rainfall at Mae Hia Research Station and Training Center during the period of the trial, 2010–2011	22
6 Location of the plot site and stake source for experiment 3 in Thailand	23
7 Adjustment of soil pH by CaO <sub>3</sub> before use for this experiment	25
8 Measurement of starch content	26
9 Effects of stake priming on dry root weight of cassava varieties at 12 months after planting	29
10 Effects of stake priming on N content in the whole plant as well as in roots, stems and leaves of cassava varieties at 12 months after planting	36

11	Effects of stake priming on P content in the whole plant as well as in roots, stems and leaves of cassava varieties at 12 months after planting	37
12	Effects of stake priming on K content in the whole plant as well as in roots, stems and leaves of cassava varieties at 12 months after planting	38
13	Effects of stake priming on root number in KU 50 from different sources	47
14	Effects of stake priming in KU 50 from different sources on fresh aboveground weight	48
15	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on fresh root weight	52
16	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on dry root weight	53
17	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on starch content	57
18	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on starch yield	58
19	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on N content in the whole plant	59
20	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on P content in the whole plant	60
21	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on K content in the whole plant	61

22	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on dry root weight	65
23	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on root number	66
24	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on starch	68
25	Effects of stake priming in KU 50 and Rayong 72 from Chiang Mai, Mahasarakham and Mukdahan on starch yield.	69
26	Cassava root of experiment 3; (A) harvesting at 4 and (B) 8 months after planting	74
27	Effects of stake priming with nutrient solution on the germination rate of cassava	75
28	Effects of stake priming with nutrient solution on root dry weight of cassava	76
29	Effects of stake priming with nutrient solution on root number of cassava	77
30	Effects of stake priming with nutrient solution on shoot dry weight	78
31	Effects of stake priming with nutrient solution on total dry plant weight	79
32	Effects of stake priming with nutrient solution on dry root weight	81
33	Effects of stake priming with nutrient solution on root number	82

34	Effects of stake priming with nutrient solution on dry shoot weight	83
35	Effects of stake priming with nutrient solution on total dry plant weight	84
36	Effect of stake priming on plant growth at (A) 15 and (B) 30 days after planting	85
