

## TABLE OF CONTENTS

	<b>Page</b>
<b>ACKNOWLEDGEMENTS</b>	iii
<b>ABSTRACT (Thai)</b>	v
<b>ABSTRACT (English)</b>	vii
<b>TABLE OF CONTENTS</b>	x
<b>LIST OF TABLES</b>	xiv
<b>LIST OF FIGURES</b>	xvi
<b>CHAPTER 1 INTRODUCTION</b>	
1.1 Background	1
1.2 Rationale	7
1.3 Objectives	9
1.4 Usefulness of the study	10
<b>CHAPTER 2 LITERATURE REVIEW</b>	
2.1 Coconut cultivation in Sri Lanka	11
2.2 Sustainable agriculture	12
2.3 Policy dealing with sustainability	13
2.4 Sustainable farming systems and practices	14
2.5 Coconut-based farming systems	15
2.6 Sustainable farming practices in coconut-based systems	22
2.7 Factors influencing sustainability	25
2.8 Use of ordered probit model in relevant research	30

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
<b>CHAPTER 3 RESEARCH METHODS</b>	
3.1 Site selection	33
3.2 Sampling technique	35
3.3 Data collection	35
3.3.1 Primary data	35
3.3.2 Secondary data	36
3.4 Data analysis	36
3.4.1 Explanation of dependent variable (coconut-based systems)	37
3.4.2 Factor analysis	39
3.4.3 Ordered probit model	39
<b>CHAPTER 4 FARMING SYSTEMS AND BIO-PHYSICAL AND SOCIO- ECONOMIC CHARACTERISTICS</b>	
4.1 Land characteristics and bio-physical conditions of the study area	42
4.2 Climatic and soil condition	43
4.3 Land cover and land utilization	43
4.4 Cropping systems and main crops grown	44
4.5 Socio-economic conditions of the study area	46
4.6 The characteristics of the sampled households	46
4.6.1 Demographic characteristics of coconut smallholder farmers	46

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
4.6.2 Socio-economic characteristics of coconut smallholder farmers	47
4.6.3 Bio-physical characteristics of coconut smallholder farmers	49
4.7 Description of coconut cultivation	49
4.8 Comparison of different coconut-based farming systems	59
4.8.1 Comparison of demographic characteristics of three farming systems	59
4.8.2 Comparison of bio-physical characteristics of three farming systems	61
4.8.3 Comparison of socio-economic characteristics of three farming systems	63
4.9 Description of coconut-based farming systems	67
4.9.1 Monocropping system	67
4.9.2 Intercropping system	70
4.9.3 Livestock integration system	73
4.10 Problems faced in coconut farming	76

**CHAPTER 5 FACTORS INFLUENCING SUSTAINABLE****COCONUT-BASED FARMING SYSTEMS**

5.1 The results of factor analysis	78
5.1.1 Descriptive statistics of independent variables	79

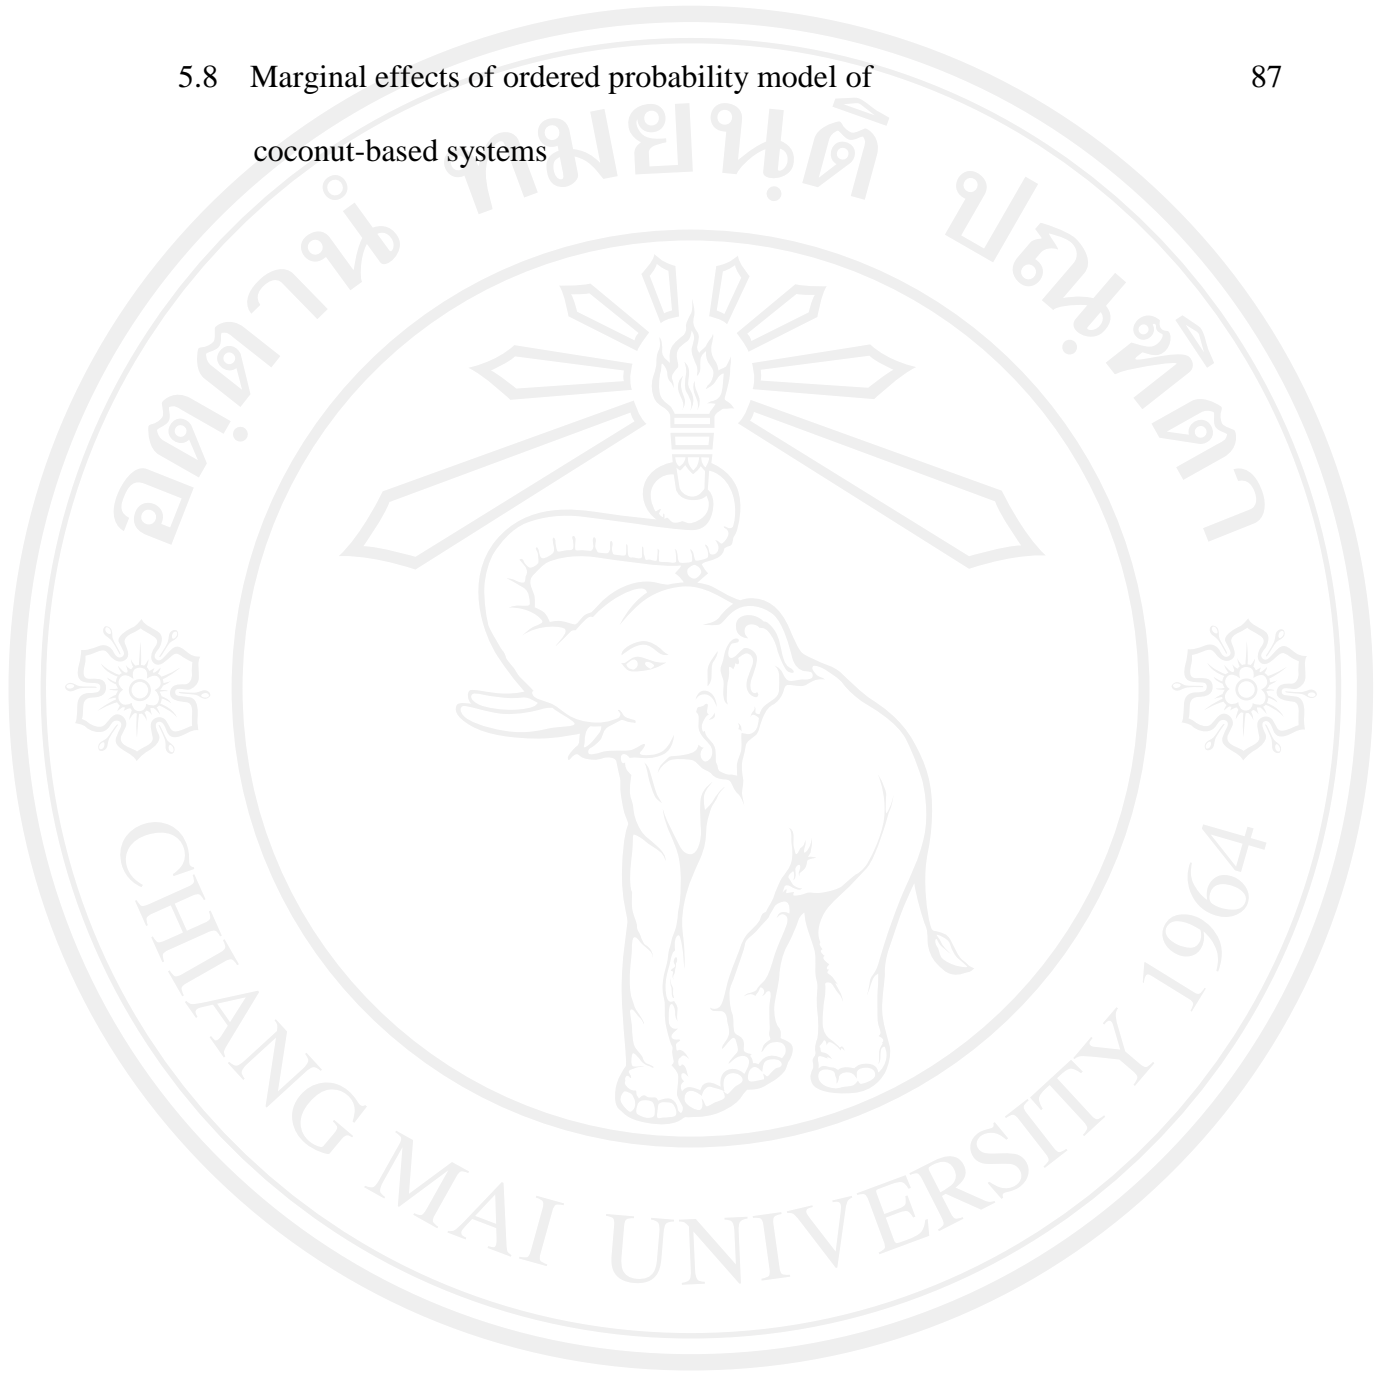

**TABLE OF CONTENTS (Continued)**

	<b>Page</b>
5.2 The results of ordered probit regression analysis	84
5.3 Summarized results	90
<b>CHAPTER 6 SUMMARY, CONCLUSION AND RECOMMENDATIONS</b>	
6.1 Description of coconut cultivation	91
6.1.1 Comparison of different coconut-based farming systems	93
6.1.2 Problems faced by the coconut smallholder farmers	96
6.1.3 Factors influencing sustainable coconut-based farming systems	97
6.2 Recommendations	98
6.3 New findings and limitations	102
6.4 Further study	102
<b>REFERENCES</b>	104
<b>CURRICULUM VITAE</b>	110

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1.1 Performance of the coconut subsidy scheme during 2009	6
3.1 Independent variables used in factor analysis	41
4.1 Land utilization of Gampaha district	44
4.2 Demographic characteristics of coconut smallholder farmers	47
4.3 Socio-economic characteristics of smallholder farmers	48
4.4 Type of organic fertilizer applied by smallholder farmers	52
4.5 Demographic characteristics of farmers in three farming systems	60
4.6 Bio-physical characteristics of farmers in three farming systems	62
4.7 Socio-economic characteristics of farmers in three farming systems	66
4.8 Characteristics of monocropping subsystems	68
4.9 Number of intercrops grown and farmer percentage	71
4.10 Number of farmers and type of livestock reared	74
4.11 Problems faced by the coconut smallholder farmers	76
5.1 KMO and Bartlett's Test	79
5.2 Descriptive statistics of independent variables used in the factor analysis	80
5.3 Components from factor analysis (from rotation sums of squared loadings)	81
5.4 Rotated component matrix	82
5.5 Components (factors) extracted by PCA and their independent variables	83
5.6 Actual and predicted values of observations	85
5.7 Ordered probit model of coconut-based systems	86

5.8 Marginal effects of ordered probability model of  
coconut-based systems

## LIST OF FIGURES

<b>Figure</b>	<b>Page</b>
1.1 Coconut triangle of Sri Lanka	3
3.1 Study area (Gampaha district) of Sri Lanka	34
4.1 Average monthly rainfalls from 2000 to 2010 of Gampaha district	43
4.2 Seasonal cropping calendar of main crops grown in the study area	45
4.3 Type of coconut farming systems adopted by smallholder farmers	50
4.4 Type of fertilizer used by smallholder farmers	51
4.5 Vacancy filling (a) New planting (b) and Underplanting (c) practices followed by smallholder farmers	53
4.6 Method of moisture conservation employed by smallholder farmers	54
4.7 Percentage of pest problems appeared in coconut plantations	55
4.8 The ways of obtaining information by smallholder farmers	56
4.9 Reasons given by smallholder farmers for not accessing to subsidy	58
4.10 Subsidy taken by farmers in three farming systems	63
4.11 Labour utilization of three farming systems	64
4.12 Types of fertilizer applied by smallholder farmers in monocropping system	69
4.13 Reasons given by monocropping farmers for not employed in diversification	70
4.14 Types of intercrops grown and farmer percentage	72
4.15 Farmer views on the effect of intercrops on coconut	73
4.16 Types of livestock reared with farmer percentage (integration system)	74

**LIST OF FIGURES (Continued)**

<b>Figure</b>	<b>Page</b>
4.17 Types of crops grown and farmer percentage (livestock integration system)	75
4.18 Farm gate price of coconut from year 2003-2010	77
