ACKNOWLEDGMENT	III
ABSTRACT IN THAI	IV
ABSTRACT IN ENGLISH	VI
TABLE OF CONTENTS	VIII
LIST OF TABLES	X
LIST OF FIGURES	XIV
CHAPTER 1 INTRODUCTION	1
1.1 Background information	1
1.2 Objectives	4
1.3 Education/application advantages	4
CHAPTER 2 LITERATURE REVIEW	5
2.1 Soybean	5
2.2 Soybean yogurt	10
2.3 Starter micro-organisms used in fermented dairy products	12
2.4 Probiotic	13
2.5 Factors that affect the growth of probiotics	20
2.6 Prebiotic	21
2.7 Utilization of stabilizers in fermented dairy products	26
CHAPTER 3 MATERIALS AND METHODS	33
3.1 Materials	33
3.2 Chemical Reagents	33
3.3 Equipments	34
3.4 Methods	35

CHAPTER 4 RESULTS AND DISSCUSSION	51
4.1 Growth curves of probiotic bacteria in soymilk yogurt with yogurt starter bacteria	51
4.2 Basic formula of soybean yogurt	56
4.3 The effect of soymilk yogurt ingredients on the viability of probiotic bacteria in soymilk yogurt during storage at 4 ⁰ C for 21 days.	59
4.4 The effect of nutrient compounds on the viability of probiotic bacteria in soymilk yogurt during storage at 4 ⁰ C for 21 day	72
CHAPTER 5 CONCLUSION AND RECOMMENDATION	96
5.1 Conclusion	96
5.2 Recommendation	98
REFERENCES	99
APPENDIX A	105
APPENDIX B	112
CURRICULUM VITAE	136

LIST OF TABLES

Table	Page
2.1 The nutritional value of 100 g soybean	6
2.2 Comparative chemical analysis (g 100g ⁻¹) of soymilk and cow's milk	7
2.3 Typical composition of crude and refined soybean oil	9
2.4 Physiological and biochemical characteristics of <i>Bifidobacterium</i> spp. and <i>L. acidophilus</i>	15
2.5 Commercial products containing <i>Bifidobacterium</i> spp. and <i>Lactobacillus acidophilus</i>	17
2.6 The functional properties of fibersol-2 in its applications	23
2.7 The amounts of volume of hydrocolloids used by the U.S.A industries	27
4.1 Chemical properties of soymilk yogurt fermented with <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> or <i>L. acidophilus</i> at 43 ⁰ C for 42 h	52
4.2 Microbiological properties of soymilk yogurt fermented with <i>S. thermophilus</i> and <i>L. bulgaricus</i> and <i>B. bifidum</i> or <i>L. acidophilus</i> at 43 ⁰ C for 42 h	53
4.3 Chemical and microbiological properties of soymilk yogurt during storage at 4 ⁰ C for 21 days	56
4.4 Physical and chemical properties of soymilk yogurt during storage at 4 ⁰ C for 21 days.	57
4.5 The effect of experimental factors on the properties of soymilk yogurt added with <i>B. bifidum</i> based on a Plackett and Burman design	61
4.6 Major and minor experimental factors that affected the properties of soymilk yogurt added with <i>B. Bifidum</i> based on a Plackett and Burman design	63
4.7 The effect of experimental factors on the properties of soymilk yogurt added with <i>L. acidophilus</i> based on a Plackett and Burman design	64

LIST OF TABLES

Table	Page
4.8 Major and minor experimental factors that affected the properties of soymilk yogurt added with <i>L. acidophilus</i> based on a Plackett and Burman design	67
4.9 Suitable levels of major soymilk yogurt ingredients for soymilk yogurt added with <i>B. bifidum</i> using a 2 ³ Factorial experiment in center point	69
4.10 Optimal levels of soymilk yogurt ingredients for soymilk yogurt added with <i>B. bifidum</i>	70
4.11 Suitable levels of major soymilk yogurt ingredients for soymilk yogurt added with <i>L. acidophilus</i> using a 2 ² Factorial experiment in center point	71
4.12 Optimal levels of soymilk yogurt ingredients for soymilk yogurt added with <i>L. acidophilus</i>	71
4.13 Chemical and microbiological properties of soymilk yogurt added with <i>B. bifidum</i> and in the presence of 5 % (w/w) fibersol-2 during storage at 4 ⁰ C for 21 days	73
4.14 Physical and chemical properties of soymilk yogurt added with <i>B. bifidum</i> and in the presence of 5 % (w/v) fibersol-2 during storage at 4 ⁰ C for 21 days	74
4.15 Chemical and microbiological properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) Fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	76
4.16 Physical and chemical properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) Fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	77

LIST OF TABLES

Table	Page
4.17 Chemical and Microbiological properties of soymilk yogurt products from <i>B. bifidum</i> added Fructo-oligosaccharide during a storage at 4 ⁰ C for 21 day	80
4.18 Physical and chemical properties of soymilk yogurt added with <i>B. bifidum</i> and in the presence of 5% (w/v) Fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	81
4.19 Chemical and microbiological properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	83
4.20 Physical and chemical properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	84
4.21 Chemical and Microbiological properties of soymilk yogurt added with <i>B. bifidum</i> and in the presence of 5% (w/w) tomato extract during storage at 4 ⁰ C for 21 days	87
4.22 Physical and chemical properties of soymilk yogurt added with <i>B. bifidum</i> and in the presence of 5% (w/v) tomato extract during storage at 4 ⁰ C for 21 days	89
4.23 Reductions in the viable numbers of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> in soymilk yogurt added with different nutrient-compounds during storage at 4 ⁰ C for 21 days	90
4.24 Chemical and microbiological properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) tomato extract during storage at 4 ⁰ C for 21 days	92

LIST OF TABLES

Table		Page
4.25	Physical and chemical properties of soymilk yogurt added with <i>L. acidophilus</i> and in the presence of 5% (w/v) tomato extract during storage at 4 ⁰ C for 21 days	94
4.26	Reductions in the viable numbers of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>L. acidophilus</i> in soymilk yogurt added with different nutrient-compounds during storage at 4 ⁰ C for 21 days	95

LIST OF FIGURES

Figure	Page
4.1 The growth curve of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>L. acidophilus</i> (log CFU/ml) in soymilk yogurt during fermentation at 43 ⁰ C for 42 h.	54
4.2 The growth curve of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> (log CFU/ml) in soymilk yogurt during fermentation at 43 ⁰ C for 42 h.	55
4.3 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> (log CFU/ml) in soymilk yogurt added with fibersol-2 during storage at 4 ⁰ C for 21 days	74
4.4 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>L. acidophilus</i> (log CFU/ml) in soymilk yogurt added with fibersol-2 during storage at 4 ⁰ C for 21 days	77
4.5 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> (log CFU/ml) soymilk yogurt added with fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	81
4.6 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>L. acidophilus</i> (log CFU/ml) in soymilk yogurt added with fructo-oligosaccharide during storage at 4 ⁰ C for 21 days	85
4.7 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>B. bifidum</i> (log CFU/ml) in soymilk yogurt added with tomato extract during storage at 4 ⁰ C for 21 days	88
4.8 The number of <i>S. thermophilus</i> , <i>L. bulgaricus</i> and <i>L. acidophilus</i> (log CFU/ml) in soymilk yogurt added with tomato extract during storage at 4 ⁰ C for 21 days	91
