## ACKNOWLEDGEMENT

I would like to express my sincere gratitude to my advisor, Assistant Professor Dr. Pranee Leechanachai, for her valuable guidance, excellent advice and great kindness throughout this study.

I wish to extend my gratitude to Khun Rassamee Keawvichit for his advice, encouragement and support in the laboratory work, and my sincere thanks go to Khun Kumpian Khumnil for her advice, friendship, co-operation and excellent assistance.

I am grateful to Dr. Kriengsak Jitvacharanun, the Director of the Venereal Disease and AIDS Control Center, Region 10, Chiang Mai and his staff who supported this study by supplying the samples. I would also like to acknowledge the Research Institute for Health Sciences, Chiang Mai University for providing some instrument, materials and samples during the study.

I also thank the Department of Clinical Microbiology, Faculty of Associated Medical Sciences for their support in providing materials, instruments and a place to study.

Finally, I wish to give my sincere thanks to my husband and children for their love, understanding and encouragement throughout my study.

This work was supported by a research grant from the National Budget of Thailand 1999.
