#### **ACKNOWLEDGEMENT**

I wish to express my sincere gratitude and appreciation to Asst. Prof. Dr. Pranee Leechanachai, the thesis advisor, for giving me an opportunity to be her graduate student and for her excellent guidance, continuous suggestions and many encouragements throughout this study. This thesis would not have been completed without her support.

I wish to extend my deepest gratitude to Doctor Kriangsak Jitvatcharanon and the staff of the Sexually Transmitted Infections and AIDS Center 10 Chiang Mai for their excellent advice, valuable suggestions and providing specimens for the study.

I wish to express special thanks to Ms. Amara Yowang and the staff of the Regional Medical Sciences Center, Chiang Rai for their corroborations and providing of specimens. This thesis would not have been completed without their kindness. Moreover, I would like to thanks Miss Tanawan Samleerat and all the staff of the Division of Clinical Microbiology, Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University as well for their advice, friendship and co-operation.

I sincerely thank the Division of Clinical Microbiology, Department of Medical Technology, Faculty of Associated Medical Sciences, Chiang Mai University for permission to use all instruments and laboratories.

Finally, I would like to thank my parents and my special friends who never let me give up and always stayed by my side.
