CHAPTER I: INTRODUCTION

1.1 Statement and significance of the problem

1.2 Literature reviews

1.2.1 Immune system

1.2.1.1 Innate immunity

1.2.1.2 Adaptive immunity

1.2.1.2.1 Humoral mediated immunity (HMI)

1.2.1.2.2 Cellular mediated immunity (CMI)

1.2.2 Monoclonal antibody

1.2.2.1 Hybridoma technique

1.2.2.2 Preparation of immunogen

1.2.2.3 Immunization protocol

1.2.2.4 Screening for antibody production

1.2.2.5 Fusion and screening of hybridomas

1.2.3 Application of monoclonal antibodies

1.2.3.1 Research reagent
1.2.3.2 Diagnosis
1.2.3.3 Therapeutic applications
1.2.4 Principle of immunoprecipitation technique
1.2.5 Principle of COS cell expression system
1.2.6 Principle of the production of BCCP fusion protein
1.2.7 CD4 protein
1.3 Objective

CHAPTER II: MATERIALS AND METHODS

2.2 Preparation of immunogen
2.2.1 Immunoprecipitated-bead technique
   2.2.1.1 Biotinylation and preparation of cell lysates
   2.2.1.2 Preclearing of cell lysates
   2.2.1.3 Immunoprecipitation
   2.2.1.4 Chemiluminescence detection system
   2.2.1.5 Preparation of immunoprecipitate-beads for immunization
2.2.2 BCCP bead technique
   2.2.2.1 Amplification of CD4 gene by PCR
   2.2.2.2 Construction of plasmid encoding CD4-BCCP
2.2.2.3 Transformation
   2.2.2.4 Plasmid preparation by alkaline lysis method
2.2.2.5 Expression of biotinylated CD4-BCCP protein
2.2.2.6 Analysis of biotinylated CD4-BCCP protein
2.2.2.6.1 Detection of biotinylated CD4-BCCP protein by Indirect ELISA 47
2.2.2.6.2 Detection of biotinylated CD4-BCCP protein by Western blot 48
2.2.2.7 Magnetic sorting 49
2.2.3 CD4-COS cell expression technique 50
2.2.3.1 Plasmid DNA preparation 50
2.2.3.2 COS cell transfection 51
2.2.3.3 Determination of COS cells expressing CD4 proteins 51
2.2.3.4 Immunomagnetic cell sorting 52
2.3 Immunization 52
2.4 Determination of antibody response in the immunized mice 52
2.4.1 Indirect immunofluorescence staining 52
2.4.2 ELISA 53
2.5 Hybridoma productions 53
2.5.1 Preparation of splenocytes 53
2.5.2 Cells fusion 54
2.5.3 Hybridoma screening 54
2.5.3.1 Screening of hybridomas by indirect immunofluorescence analysis 54
2.5.3.2 Screening of hybridomas by ELISA 55
2.5.4 Limiting dilution 55
2.6 Characterizations of monoclonal antibodies 56
2.6.1 Characterization of anti-CD4 mAbs by Western blotting 56
2.6.2 Determination of isotypes of monoclonal antibodies 56
2.6.3 Immunoprecipitation 57
2.6.4 Enumeration of the percentage of CD4 cells in peripheral blood lymphocytes 57

CHAPTER III: RESULTS 59

3.1 Immunogen preparation 59
  3.1.1 Immunoprecipitated-beads technique 59
  3.1.2 CD4-BCCP beads technique 62
    3.1.2.1 Amplification of CD4 coding region 62
    3.1.2.2 Expression of biotinylated CD4-BCCP protein 66
    3.1.2.3 Determination of biotinylated CD4-BCCP 68
    3.1.2.3.1 Determination of biotinylated CD4-BCCP by indirect ELISA 68
    3.1.2.3.2 Determination of biotinylated CD4-BCCP by Western immunoblotting 70
  3.1.2.4 Preparation of CD4-BCCP beads 71
  3.1.3 CD4-COS cell expression technique 75
    3.1.3.1 Preparation of CD4 DNA 75
    3.1.3.2 Preparation of COS cell expressing CD4 protein 77
3.2 Mouse immunization 79
3.3 Hybridoma productions 87
3.4 Characterization of the generated monoclonal antibodies 92
3.4.1 Specificity of generated monoclonal antibodies characterization 92
3.4.2 Characterization of the generated anti-CD4 mAbs by Western
immunoblotting and immunoprecipitation 95
3.4.2.1 Western immunoblotting 94
3.4.2.2 Immunoprecipitation 97
3.4.3 Determination of isotype of the generated monoclonal antibodies 99
3.4.4 Enumeration of the percentage of CD4⁺ cells in peripheral blood lymphocytes by using the generated CD4 mAbs 101

3.12 Immunofluorescence analysis showing expression of CD4 protein in transfected COS cells

3.13 Analysis of antibody responses in mice sera immunized with CD4-BCCP beads

3.14 Determination of antibody responses in mice sera after immunization

3.15 Immunofluorescence analysis of CD4 antibodies in sera of CD4 immunoprecipitated beads immunization

3.16 Immunofluorescence analysis of CD4 antibodies in sera of CD4-BCCP immunization

3.17 Immunofluorescence analysis of CD4 antibodies in sera of CD4-COS cell immunization

3.18 Immunofluorescence of CD4 transfected COS cells with CD4 mAb MT4

3.19 Determination of CD4 antibody titer in sera of the immunized mice

3.20 ELISA analysis of the reactivity of mAb CD4-BCCP-1

3.21 Immunofluorescence analysis of specificity of generated monoclonal antibodies

3.22 Immunoprecipitation of CD4 protein from PBMCs using the generated CD4 mAbs

3.23 Determination of the isotype of the generated monoclonal antibodies
ABBREVIATIONS

Ab  antibody
APS  ammonium persulphate
BSA  bovine serum albumin
BCCP  biotin carboxyl carrier protein
°C  degree Celcius
CD  cluster of differentiation
cDNA  complementary deoxyribonucleic acid
CMI  cell-mediated immunity
DEAE-Dextran  diethylaminoethyl-Dextran
DMSO  dimethyl sulfoxide
DNA  deoxyribonucleic acid
EDTA  ethylene diamine tetraacetic acid
ELISA  enzyme-linked immunosorbent assay
EtBr  ethidium bromide
FCS  fetal calf serum
FITC  fluorescein isothiocyanate
g  gram or gravity
HAT  hypoxanthine aminopterin and thymidine
HGPRT  hypoxanthine guanine phosphoribosyltransferase
HMI  humoral-mediated immunity
Ig  immunoglobulin
IgG  immunoglobulin G
