ACKNOWLEDGEMENT

I would like to express my sincerely gratitude, many helpful suggestions, and appreciation to my thesis advisor, Dr. Nuanlaor Thawinchai for her valuable guidance, recommendations, and encouragement throughout this thesis process. Also, I would like to express great thanks to Assoc. Prof. Dr. Jonjin Ratanapinunchai and Asst. Prof. Dr. Saipin Prasertsukdee for their valuable suggestions and helpful advice.

I would like to express great thanks to the Faculty of Associated Medical Sciences and the Graduate School, Chiang Mai University for their research grants and Srisangwan Chiang Mai School for collected data location.

I would like to express great thanks to all the participants who were willing to participate from the beginning to the end of my research.

I would like to give my appreciation and many thanks to all of my friends Ms. Panida Hanphithakphong and Mr. Eakarach Wongsaya for their help as well as all my Masters degree classmates for their help and warm friendship.

Finally, I would like to express my gratitude to my parents and my younger sister for their love and warm encouragement throughout my thesis study.
