## ACKNOWLEDGEMENT

I would like to express my deep appreciation to my advisor, Assistant Professor Dhirawat Jotikasthira and my associate advisors, Dr.Suttichai Krisanaprakornkit and Associated Professor Samreung Rangdaeng for their directions, generous supports, encouragement and valuable advice throughout the graduate work and research. I am also grateful to Dr.Peerasak Malikaew for valuable advice of statistical analyses and Lecturer Amphol Wongjamras, Department of Physics, Faculty of Science, for his advice and assistance in magnetic field measurement procedures.

I would like to thank the staff of Medical Science Research Equipment Center, Faculty of Medicine for their helpful supports and Miss Weena Panichakul for her partnership and encouragement throughout this research.

My deepest thanks extend to my parents and my brothers for their unending love and valuable support, which enabled me to complete this work.

Funds for this research were provided in part by Assistant Professor Dhirawat Jotikasthira, Lecturer Somchai Duangtaweesub, Faculty of Dentistry, The King Prajadhipok and Queen Rambai Barni Memorial Foundation, Thai Association of Orthodontists, and Graduate School of Chiang Mai University.

Siriporn Luewitooonwechkit
