ACKNOWLEDGEMENTS

I would like to express my sincere thanks for my advisor, Associate Professor Virush Patanaporn, for his initial encouragement in directing me towards this research project, a proof of this thesis and valuable advice throughout the study.

I also would like to thanks my co-advisors, Instructor Narumanus Korwanich, for his helpful guidance in statistic analysis and encouragement of this study. I am grateful to Dr. Apirum Janhom for her assistance and suggestion in radiographic measurement.

My sincere appreciation is expressed to Instructor Janya Apisariyakul for her help in this field of research and valuable assistance throughout this study.

I would like to thank all of the orthodontists who had collected the patient's records and finished the coursed of orthodontic treatment. I also thank all of the patients who were subjects of this project.

My special thanks are also extended to all staffs of the Department of Orthodontics, Faculty of Dentistry, Chiang Mai University for their suggestion. I would like to express my appreciation to my friends, Sarinporn Torut, Imjai Intachai and Sirinan Aranyawongsakorn, who have supported me.

With love and respect on my mind, I would like to dedicate my thesis to my parents who always teach me that perseverance is necessary to overcome obstacles in life.
