

## TABLE OF CONTENTS

	Page
<b>ACKNOWLEDGEMENTS</b>	iii
<b>ABSTRACT (THAI)</b>	v
<b>ABSTRACT (ENGLISH)</b>	vii
<b>LIST OF TABLES</b>	xii
<b>LIST OF FIGURES</b>	xiii
<b>CHAPTER I INTRODUCTION</b>	1
Purpose of the study	3
Scope of the study	3
<b>CHAPTER II LITERATURE REVIEW</b>	4
Types of light curing unit	6
Factors affecting an efficiency of photo-polymerization	10
<b>CHAPTER III MATERIALS AND METHODS</b>	14
I. Materials	14
II. Instruments	17
III. Methods	22
1. Shear bond strength testing	22
2. Adhesive remnant evaluation	34
3. Statistical analysis	35
<b>CHAPTER IV RESULTS</b>	37

	<b>Page</b>
I. The shear bond strength in each group by means, standard deviations (SD) and ranges (min – max)	37
II. The comparison of mean shear bond strength in each group by analysis of variance and the multiple comparisons test	38
III. The analysis of adhesive remnant index scores by Kruskal Wallis test and frequency	41
<b>CHAPTER V DISCUSSION</b>	42
I. Discussion of the results of the study	43
1. Shear bond strength values	43
2. Site of adhesive failure	48
II. Discussion of the materials and methods in the study	49
1. Varieties of the samples	49
2. Method of shear bond strength testing	50
Limitation of the research	51
<b>CHAPTER VI CONCLUSIONS</b>	53
Further recommendations	53
<b>BIBLIOGRAPHY</b>	54
<b>APPENDICES</b>	60
Appendix A	61
Appendix B	63
Appendix C	64
Appendix D	66

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1 Sample distributions in seven groups	14
2 Curing times for each group	28
3 Means, standard deviations and ranges of shear bond strengths in each group	37
4 Results of Analysis of Variance (ANOVA) of mean shear bond strength	39
5 Statistical comparisons of mean shear bond strength using Tukey's test	39
6 Statistical significant differences of mean shear bond strength using Tukey's test	40
7 Results of the Kruskal Wallis test for the adhesive remnant index scores	41
8 Frequencies of adhesive remnant index scores (percentages in parentheses)	41
9 Previous studies about curing time reduction for bonding orthodontic stainless steel brackets	45
10 Test of normality of the shear bond strength values	61
11 Test of Homogeneity of Variance of the shear bond strength values	63
12 The raw data of shear bond strength in each group	64
13 The raw data of adhesive remnant index scores in each group	66

## LIST OF FIGURES

<b>Figure</b>	<b>Page</b>
1 Spectral emission of QTH lamp and camphorquinone absorbance	7
2 Spectral emission of plasma arc light	8
3 Spectral emission of argon laser and camphorquinone absorbance	9
4 Spectral emission of a blue light emitting diode	10
5 a Adhesive coated premolar bracket	15
5 b Base of bracket	15
5 c Bracket base pre-coated with adhesives	15
6 Transbond™ Plus Self Etching Primer	16
7 Distilled water	16
8 Mini LED™ light curing unit	17
9 Spectrum 800 conventional halogen curing unit	18
10 Incubator	18
11 Thermocycling machine	19
12 a Instron® universal testing machine	20
12 b One kilo-Newton load cell	20
13 De-bonding plate	21
14 Mounting jig	21
15 Each tooth was sectioned to separate the root from the crown	22
16 Tooth sample embedded in clay block	23

<b>Figure</b>	<b>Page</b>
17 Pressing the first reservoir of the adhesive package	24
18 Folding the first reservoir, and pressing the first and second reservoirs	24
19 Stainless steel wire with 4 mm protrusions marked in black ink	25
20 Marked stainless steel wire in bracket slot	26
21 Placing light guide-tip using marked wire	26
22 Checking light intensity for Mini L.E.D™ light curing unit	27
23 a Checking light intensity for Spectrum 800 halogen curing unit	28
23 b The screen showed intensity of the light	28
24 Sample held in a polyvinylchloride ring with a 0.016 x 0.022 inch stainless steel wire, tied with an elastomeric ligature on a 2-mm plastic plate and fixed with adhesive tape	30
25 Tooth embedded in polyvinylchloride ring with self-cured acrylic resin	31
26 Compositions and position of Instron® universal testing machine during shear bond strength testing	32
27 Polyvinylchloride ring mounted into mounting jig attached to the lower pneumatic grip with de-bonding plate attached to the upper pneumatic grip	33
28 Position of de-bonding plate and tooth-bracket assembly in acrylic block ready for shear bond strength testing	33
29 Schematic diagram of force direction for shear bond strength testing	34
30 Superimposition of the bracket base on a grid	35
31 Graph of mean shear bond strength in each group	38
32 Box plot of data of shear bond strength values	62
