ACKNOWLEDGEMENTS

I would like to express my profound gratitude and appreciation to my advisor, Associate Professor Dhirawat Jotikasthira for his excellent guidance and continuous support. Without his support and encouragement, this thesis would not have been successfully achieved.

I am deeply grateful to Associate Professor Dr. Suttichai Krisanapakornkit for his valuable advices, comments, and suggestions relating to thesis writing.

I also extend my thankfulness to my co-advisor Associate Professor Dr. Prachya Kongtawelert and Assistant Professor Dr. Siriwan Ong-chai for providing useful suggestions and comments in result interpretation and WF6 analyses.

My sincere appreciation is extended to Mr. Akanit Itthiarbha for his assistance, experience and skilful supervision in WF6 analysis. I wish to express my gratitude to the Department of Biochemistry, Faculty of Medicine, and the Dental Research Center, Faculty of Dentistry, Chiang Mai University, for providing equipment and workplace.

My special thanks are also extended to all staff of the Department of Orthodontics, Faculty of Dentistry, Chiang Mai University, for their suggestions and support. I would like to express my appreciation to Mrs. Anjan Peeranantangsri for her shared advice, assistance, and good cooperation throughout the study. In addition, I gratefully acknowledge all of the patients for their patience and cooperation to participate throughout the project.

Ultimately, I am greatly indebted to my parents for their support and encouragement. With everlasting love and respect, I dedicate this thesis to my parents, who always love and inspire my life.
