Abstract

This Independent study, Garbage Collection Cost of Chiang Mai Municipality, used the following secondary data : the statistics of population and household according to civil registration, the amount of garbage collected, and the garbage collection expense budget of Chiang Mai Municipality between 1992-1996,. The purpose was to find out the garbage collection cost of Chiang Mai Municipality.

The result showed that, one person produced 1.54 cubic meters of garbage per year. One household produced 4.12 cubic meters of garbage per year. And, the garbage collection cost of Chiang Mai Municipality, was 161.18 baht per cubic meter per year.
