This work would not have been possible without the support and encouragement of Professor Dr. Daniel Schoch, under whose supervision I chose this topic and began the theory thesis. Professor Daniel Schoch, my advisor in the final stages of the work, has been abundantly helpful, and has assigned me in the numerous ways, by instructing me the right track how to proceed my theory thesis in order to develop my own contribution. I would also like to thank my thesis examining committee, Professor Dr. Peter Calkins, Lecturer. Dr. Prapatchon Jariyapan and Assistant Professor Dr. Anchalee Jengialern, for giving me the most precious advices, comments and suggestions on my thesis.

I would also like to thank Heinrich Boell Foundation, which has supported me during my two years of study, especially Dr Hiker and Olga, for giving the most trust worthiness to me and encouraging me in every steps of my work.

I cannot end without thanking my father, U Myo Myint, and my mother, Daw Khin Lay, on whose constant encouragement and enormous love I have relied throughout my time at the Academy. Unflinching courage and conviction of my parents will always inspire me, and I hope to continue, in my own small way, the noble mission to which they gave their lives. It is to them that I dedicate this work.
