ACKNOWLEDGEMENTS

First of all, I would like to express my most grateful thanks to Professor Dr. Peter H. Calkins, my thesis supervisor, who has given a great amount of support and encouragement to me during my thesis writing process. At the same time, this work would not have been possible without the support and encouragement of Associate Professor Dr. Songsak Sriboonchitta who provided technical support to help me finish two papers as a part of my thesis.

Secondly, I would like to give my sincere thanks to my thesis examining committee. I am grateful to Dr. Pisit Leeahtam for giving me the most precious advice on my thesis and valuable comments for further studies as well. Furthermore, my thanks are also extended to Professor Dr. Hung T. Nguyen , who is a technical expert and one of my thesis advisory committee members. He gave suggestions in detail for the methodological part in my thesis. My sincere thanks go to Associate Professor Dr. Kanchana Chokethaworn who is another one of my thesis committee members and who gave me suggestions about thesis formatting which was important for finishing the thesis successfully. I owe my sincere gratitude to Professor Aree Wiboonpongse , Faculty of Agriculture ,Chiang Mai University , who provided her crucial contributions and comments throughout my writing on two academic papers . I have furthermore to thank Assoc. Prof. Sasipen Phuangsaichai for her time and invaluable comments on my first academic paper. Deepest thanks to all my teachers for their efforts to bring me up to this level of knowledge.

I cannot finish without thanking U Myo Myint, Director General, Department of Development Affairs, Ministry for Progress of Border Area and National Races and Development Affairs , who gave me a favour by helping me to obtain both households and firms surveys from Mawlamyine, Myanmar. I also would like to thank the officials who helped me in Mon State and Mawlamyine Township Development Committee during my surveys. The data and survey implementation would not be complete without their willing assistance. Furthermore , I offer my regards to Daw Thynn Thynn Myint (Lecturer , Department of Management Studies , Yangon Institute of Economics, Myanmar) who is taking care of my mother while I am studying here. I would like to extend my sincere thanks to my lovely friends in Chiang Mai University for our brother-and sister-hood life which could not be forgotten in any reasons .

Thirdly, my earnest thanks go to the Thailand Research Fund, which has supported me during my four years of study. I am especially grateful to Dr. Pisit Leeahtam and Associate Professor Dr. Songsak Sribonchitta for their warm support with some important decisions leading to the success of the thesis. I would like to thank the administrative staffs in the Faculty of Economics, Chiang Mai University who have always given me kind support during my study. I would also like to thank Thabyay Foundation which has granted me supplemental expenses for my field survey and some necessary expenses for proposal and thesis preparation.

Lastly and most importantly, I cannot end without thanking my mother, Daw Htay Htay , on whose continuous support and enormous love I have relied throughout my time overseas. Without her emotional and moral support, I might not be strong

enough to take the further steps for my work and in every aspect throughout my life. Besides my lovely mother, I extend my gratitude to uncle U Nyan Myint who had given me a financial and moral support to get my first degree .

Beyond the names mentioned here, there have been numerous people who have helped me during my thesis research and writing. It is difficult to name everyone individually, yet for everybody whose names are not listed here, I offer you my deepest thanks. To them I dedicate this thesis. I am responsible for any mistaken , incorrect elements that this dissertation may have.
