List of Figures		xvi
Chapter 1	Introduction	
1.1	Statement of the Problem and the Significant of the Study	1
1.2	Objectives of the Study	3
1.3	Policy Relevance	4
1.4	Structure of the Dissertation	5
Chapter 2	Review of Literature and Conceptual Framework	
2.1	Literature Review	7
2.1.1.	Standard Macroeconomic Theory	7
2.1.2.	Literature on the Miracle of Growth	9
2.1.3.	Literature on the Determinants of Output	10
2.1.4.	Sufficiency Economy Philosophy	17
2.1.5.	Determinant of Level of Development	18
2.2	Conceptual Framework	20
Chapter 3	Research Methodology	
3.1.	Research Design	22
3.2.	Research Hypotheses	28
3.3.	Data and Sample Selection	30

3.4. Data Analysis Methods 34
3.4.1. Panel Unit Root Test 35
3.4.2. Panel Cointegration Test 43
3.4.3. Estimation Methodology 48
3.4.4. Panel Vector Error Correction Model 52
3.4.5. Panel Sample Selection with Copula Approach 53

Chapter 4 Dynamic Causal Relationships among Macroeconomic Variables in Developing Economies: A Panel Co-Integration/Vector Correction Approach
4.1. Introduction 71
4.2 Empirical results
4.2.1. The empirical results of the panel unit root test 72
4.2.2. The empirical results of panel cointegration test 74
4.2.3. The empirical results of estimating panel cointegration model 75
4.2.4. The empirical results of the panel vector error correction model 78
4.3 Conclusion 82

Chapter 5 An Eleven-Region Test of the Economic and Socio-Political Determinants of Economic Growth: Is Standard Macro Theory Adequate?
5.1. Introduction 85
5.2. Data and Model specification 87
5.3. Results
5.3.1. The empirical results of the panel unit root test 88
5.3.2. The empirical results of panel cointegration test 91
5.3.3. Estimation Results 93
5.4. Concluding remarks 106

Chapter 6 Factors Affecting Economic Growth in Developed Countries: A Copula Approach to Sample Selection with Panel Data

6.1. Introduction 109
6.2. Data 111
6.3. Results
6.3.1. The empirical results of the panel unit root test 113
6.3.2. The empirical results of panel cointegration test 116
6.3.3. Estimation Results 116
6.4. Conclusion 123

Chapter 7 Conclusion

7.1 Summary and Conclusion 124
7.2 Further Studies and Extension of the Research 127

References 128

Appendices

Appendix A 143
Appendix B 168

LIST OF TABLES

Table		Page
3.1	List of countries by region	31
3.2	Descriptive Statistics of 95 developing countries	32
3.3	Descriptive Statistics of 22 developed countries	33
3.4	Examples of families of bivariate Archimedean copulas.	66
3.5	Expressions for $1-\frac{\varphi'(F_\varepsilon)}{\varphi'(C_\theta)}$	69
4.1	Results of Panel Unit root test base on 6 method test for all variables	73
4.2	Results of Panel Unit root test base on the 6 method tests at first differences	74
4.3	Pedroni's (2004) and Kao(1999) and panel cointegration test	75
4.4	Pool-OLS, Panel OLS and DOLS estimates	76
4.5	Result from GMM-estimate	78
4.6	Panel vector error correction model	79
5.1	Number of countries by region	87
5.2	Results of Panel Unit root test base on 6 method test for all variables	89
5.3	Results of Panel Unit root test base on the 6 method tests at first differences	90
5.4	Pedroni's (2004) and Kao (1999) for panel cointegration test for standard macroeconomic model	91
5.5	Kao(1999) for panel cointegration test for sufficiency economy inspiral model	92
5.6	Model 1 FEM estimation results	94
5.7	Model 2 (standard macroeconomic model with 10 dummy intercept shifters)	95
5.8	Model 3 (standard macroeconomic model with regional slope shifters)	96

5.9	FEM estimation results for macroeconomic, social and political variables	98
5.10	Model 4 (sufficiency economy inspired model)	100
5.11	Comparative summary between the regionally-extended standard macroeconomic and sufficiency economy inspired models	101
5.12	Policy matrix of significant elasticities by region in the sufficiency-inspired model.	103
6.1	Descriptive Statistics	112
6.2	Results of Panel Unit root test base on 6 method test for all variables	114
6.3	Results of Panel Unit root test base on the 6 method tests at first differences	115
6.4	Kao (1999) for panel cointegration test	116
6.5	OLS regression without controls for selection bias	118
6.6	Estimates of BVN and Archimedean Families of Copula	121
