ENGLISH ABSTRACT	v
THAI ABSTRACT	vi
LIST OF TABLES	ix
LIST OF ILLUSTRATIONS	x
LIST OF ABBREVIATION	xii
CHAPTER I INTRODUCTION	1
Objective	4
CHAPTER II LITERATURE REVIEW	5
Anatomy of horse back	
Function and Movement of back	16
The Saddle Fitting	19
Pain in animal	20
Examination of the back	22
Convention treatment back pain	24
Traditional Chinese Veterinary Medicine concept	26
Scientific concepts of Acupuncture	27

CHAPTER III PRELIMINARY STUDY	41
CHAPTER IV MATERIALS AND METHODS	47
Subjects	47
Materials	48
Methods	49
Statistical analysis	56
CHAPTER V RESULTS	57
Demographics of Subjects	57
Main result	58
CHAPTER VI DISCUSSION	60
CHAPTER VII LIMITAION AND FUTURE RESEARCH	63
CHAPTER VIII CONCLUSION	64
REFERENCES	65
CURRICULUM VITA	69

LIST OF TABLES

Table	Page
2.1 Acupuncture points in terms of number, name and location	34
3.1 Percent of back pain in each riding club	43
3.2 Descriptive data of pressure pain level of back pain and non back pain groups	46
4.1 Name of acupuncture points, the location of points and the needling depth in this study	55
5.1 Reason for dropped out subjects	57
5.2 Comparison of level of pain pressure between pre and post treatment in each group	59
5.3 A comparison of changes in pain pressure between the rest and the EA group	59

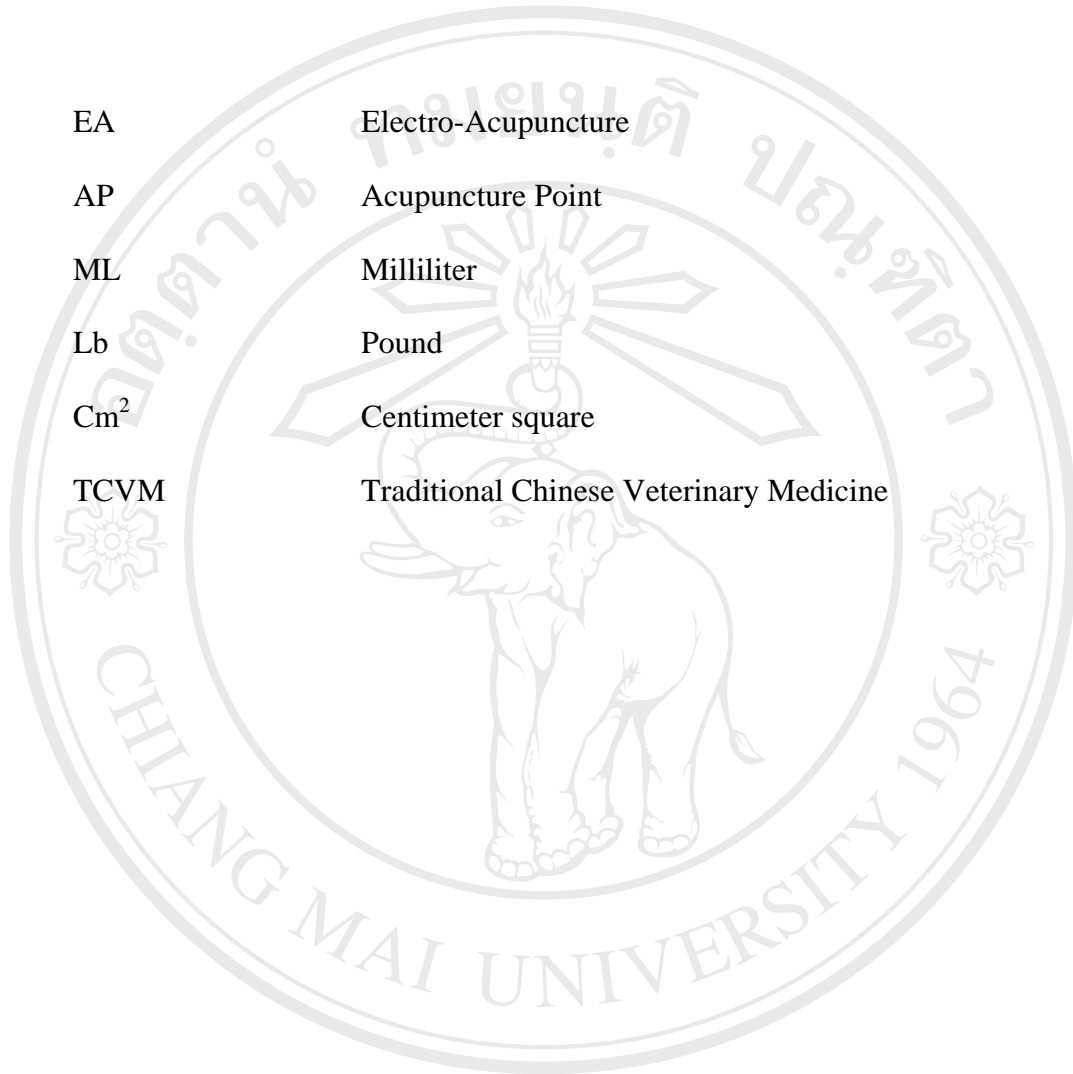

LIST OF ILLUSTRATIONS

Figure	Page
2.1 The good back	6
2.2 Long back	6
2.3 Roach back	7
2.4 Hollow back	7
2.5 The lumbosacral joint function:(a) in standing position (b) during gallop	9
2.6 a. Lowering the neck places the ligaments under tension, separates the thoracic spinous process and flexes the thoracic spine	11
2.6 b. Raising the neck causes cervico-thoracic extension, relaxes the ligaments, brings the spinous processes back together and extends the thoracic spine	11
2.7 Muscle of the neck and trunks: superficial layer	12
2.8 a. Muscle of the neck and trunk middle layer lateral view	12
2.8 b. Muscle of the neck and trunk: dorsal view	13
2.9 Transverse section at the T8 vertebral region	13
2.10 Muscle of the neck and trunk deep layer	14
2.11 Transverse section at the T18 vertebral region	15
2.12 Flexors of the vertebral column	16
2.13 Muscles responsible for extension of the vertebral column	17

2.14 Muscle responsible for vertebral lateroflexion	18
2.15 Acupuncture and pathway	30
2.16 Histologic structure of bundle perforating the fascia at acupuncture points. A, Artery; E. epineurium; N, nerve; V, vein.	31
2.17 Cutaneous nerve entering the dermis at an acupuncture point along the Bladder meridian	32
2.18 Acupuncture points of the horse, lateral view in relation to muscle	33
4.1 The equipment for this study	49
4.2 The experimented veterinarian check back by palpation	50
4.3 Acupuncturist TCVM checks along the back at bladder meridian	51
4.4 Experienced physiotherapist evaluated the level of pain by using pressure algrometer	51
4.5 Horse rest group received placebo treatment. The needle attached with glue that with out penetrate to skin	52
4.6 a. Horse was penetrate acupuncture needle at acupuncture point BL 17	53
4.6 b. The needles were hooked together through electrode and were called a set.	53
4.7 The horse was electrical administrated for 30 minutes	54
4.8 Acupuncture points used in this study	55

LIST OF ABBREVIATIONS

EA	Electro-Acupuncture
AP	Acupuncture Point
ML	Milliliter
Lb	Pound
Cm ²	Centimeter square
TCVM	Traditional Chinese Veterinary Medicine
