ACKNOWLEDGEMENT

I would like to thank Dr. Tri Indrarini Wirjantoro for her continuous and great support, assistance, encouragement and guidance from the beginning through the final step of my study. Good advices were given by her for the problems that occurred in my study and my work place. Without her supports, suggestion and correction, this IS would not be completed. It was a great pleasure to work with you, my lovely advisor. I stated my honest admiration to Asst. Prof.Dr. Aphirak Phianmongkhol for valuable assistance and suggestion that have shown a profoundly positive impact on positive thinking, enthusiasm and provide the opportunity to publish my results. I would also like to thank Asst. Prof. Dr. Suthaya Phimphilai for her help, suggestion and words of encouragement.

I was grateful to my colleagues and friends, whom I met at STSC-CMU, Department of Biochemistry and Food Science and Technology at Chiang Mai University. Finally, my deepest gratitude and love go to my parents, Banyen and Worn Sangnark; my grandma and my aunt, Fai and Kanlaya Srisangwan and my younger brother, Banyad Sangnark, who believed in me, encouraged and unconditionally supported me at all stages of my study and provided me with delicious food and all financial support. I would like to thanks Patapat Chaiprom for your supports, patience and put a smile on my face. I would love to thanks Buddha for creating me as the lucky person, who has such as a nice lovely family and friends.

Benjamas Sangnark
