Independent Study Title Factors Influencing Recidivism for Drug Offenses of Chiang Mai Central Prison Inmates

Author Ms. Nuchanath Mukura

Degree Master of Public Administration

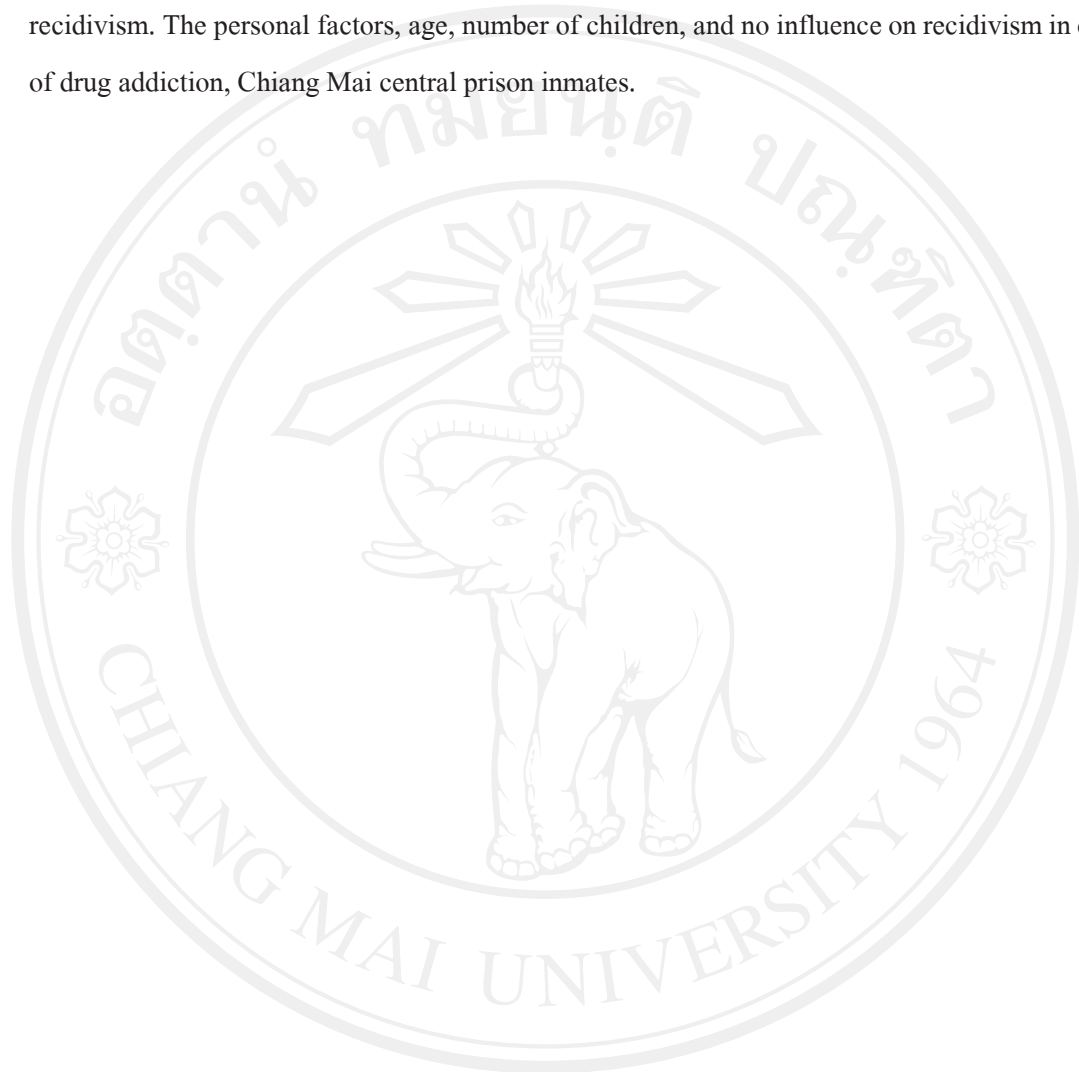

Independent Study Advisor Associate Professor Seksin Sriwattananukulkij

ABSTRACT

The study entitled “Factors Influencing Recidivism for Drug Offenses of Chiang Mai Central Prison Inmates” has two objectives. The first is to study factors influencing recidivism for drug offenses of Chiang Mai central prison inmates by analysis of each side, including personal factors, environmental factors and personality factors. The second is to study recommendations and solutions of factors influencing recidivism for drug offenses of Chiang Mai central prison inmates on male prisoners offenders under the drugs act to blame and recidivism than 2 times greater, and imprisoned in the Chiang Mai central prison inmates. the sampling of prisoners recidivism in drug cases out of 470 people (B.E. 2553). Calculated using the formula for determining Yamane sample was sample a total of 216 samples.

The study was based on quantitative sampling methodology in order to collect data from 216 prisoners recidivism in drug cases at Chiang Mai central prison inmates. The study results showed the factors influencing the action recidivism in cases of drug addiction, Chiang Mai central prison inmates are from environmental factors such as the family Community, social and economic union any friends. All result in recidivism in drug cases. If the lack of family warmth, lack of attentive parenting is easy to be motivated by a group of people associated with drugs. Including the economic union, as well as friends of the environment, social and community when prisoners come out penalty and then be faced with the problem in terms of mental state. Anxiety, fear that society will not be accepted and not because the problem of unemployment, rejected by the workplace. The lack of income to feed themselves and their families to have a

negative impact to make sure enough recidivism. Personality factors also influence recidivism in drug cases as well. The only personal factors, education, occupation and income, influence recidivism. The personal factors, age, number of children, and no influence on recidivism in cases of drug addiction, Chiang Mai central prison inmates.
