ACKNOWLEDGMENT

The author would like to express his sincere gratitude and profound appreciation to his supervisor and the Chairman of the Examining Committee, Dr. Methi Ekasingh, for his invaluable guidance, encouragement and stimulating suggestions throughout the study that enabled him to complete this thesis.

Sincere appreciation, gratitude and respects are also due to the members of the Examining Committee, Assist. Prof. Dr. Aree Wiboonpongse for her guidance on the data collection, her suggestions and comments on thesis writing and editing; Assist. Prof. Dr. Manee Nikornpun for her kind help and valuable suggestions from the application for admission to the completion of the thesis; Assoc. Prof. Dr. Paibool Wivutvongvana for his keen interest and comments on thesis editing.

Sincere thanks go to Dean Nakorn Na Lampang of the Faculty of Agriculture; Ajarn Prek Gypmantisiri, associate director of the Multiple Cropping Center (MCC); Dr. Benjavan Rerkasem, Chairwoman of Agricultural Systems; all the teaching staff of the Agricultural Systems (AGS) Program for sharing their knowledge and experiences.

Officers and staff of MCC provided various forms of assistance too many to recount. In particular, Mr. Chanchai Sangchyosawat for statistic and computer data management; Khun Nuansi and Khun Pong for their help during the study and family affairs.

Thanks are also extended to Dr. Ratana Attabhanyo for her guidance and help, and Miss Montana Pavitranong for her co-operation on the quality analysis of tomato fruits; Ajarn Pipob Lumyong for his suggestions on field management; Mr. Jaturong Puangmanee and Mr. Sithichai Lodkaew for their help on field management and the laboratorial work; Ajarn Lakkana Dumkhom in the Faculty of Humanity for her editing the manuscript.

Sincerest thanks are likewise due to Rockefeller Brother Foundation for granting the author scholarship through the Faculty of Agriculture, Chiang Mai University, and to Yunnan Academy of Agricultural Science, China for granting his study leave.

To his colleagues & fellow students in the Agricultural Systems Program, the author owes thanks for their genuine kindness and friendship through his study and with family affairs. Those especially worthy of mention are Miss Wawta, Miss Suporn, Mr. Thongma, Miss Nara and Miss Marcia.

Finally, special gratitude belongs to his wife, Songka and daughter Mao Mao whose love, patience and understanding provided him the inspiration and encouragement to pursue his graduate study at Chiang Mai University in Thailand.
