

## TABLE OF CONTENTS

	Page
ACKNOWLEDGMENT	i
ABSTRACT	iii
THAI ABSTRACT	vi
TABLE OF CONTENTS	viii
LIST OF TABLES	x
LIST OF FIGURES	xii
LIST OF APPENDIX TABLES	xiii
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEW	6
2.1. Effects of plant density on tomato	6
2.2. Effects of fertilizers on tomato	7
2.3. Effects of staking on tomato	10
CHAPTER 3 MATERIALS AND METHODS	12
3.1. Problem identification	12
3.1.1. Secondary data analysis	12
3.1.2. Exploratory survey	12
3.1.3. Formal survey	13
3.2. Field experiment	13
3.2.1. Site, treatment, sowing and transplanting	13
3.3. Sampling	18
3.3.1. Yield	18
3.3.2. Average fruit weight	18
3.3.3. Number of fruits per plant	19
3.3.4. Yield per plant	19
3.3.5. Fruit quality analysis	19
3.3.6. Determination of K, Ca and Mg in plant leaves	21
CHAPTER 4 RESULTS	23
4.1. Farmers' practices in tomato production	23
4.1.1. Plant density and yield	23
4.1.2. Fertilizer application	23
4.1.3. Staking cultivation	24
4.2. Experimental results	25
4.2.1. Marketable yield	25
4.2.2. Unmarketable yield	26
4.2.3. Number of fruits per plant	27

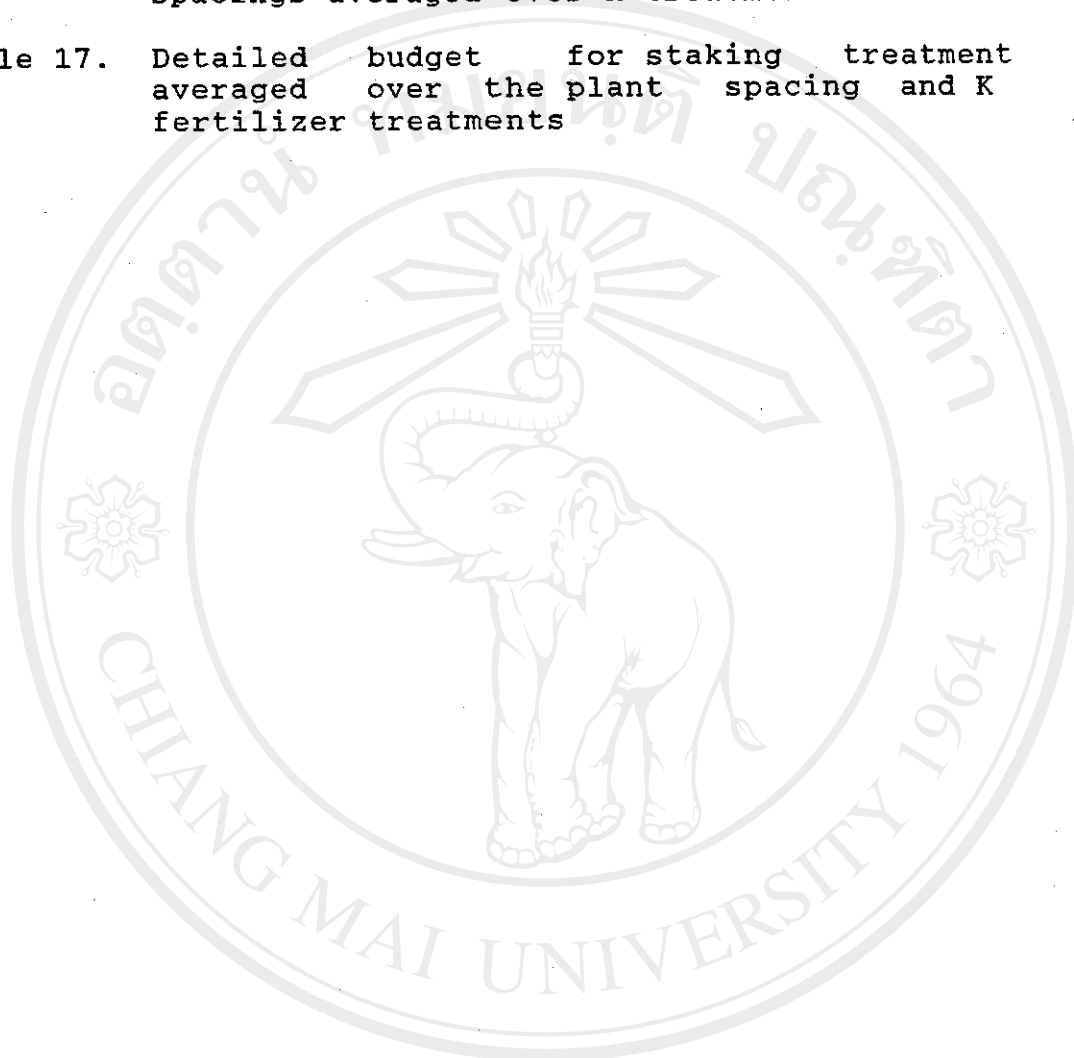

4.2.4. Average fruit weight	29
4.2.5. The yield per plant	29
4.2.6. Total acidity	31
4.2.7. Total solids	31
4.2.8. Soluble solid	32
4.2.9. pH value	34
4.2.10. Fruit color and pulp color	35
4.3. Results of plant nutrition analysis	37
4.3.1. Nutrition contents in tomato leaves	37
4.3.1.1. Potassium	37
4.3.1.2. Calcium and Magnesium	37
4.3.2. Relations between nutrient uptake and the total yield	38
4.3.3. Potassium residual in the soil	39
<b>CHAPTER 5 DISCUSSION</b>	<b>40</b>
5.1. Contributions of staking, plant spacing and potassium to the yield and the yield components	40
5.2. Processing quality	43
5.3. Economic consideration	45
<b>CHAPTER 6 CONCLUSION AND RECOMMENDATION</b>	<b>49</b>
<b>REFERENCES</b>	<b>51</b>
<b>APPENDIX</b>	<b>55</b>
Appendix A. Layout of experimental field	56
Appendix B. Analysis of variance tables	57
Appendix C. The original data for analysis of variance	65
Appendix D. The procedure of preparation of stock solution by dry ashing method	81
Appendix E. Questionnaires for the interview of farmers' management practices	82
<b>Curriculum Vitae</b>	<b>94</b>

## LIST OF TABLES

Table 1.	The physical and chemical characteristics of soil in the experimental fields	15
Table 2.	The population and yield of tomato in the farmers' fields	23
Table 3.	Fertilizer application in farmers' fields	24
Table 4.	Effects of staking and plant density on marketable yield averaged over the K fertilizer treatments	26
Table 5.	The effects of staking on the unmarketable yield of tomato averaged over density and K fertilizer treatments	26
Table 6.	Effects of plant spacing and K fertilizer on the number of fruits per plant averaged over the staking treatments	28
Table 7.	Effects of plant spacing on fruit weight averaged over the staking and K fertilizer treatments	29
Table 8.	Effects of plant spacing on the yield per plant averaged over staking and K fertilizer treatments	30
Table 9.	The effects of K fertilizer on the total acidity of tomato averaged over the staking and density treatments	31
Table 10.	Effects of staking, and K fertilizer on the total solids (%) of tomato averaged over the plant spacing treatment	32
Table 11.	Effects of staking, and K fertilizer on soluble solids ( <sup>o</sup> Brix) of tomato averaged over the plant spacing treatment	33
Table 12.	Effects of staking, plant spacing and K fertilizer on pH value of tomato juice	34
Table 13.	Effects of staking, plant spacing and K fertilizer on tomato pulp color	36
Table 14.	Relationships between K, Ca and Mg in tomato leaves and total fruit yield	38

Table 15.	K residuals of different K treatment in the soil after harvest	39
Table 16.	Budget analysis on staking for different spacings averaged over K treatment	46
Table 17.	Detailed budget for staking treatment averaged over the plant spacing and K fertilizer treatments	47

## LIST OF APPENDIX TABLES

	Page
Table B-1. Analysis of variance table for marketable yield	57
Table B-2. Analysis of variance table for unmarketable yield	57
Table B-3. Analysis of variance table for number of fruits per plant	58
Table B-4. Analysis of variance table for average fruit weight	58
Table B-5. Analysis of variance table for yield per plant	59
Table B-6. Analysis of variance table for total acidity	59
Table B-7. Analysis of variance table for total solids	60
Table B-8. Analysis of variance table for soluble solids	60
Table B-9. Analysis of variance table for pH values	61
Table B-10. Analysis of variance table for K in the 1st leaf sampling	61
Table B-11. Analysis of variance table for K in the 2nd leaf sampling	62
Table B-12. Analysis of variance table for Ca in the 1st leaf sampling	62
Table B-13. Analysis of variance table for Ca in the 2nd leaf sampling	63
Table B-14. Analysis of variance table for Mg in the 1st leaf sampling	63
Table B-15. Analysis of variance table for Mg in the 2nd leaf sampling	64
Table B-16. Analysis of variance table for K residual in the soil	64

Table C-1. The original data of marketable yield (t/ha) for analysis of variance	65
Table C-2. The original data of unmarketable yield (t/ha) for analysis of variance	66
Table C-3. The original data of the number of fruits per plant for analysis of variance	67
Table C-4. The original data of average fruit weight (g) for analysis of variance	68
Table C-5. The original data of yield per plant (kg) for analysis of variance	69
Table C-6. The original data of total acidity (%) for analysis of variance	70
Table C-7. The original data of total solids (%) for analysis of variance	71
Table C-8. The original data of soluble solids ( <sup>o</sup> Brix) for analysis of variance	72
Table C-9. The original data of pH value in tomato juice for analysis of variance	73
Table C-10. The original data of K% in the leaves (1th sampling) for analysis of variance	74
Table C-11. The original data of K% in tomato leaves (2nd sampling) for analysis of variance	75
Table C-12. The original data of Ca% in tomato leaves (1st sampling) for analysis of variance	76
Table C-13. The original data of Ca% in tomato leaves (2nd sampling) for analysis of variance	77
Table C-14. The original data of Mg% in tomato leaves (1st sampling) for analysis of variance	78
Table C-15. The original data of Mg% in tomato leaves (2nd sampling) for analysis of variance	79
Table C-16. The original data of K residual in soil after harvesting for analysis of variance	80
