LIST OF TABLES

Table		Page
1.	Average chemical and physical properties of the surface soils on farmers' fields, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	11
2.	Chemical and physical properties of the surface soils on farmers fields, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	22
3.	The information on soybean production in the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	22
4.	Total household number, population, number of household in the LRA and number of The LRA utilization household by village in Tambon Yang Khram and Tambon Doi Lor	24
5.	Social characters of soybean farmers in the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	25
6.	Family structure of the soybean farmers in the Chom Thong LRA, 1989	26
7.	Total land holding area (rai per household) and soybean growing area of the Chom Thong LRA farmers, 1989	26
8.	Number and percentage of the farmers using soybean varieties and fertilizer in the Chom Thong LRA, 1989	27
9.	Seeding rate and spacing as practised by soybean farmers in the Chom Thong LRA, 1989	28
10.	Variable costs of soybean production (baht/rai) by the farmers in the Chom Thong LRA, 1989	28

Table	Page
11. On-farm income of soybean production by the Chom Thong LRA farmers, 1989	29
12. Stage of development for soybean SJ 5 variety sown at lower and upper terrace fields, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	34
13. Stage of development for soybean CM 60 variety sown at lower and upper terrace fields, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	35
14. Weight of above ground dry matter of soybean, measured at three growth stages, with six treatment combinations of two soybean varieties and three levels of fertilizer application, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	37
15. Plant height of soybean at bloom stage in RCB design with six treatment combinations on 12 farms, two replications per farm, the Chom Thong LRA, Chom Thong district, Chiang mai, 1989 (cm)	38
16. Plant height comparison among two soybean varieties at bloom stage, by farm (cm)	38
17. Plant height comparison of soybean among three levels of fertilizer application, by farm (cm)	39
18. Grain yield (kg/rai) of soybean in RCB design with six treatment combinations on 12 farms, two replications per farm	40
19. Yield of soybean grown in the upland rainfed area, with two soybean varieties and three levels of fertilizer application	41
20. Partial budgeting analysis of fertilizer treatments for SJ 5	42
21. Partial budgeting analysis of fertilizer treatments for CM 60	43

LIST OF FIGURES

Figure		Page
1.	A sample layout of a 2 x 3 factorial experiment involving two varieties, three levels of fertilizer application arranged in a randomized complete block design with two replications. On-farm research, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	12
2.	Chiang Mai province and the Chom Thong Land Reform Project Area location	16
3.	Topography of Chom Thong district, Chiang Mai	17
4.	Rainfall data in 1989 of the Chom Thong LRA comparing with 25-year average rainfall (1959-1983) of Chom Thong district, Chiang Mai	18
5.	Monthly maximum and minimum air temperature of the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	19
6.	Soil series of the Chom Thong LRA, Chom Thong district, Chiang Mai	20
7.	Soil moisture contents (percentage by volume) on different soil depth on upper terrace field. The Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	31
8.	Soil moisture contents (percentage by volume) on different soil depth on lower terrace field. The Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	32
9.	Cumulative germination percentage of SJ 5 and CM 60 grown on lower and upper terrace fields, averaging from six sites	33

Figure		Page
10.	Grain yield response for SJ 5 and CM 60 to environment without fertilizer. The Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	44
11.	Grain yield response for SJ 5 and CM 60 to environment with 1.5-4.5-3.0 kg/rai (N-P ₂ O ₅ -K ₂ O) fertilizer. The Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	45
12.	Grain yield response for SJ 5 and CM 60 to environment with 3-9-6 kg/rai (N-P ₂ O ₅ -K ₂ O) fertilizer. The Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	45
13.	Distribution of confidence intervals for grain yield of soybean without fertilizer	46
14.	Distribution of confidence intervals for grain yield of SJ 5 and CM 60 with 1.5-4.5-3.0 kg/rai (N-P ₂ O ₅ -K ₂ O)	46
15.	Distribution of confidence intervals for grain yield of SJ 5 and CM 60 with 3-9-6 kg/rai (N-P ₂ O ₅ -K ₂ O)	47
16.	Distribution of confidence intervals for grain yield of SJ 5 at three rates of fertilizer application	47
17.	Distribution of confidence intervals for grain yield of CM 60 at three rates of fertilizer application	48

LIST OF APPENDIX TABLES

Table		Page
1.	List of farmers participant, on-farm research, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	58
2.	List of the thirty households interviewed and monitored throughout the soybean growing season, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	59
3.	Rainfall data in 1989 comparing with the 25 years average rainfall (1959-1983) of Chom Thong district, Chiang Mai	60
4.	Daily minimum air temperature of the Chom Thong LRA in 1989	61
5.	Daily maximum air temperature of the Chom Thong LRA in 1989	62
6.	Grain yield of soybean in RCB design with six treatment combinations on 12 farms and two replications per farm, the Chom Thong LRA, Chom Thong district, Chiang Mai, 1989	63
7.	Partitioning combined analysis of variance of yield over 12 farms	65
8.	Analysis over sites	66
