Acknowledgements	i
Abstract	ii
Table of Contents	vii
List of Tables	ix
List of Figures	xi
Chapter 1 Introduction	1
1.1 Significance of the study	4
1.2 Rationale of the study	11
1.3 Review of literature	12
1.4 Objectives	17
1.5 Research methods	18
1.5.1 Selection of study area	18
1.5.2 Data collection	20
1.5.3 Data analysis	21
Chapter 2 Socio-economic Components of the Study Area	23
2.1 General description of study area	23
2.1.1 Physical characteristics	23
2.1.2 Economic and social characteristics	26
2.2 Description of sample households	28
2.2.1 Categorization of households by farm size	28
2.2.2 Demographic characteristics	30
2.3 Household resource allocation and income	31
2.3.1 Land use	31
2.3.2 Crop production	39
2.3.3 Animal husbandry	41
2.3.4 Labor on and off the farm	43
2.3.4.1 Household management of labor and income	44
2.3.4.2 Types of rural employment	46
2.3.4.3 Casual labor	50
2.4 Household budgets	52
2.5 Interaction of social and economic components in pig-raising and resource allocation	58

Chapter 3	Farmers' Objectives and Attitudes Towards Pig Production	61
3.1	Farmers' objectives	62
3.2	Farmers' knowledge	67
3.3	Perceived constraints	72
3.4	Criteria for sale	74
3.5	Attitude analysis	77
Chapter 4	Production Analyses	87
4.1	General management	92
4.1.1	Management practices	92
4.1.2	Feed quality	97
4.2	Production efficiency	104
4.2.1	Feed efficiency (feed intake, daily gain, feed conversion ratios)	104
4.2.2	Feed cost per unit of liveweight gain	117
4.3	Correlation between rice by-products and herd size	120
Chapter 5	Economic Analyses	121
5.1	Economics of pig-raising	123
5.1.1	Marketing conditions	123
5.1.2	Investment and profit	124
5.1.2.1	Expenses in pig production	124
5.1.2.2	Income from pig production	128
5.2	Benefit-cost analysis	132
5.3	Production costs and profits per unit sale weight	136
5.4	Gross margin analyses	138
5.4.1	Comparison by four feed diets	138
5.4.2	Comparison by proportion of own feed used	138
5.4.3	Comparison by herd size	140
5.4.4	Comparison by initial weight	141
Chapter 6	Discussions and Conclusions	145
6.1	Classification of scales of production	145
6.2	Discussion of farmers' objectives	146
6.3	Discussion of production components	149
6.4	Discussion of economic components	151
6.5	Conclusions	154

Curriculum vitae		177

List of tables

Table	Page
1 Number and percentage of holdings reporting swine, by specified number of swine, 1978.	5
2 Selection of sample households for study	19
3 Land use and area.	32
4 Crop sequence chosen by farmers.	33
5 Labor requirement and gross income in animal husbandry.	43
6 Household labor and income components.	44
7 Summary of household budget (in Baht).	53
8 Farmers' ranking of objectives in raising pigs in order of importance.	64
9 Farmers' ranking of pig growth factors in order of importance.	68
10 Source of farmers' knowledge of rearing practices.	71
11 Farmers' perception and ranking of constraints in buying feed.	72
12 Farmers' ranking of criteria for sale of pig, and actual criterion used most recently.	75
13 Frequency distribution of farmers' attitude scores, and comparison with theoretical distributions.	82
14 Results of Spearman's rank correlation test on attitude scores and various economic parameters.	84
15 Basic management practices.	94
16 Farmers' use of feed diets.	98
17 Comparison of farmers' use of homefeed and bought feed.	101
18 Five main pig diet types used by farmers in household record-keeping survey.	103

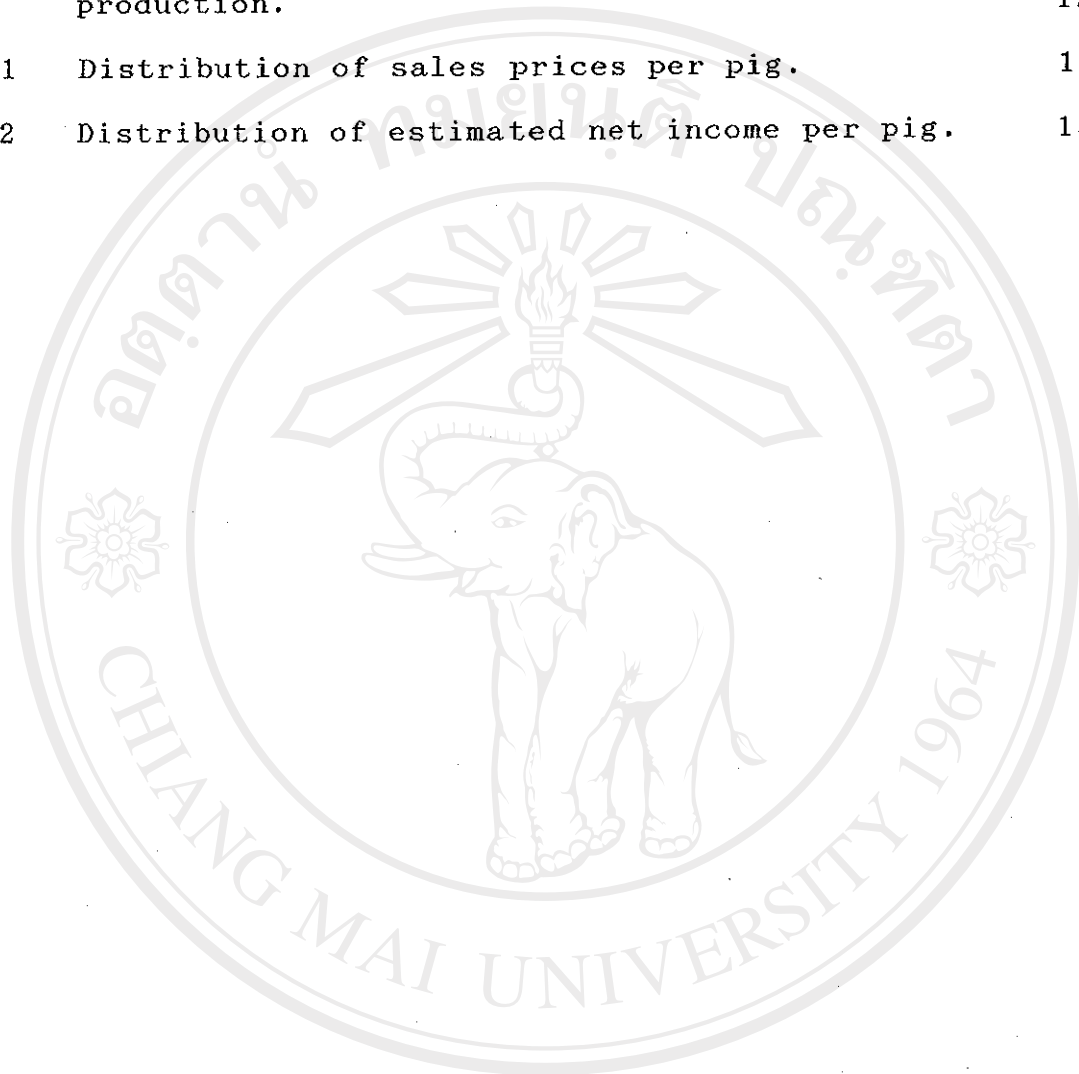

19	Feed intake (FI) (avg. kg. per head per day).	105
20	Weight change and weight gain (avg. kg. per head per day).	107
21	Feed conversion ratios (FCR) (kg. feed to produce one kg. liveweight gain).	110
22	Feed cost per one kg. of liveweight gain (Baht).	118
23	Main expenses in pig raising.	125
24	Daily feed cost according to age of pig.	127
25	Expenses incurred per head of pig.	128
26	Income from pig production.	129
27	Estimated net income (Baht per head of pig).	131
28	Benefit-cost analysis of pig production (Baht).	134
29	Production (cash) cost, cash income and cash benefit per one kilogram sale weight.	137
30	Comparison of gross margins by diet (Baht).	139
31	Comparison of gross margins by proportion of own feed (Baht).	140
32	Comparison of gross margins by herd size (Baht).	142
33	Comparison of gross margin by initial piglet weight (Baht).	143

List of figures

Figure	Page
1 Relationship between pigs and other components in a small farming system.	7
2 Map of study area, Mae Taeng district, Chiang Mai, Thailand.	23
3 Framework depicting farmers' activities on and off the farm.	28
4 Land use and area.	30
5 Selection of first crop.	36
6 Selection of second crop.	36
7 Selection of third crop.	37
8 Typical crop sequence in Mae Taeng.	38
9 Labor in crop production: average hours per one hectare.	40
10 Net income from crop production.	40
11 Hours devoted to labor activities outside the farm.	47
12 Annual income from labor activities outside the farm.	47
13 Number of casual laborers per household.	51
14 Seasonal distribution of casual labor.	51
15 Annual household expenses and savings.	54
16 Distribution of annual income (household averages).	55
17 Distribution of annual expenses (household averages).	56
18 Distribution of annual savings (household averages).	57
19 Farmers' primary objective in raising pigs.	65

20	Farmers' secondary objective in raising pigs.	65
21	Farmers' choice of primary factor influencing pig growth.	69
22	Farmers' choice of secondary factor influencing pig growth.	69
23	Farmers' primary constraint in buying feed.	73
24	Farmers' secondary constraint in buying feed.	73
25	Farmers' primary criterion for sale of pig.	76
26	Farmers' secondary criterion for sale of pig.	76
27	Farmers' actual reason for most recent sale of pig.	77
28	Distribution of farmers' attitude scores.	81
29	Actual and theoretical distributions of attitude scores.	81
30	Growth curve for swine (McMeekan, 1940).	89
31	Relation of feed efficiency to body weight (Eusebio, 1969).	90
32	Farmers' use of feed components.	99
33	Farmers' use of homefeed in proportion to bought feed.	101
34	Daily feed intake (kg. DM) averaged by month and over three months.	106
35	Daily weight gain (kg. per head) averaged by month and over three months.	108
36	Growth curve of pigs raised in backyard system in Mae Taeng.	108
37	Feed conversion ratios averaged by month and over three months.	111
38	Relation of feed efficiency to body weight in Mae Taeng swine.	112

39	Feed cost efficiency averaged by month and over three months.	118
40	Distribution of annual expenses in pig production.	128
41	Distribution of sales prices per pig.	130
42	Distribution of estimated net income per pig.	131
