List of Figures	xiv
List of Appendix tables	xvi
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEW	6
2.1 General role of phosphorous in plant function	6
2.2 The role of phosphorous and lime in improvement of peanut yield	7
2.3 The role of phosphorous and lime in nitrogen fixation	9
2.4 The role of peanut in cropping systems	11
2.5 Effect of liming and phosphorous fertilizer on soil and nutrient properties	12
2.6 Peanut production in Vietnam and in Thua Thien Hue province	14
2.6.1 Peanut production in Vietnam	14
2.6.2 Peanut production in Thua Thien Hue province	16
2.7 Constraints to peanut production in Vietnam	17
2.7.1 Socio- economic factors	17
2.7.2 Agronomic factors	17
2.7.3 Management practices for yield improvement	18
CHAPTER 3 MATERIALS AND METHODS	20
3.1 Field survey	20

3.2 Field experiment	21
3.2.1 Experimental site	21
3.2.2 Treatments and design	21
3.2.3 Field management	22
3.2.4 Sampling procedures	23
3.2.4.1 Plant sample	23
3.2.4.2 Soil sample	25
3.2.5 Data analysis	26
CHAPTER 4 RESULTS OF FIELD SURVEY	28
4.1 Topography and soil characteristics of the study site	28
4.2 Climatic conditions	31
4.3 Land use	34
4.4 Peanut in cropping systems	37
4.4.1 Cropping patterns in hilly zone	38
4.4.2 The role of peanut in cropping systems	39
4.5 Farmers' practices in peanut production	42
4.6 Gross margin of some crops	46
4.7 Gross margin of some cropping patterns	50
4.8 The constraints on peanut production	51
CHAPTER 5 RESULTS OF FIELD EXPERIMENT	54
5.1 Effect of phosphorous fertilizer and lime on number of nodule	54
5.2 Effect of phosphorous fertilizer and lime on nodule dry weight	57
5.3 Effect of phosphorous fertilizer and lime on dry matter yield	61
5.4 Effect of phosphorous fertilizer and lime on leaf areas	64
5.5 Effect of phosphorous fertilizer and lime on pod yield and yield components of peanut	67
5.5.1 Number of pod per plant	67

5.5.2 Number of filled pod per plant	69
5.5.3 Number of unfilled pod per plant	69
5.5.4 100-pod weight	71
5.5.5 100-seed weight	72
5.5.6 Pod yield of peanut	73
5.6 Effect of phosphorous fertilizer and lime on N, P and K concentration in plant	75
5.6.1 Effect of phosphorous fertilizer and lime on N concentration in plant	75
5.6.2 Effect of phosphorous fertilizer and lime on P concentration in plant	77
5.6.3 Effect of phosphorous fertilizer and lime on K concentration in plant	78
5.7 Effect of phosphorous fertilizer and lime on soil nutrients	80
5.8 Economic consideration	85
CHAPTER 6 DISCUSSION	88
6.1 Soil characteristics	88
6.2 Climatic condition	89
6.3 Land use	90
6.4 The role of peanut in cropping systems	93
6.5 Responses of peanut to lime and phosphorous fertilizer	96
6.6 Effect of phosphorous fertilizer and lime on soil characteristic	102
6.7 Effect of phosphorous fertilizer and lime on N, P and K concentration in plant	103
6.8 Economic consideration	105
CHAPTER 7 CONCLUSION AND RECOMMENDATION	109
7.1 Conclusions	109

7.2 Recommendations	111
REFERENCES	112
APPENDIX	126
CIRRICULUM VITAE	152

LIST OF TABLES

	Page	
Table 1	Some characteristics of a typical soil in hilly zone of Thua Thien Hue Province	29
Table 2	Land use of three surveyed villages	35
Table 3	Percentage of farmers' opinion on the role of peanut in farming systems	40
Table 4	Farmers' practices in peanut production	43
Table 5	Average fertilizers applied for peanut field in three villages	44
Table 6	Yield ranges of peanut in Phongson, Thuychau and Binhdien	46
Table 7	Average yield of peanut in three surveyed villages	46
Table 8	Gross margin (Thousand VND ha ⁻¹) of some crops in hilly zone	49
Table 9	Gross margin (Thousand VND ha ⁻¹) of some cropping patterns	50
Table 10	Percentage of farmers' opinion about limiting factors on peanut production in hilly zone	52
Table 11	Analysis of variance for number of nodule	54
Table 12	Analysis of variance for nodule dry weight	57
Table 13	Analysis of variance for dry matter yield	61
Table 14	Analysis of variance for leaf areas	64
Table 15	Analysis of variance for number of pod per plant, number of filled pod per plant, number of unfilled pod per plant, pod weight, seed weight and pod yield	67
Table 16	Summary of analysis of variance for N, P and K concentration in plant	75
Table 17	Analysis of variance for soil properties after field experiment	80
Table 18	Economic consideration for different treatments (Thousand VND ha ⁻¹)	85

LIST OF FIGURES

		Page
Figure 1	Agroecological regions of Vietnam and the study site at Thua Thien Hue province	3
Figure 2	Area and yield of peanut by agroecological regions	15
Figure 3	Area and peanut yield in Thua Thien Hue province and in hilly zone	16
Figure 4	Ten-year average of temperature (°C) and rainfall (mm) in Thua Thien Hue province (1989 – 1998)	31
Figure 5	Air temperature and humidity of Thua Thien Hue province in 1999	32
Figure 6	Evaporation, rainfall and sunshine in Thua Thien Hue province in 1999	34
Figure 7	Some main cropping patterns in the three surveyed villages	38
Figure 8	Yield variation of peanut crop in three surveyed villages	47
Figure 9	Effect of P fertilizer and lime on number of nodule at R ₄ , R ₆ and R ₈ stages	56
Figure 10	Effect of P fertilizer and lime on nodule dry weight at R ₄ , R ₆ and R ₈ stages	59
Figure 11	Effect of P fertilizer on nodule dry weight at R ₂ stage	60
Figure 12	Effect of lime on nodule dry weight at R ₂ stage	60
Figure 13	Effect of P fertilizer and lime on dry matter yield at R ₂ , R ₄ , R ₆ and R ₈ stages	63
Figure 14	Effect of P fertilizer and lime on leaf area at R ₂ , R ₄ , R ₆ and R ₈ stages	66
Figure 15	Effect of P fertilizer and lime on pod number of peanut	66
Figure 16	Effect of P fertilizer and lime on filled pod number of peanut	68
Figure 17	Effect of P fertilizer and lime on unfilled pod number of peanut	70
Figure 18	Effect of P fertilizer and lime on % decreasing of unfilled pod number of peanut	71
Figure 19	Effect of P fertilizer and lime on 100-pod weight	72
Figure 20	Effect of P fertilizer and lime on seed weight	73
Figure 21	Effect of P fertilizer and lime on pod yield	74
Figure 22	Effect of P fertilizer and lime on % increasing of pod yield	74
Figure 23	Effect of P fertilizer on N concentration in plant	76

Figure 24	Effect of lime on nitrogen concentration	74
Figure 25	Effect of P fertilizer on P concentration in plant	77
Figure 26	Effect of lime on P concentration in plant	78
Figure 27	Effect of P fertilizer on K concentration in plant	79
Figure 28	Effect of lime on K concentration in plant	79
Figure 29	Effect of P fertilizer and lime on available phosphorous	81
Figure 30	Effect of P fertilizer and lime on pH_{KCl}	82
Figure 31	Effect of P fertilizer and lime on organic matter	82
Figure 32	Effect of P fertilizer on total soil nitrogen and phosphorous	83
Figure 33	Effect of lime on total soil nitrogen and phosphorous	84
Figure 34	Effect of P fertilizer on total soil potassium	84
Figure 35	Effect of P fertilizer and lime on % increased gross margin	86

LIST OF APPENDIX TABLES

		Page
Appendix A1	Design of experiment follows split – plot design	126
Appendix A2	Diagram of plot size and plant density of field experiment	126
Appendix table A3	Air temperature and relative humidity at Thua Thien Hue province in 1999	127
Appendix table A4	Rainfall, evaporation and sunshine at Thua Thien Hue province in 1999	127
Appendix table A5	Air temperature and rainfall of Thua Thien Hue province from 1989 to 1998	127
Appendix table A6	Sowing area and yield of peanut in hilly zone and Thua Thien Hue province	127
Appendix table A7	Sowing area (1000 ha) and pod yield (ton/ha) of peanut by agroecological regions and country of Vietnam in 1997 and 1998	128
Appendix table B1	Effect of phosphorous fertilizer and lime on dry matter yield at R ₂ and R ₄ stages (kg ha ⁻¹)	129
Appendix table B2	Effect of phosphorous fertilizer and lime on dry matter yield at R ₆ and R ₈ stages (kg ha ⁻¹)	129
Appendix table B3	Effect of phosphorous fertilizer and lime on number of nodule at R ₂ and R ₄ stages	130
Appendix table B4	Effect of phosphorous fertilizer and lime on number of nodule at R ₆ and R ₈ stages	130
Appendix table B5	Effect of phosphorous fertilizer and lime on nodule dry weight at R ₂ and R ₄ stages	131
Appendix table B6	Effect of phosphorous fertilizer and lime on nodule dry weight at R ₆ and R ₈ stages	131
Appendix table B7	Effect of phosphorous fertilizer and lime on leaf areas at R ₂ and R ₄ stages	132
Appendix table B8	Effect of phosphorous fertilizer and lime on leaf areas at R ₆ and R ₈ stages	132
Appendix table B9	Effect of phosphorous fertilizer and lime on number of unfilled pod and filled pod per plant	133

Appendix table B10	Effect of phosphorous fertilizer and lime on seed weight and pod weight (g)	133
Appendix table B11	Effect of phosphorous fertilizer and lime on no. of pod and pod yield	134
Appendix table B12	Effect of phosphorous fertilizer and lime on revenue and gross margin	134
Appendix table B13	Effect of phosphorous fertilizer and lime on soil characteristics	135
Appendix table B14	Effect of phosphorous fertilizer and lime on soil characteristics	135
Appendix table B15	Effect of phosphorous fertilizer and lime on soil characteristics	136
Appendix table B16	Effect of phosphorous fertilizer and lime on N and K concentration in plant	136
Appendix table B17	Effect of phosphorous fertilizer and lime on P concentration in plant	137
Appendix table C1	Analysis of variance for dry matter yield at R ₂ stage	138
Appendix table C2	Analysis of variance for dry matter yield at R ₄ stage	138
Appendix table C3	Analysis of variance for dry matter yield at R ₆ stage	138
Appendix table C4	Analysis of variance for dry matter yield at R ₈ stage	139
Appendix table C5	Analysis of variance for nodule dry weight at R ₂ stage	139
Appendix table C6	Analysis of variance for nodule dry weight at R ₄ stage	139
Appendix table C7	Analysis of variance for nodule dry weight at R ₆ stage	140
Appendix table C8	Analysis of variance for nodule dry weight at R ₈ stage	140
Appendix table C9	Analysis of variance for number of nodule at R ₂ stage	140
Appendix table C10	Analysis of variance for number of nodule at R ₄ stage	141

Appendix table C11	Analysis of variance for number of nodule at R ₆ stage	141
Appendix table C12	Analysis of variance for number of nodule at R ₈ stage	141
Appendix table C13	Analysis of variance for leaf areas at R ₂ stage	142
Appendix table C14	Analysis of variance for leaf areas at R ₄ stage	142
Appendix table C15	Analysis of variance for leaf areas at R ₆ stage	142
Appendix table C16	Analysis of variance for leaf areas at R ₈ stage	143
Appendix table C17	Analysis of variance for unfilled pod per plant	143
Appendix table C18	Analysis of variance for seed weight	143
Appendix table C19	Analysis of variance for pod yield	144
Appendix table C20	Analysis of variance for no. of pod per plant	144
Appendix table C21	Analysis of variance for pod weight	144
Appendix table C22	Analysis of variance for no. of filled pod per plant	145
Appendix table C23	Analysis of variance for gross margin	145
Appendix table C24	Analysis of variance for revenue	145
Appendix table C25	Analysis of variance for soil available P	146
Appendix table C26	Analysis of variance for soil potassium	146
Appendix table C27	Analysis of variance for soil nitrogen	146
Appendix table C28	Analysis of variance for soil phosphorous	147
Appendix table C29	Analysis of variance for pH _{KCl}	147
Appendix table C30	Analysis of variance for organic matter	147
Appendix table C31	Analysis of variance for N concentration in plant	148
Appendix table C32	Analysis of variance for P concentration in plant	148
Appendix table C33	Analysis of variance for K concentration in plant	148
