## ACKNOWLEDGEMENTS

I wish to acknowledge my adviser, Dr. Attachai Jintrawet, for his valuable guidance and assistance during conducting samples collection, analyzing the results, and processing the context of the manuscript. I would also like to thank my thesis committee members, Dr. Ampan Bhromsiri, Dr. David E. Thomas and Mr. Phrek Gypmantasiri for their time and effort in reading and making suggestions for improving this thesis.

I would like to acknowledge the Multiple Cropping Center (MCC), Faculty of Agriculture, Chiang Mai University and the International Centre for Research in Agroforestry, Chiang Mai, Thailand, which provide financial supports and allow me to use facilities during two and half years of the study. I wish to thank the students and staff of MCC for their collaboration and support. I am also thankful to the Prachin Buri Rice Research Center, Rice Research Institute for granting me a leave of absence to pursue my graduate study and providing facilities for running methane gas concentration analysis. I also would like to thank Mr. Daniel Muloi for his laborious help in collecting gas samples and related auxiliary data.

Finally, I would like to give thanks to my parents, and my family, who gave me encouragement, patience, and sacrifice, which are the sources of inspiration and motivation to complete the thesis.
