

## TABLE OF CONTENTS

	Page
<b>ACKNOWLEDGEMENT</b>	iii
<b>ABSTRACT ( ENGLISH )</b>	iv
<b>ABSTRACT ( THAI )</b>	vi
<b>LIST OF TABLES</b>	xi
<b>LIST OF ILLUSTRATIONS</b>	xii
<b>CHAPTER I INTRODUCTION</b>	1
<b>CHAPTER II LITERATURE REVIEW</b>	
1. Molecular genetics	3
1.1 DNA structure	3
1.2 Gene expression	5
1.3 Reading frame	7
2. Genome	
2.1 Genome structure	7
2.2 Source of genome variation	8
3. Biological techniques in genomics	
3.1 Genetic mapping	10
3.2 Physical mapping	12
3.3 DNA vector	13
3.4 Polymerase chain reaction	14
3.5 DNA sequencing	16
3.6 Genetic informatics	16

3.7 Traits, maps and sequence	17
4. Mapping populations	18
5. Genetic markers	20
6. Vinculin	22
6.1 Role and expression of vinculin gene	25
6.2 Protein structure	31
6.3 Vinculin gene	31
Objective of the study	33
<b>CHAPTER III MATERIALS AND METHODS</b>	
1. Source of animals	34
2. Chemical and reagent	34
3. Experimental instruments	36
4. Methods	36
Part I Identification of Polymorphic Sites	38
1) Preparation of total RNA	38
2) First strand cDNA synthesis	39
3) Design of specific forward and reverse primers and amplification of DNA fragments by PCR	42
4) Purification of DNA fragments from agarose gel by Phenol-chloroform extraction	43
5) Cloning of DNA fragment	44
6) Insert amplification	45
7) Isolation and purification of plasmid DNA	45

	<b>Page</b>
8) Sequencing reaction for single-strand DNA	48
by the sanger dideoxy-mediated chain-termination method	
Part II Mapping and Establishment of Protocols Suitable for	51
PCR-based Genotyping the Polymorphic Sites	
Part III Restriction Fragment Length Polymorphism Method	52
<b>CHAPTER IV RESULT</b>	<b>53</b>
<b>CHAPTER V DISCUSSION</b>	<b>65</b>
<b>REFERENCES</b>	<b>72</b>
<b>APPENDIX</b>	
APPENDIX I : Chemical and reagent preparation	81
APPENDIX II : Prelab notes	82
APPENDIX III: Caution	91
<b>CURRICULUM VITAE</b>	<b>93</b>

**LIST OF TABLES**

<b>Table</b>		<b>Page</b>
1	Primers for amplified porcine vinculin gene	56
2	Sequence changes in porcine vinculin gene	59
3	Intron structure in fragment 1, estimated by comparative to the other species of vinculin gene.	60

## LIST OF IULLSTRATIONS

<b>Figure</b>	<b>Page</b>
1 The nitrogenous bases for the four types of nucleotides and structure.	4
2 DNA replication.	5
3 Polymerase chain reaction.	15
4 Connecting traits, maps and DNA sequence.	18
5 The masurement of loin-eye area of animal selection for the high and low performing groups to detection differential expressed gene by	23
6 Comparing of RT-PCR analysis of differentially amplified fragments of the four groups DL(H), DL(L), F2(H), F2(L)	24
7 Integrin localization and cytoskeleton components	27
8 Proteins associated in adheren type junction	28
9 The structure showing the protein composition of costameres in striated muscle relative to Z-disks and the myofibrillar lattice.	29
10 Aligment of a series of PCR-generated chick vinculin cDNAs with respect to the structure of the vinculin molecule.	33
11 Diagram of breeding F2 resource population Principle for RT-PCR	37
12 Principle of RT-PCR	41
13 18 Oligonucleotide primer designed clover over 5172 bp of vinculin gene	44
14 Plasmid Isolation by High Pure Plasmid Isolation Kit	47
15 Principle of DNA sequencing, Sanger method	50

	<b>Page</b>
16 Porcine vinculin sequence	57
17 Comparison of human and porcine vinculin structure	60
18 The point mutation at position 2382 within Hamshire	63
19 The point mutation at position 2457 within Hamshire	63
20 The point mutation at position 4197 within Hamshire	64
21 The sample to identify result of RH-panel.	64
