ACKNOWLEDGEMENTS

The author expresses his gratitude and appreciation to the following for assisting him during various stages of his study:

Professor Dr. Chuckree Senthong, advisor and chairman of his Supervisory Committee; Assistant Professor Dr. Sakda Jongkaewwattana, Associate Professor Dr. Danai Boonyakiat, and Dr. Amara Wiengweera, members of his Supervisory Committee, for their valuable guidance and helpful criticism in the preparation and completion of this study;

Through the Lampang Agricultural Research and Training Center, for granting him a study leave and allow him to use all the facilities and equipment that related to his research works. The author owes a big debt to the Department of Agronomy, Faculty of Agriculture, Chiang Mai University for providing him with an excellent education and research methodologies.

He would especially like to thank his wife, Charunee, his son and daughter, for their moral support and encouragement during the whole period of the study.

And finally, to his parent, sister, and his good friends, for their support throughout his whole life.

Sawit Meechoui
