ACKNOWLEDGEMENTS

Firstly, I greatly thank Lect. Dr. Tanachai Pankasamsuk thesis advisor, advisory committee members, Assoc. Prof. Kesinee Ramingwong, Lect. Dr. Daruni Naphrom for their suggestion, teaching and encouragement to conduct this research immensely and also Lect. Dr. Weenun Bundithya, and Dr. Daranee Kiatsakun for comments to improve the accuracy of this dissertation.

I would like to thank Mrs. Pornrat Sirikhum, the officers of horticulture laboratory, horticulture laboratory staff, Ag-Biotechnology laboratory staff and graduate students of Ag-Biotechnology and the central laboratory of agriculture staff of Chiang Mai University for their helpfulness and advice in laboratory techniques.

I am also thankful to Ms. Prapapun Plaichun, head office of agricultural library, and her staff for helpful and special service information in my thesis writing.

I feel deeply thankful to Lect. Dr. Therapas Sinlaphasomboon, Ms. Porntip Thawong, Asst. Prof. Dr. Amonnat Chattrakul, and the graduate students of Horticulture Department of Horticulture from year 2002-2007 who sincerely provided me with their assistances to complete my research.

And finally, I am grateful to special thank to my mother, my sisters, my best friends and my daughter in law for their understanding, encouragement, helpfulness and sharing suffer during a very long time of my Ph.D. thesis.
