

TABLE OF CONTENTS

	Page
Acknowledgements	iii
Abstract in Thai	iv
Abstract in English	vi
Table of contents	viii
List of tables	xi
List of figures	xvii
List of appendix tables	xviii
Chapter 1 Introduction	1
Objectives of the experiments	2
Chapter 2 Review of Literature	3
1. Origin and distribution	3
2. Botany of longan	3
3. Flowering process	4
4. The control of flowering	5
5. Factors affecting flowering	6
5.1 External or environmental factors	6
5.2 Internal or endogeneous factors	8
6. Potassium chlorate and flowering of longan	15
6.1 Potassium chlorate property	15
6.2 Effect of potassium chlorate on plant physiology and biochemistry	15

TABLE OF CONTENTS (CONTINUED)

	Page
6.3 Effect of potassium chlorate on flowering of longan	17
6.4 Effect of potassium chlorate on hormonal changes in longan	19
Chapter 3 Materials and Methods	20
1. Materials	20
1.1 Experimental plants	20
1.2 Others apparatus	21
2. Methods	21
2.1 Experiment 1 The concentration effect of potassium chlorate on flower induction of derooted air-layered longan cv. Daw	21
2.2 Experiment 2 Effect of potassium chlorate on flowering and morphological change of terminal buds in rooted and derooted air-layered longan cv. Daw	22
2.3 Experiment 3 Effect of potassium chlorate on physiological and biochemical changes in leaves and shoots of derooted air-layered longan cv. Daw	23
Chapter 4 Results	32
Chapter 5 Discussion	90
Chapter 6 Conclusion	96

LIST OF TABLES

Table		Page
1	The effect of potassium concentrations on flower induction of derooted air-layered longan cv. Daw	33
2	The chlorophyll a contents ($\text{mg}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	41
3	The changing percentage of chlorophyll a (%) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	42
4	The chlorophyll b contents ($\text{mg}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	43
5	The changing percentage of chlorophyll b (%) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	44
6	Total chlorophyll contents ($\text{mg}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	44

LIST OF TABLES (CONTINUED)

Table		Page
7	The changing percentage of total chlorophyll (%) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	45
8	Total nonstructural carbohydrate (TNC) (mg D-glucose equivalent·gDW ⁻¹) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	47
9	The changing percentage of total nonstructural carbohydrate (TNC) (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	48
10	Total sugar (TS) (mg D-glucose equivalent·gDW ⁻¹) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	50
11	The changing percentage of total sugar (TS) (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	51
12	Reducing sugar (RS) contents (mg D-glucose equivalent·gDW ⁻¹) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	53

LIST OF TABLES (CONTINUED)

Table	Page
13 The changing percentage of reducing sugar (RS) contents (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	54
14 The total nitrogen contents (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	57
15 The changing percentage of nitrogen (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	58
16 The carbohydrate per nitrogen ratios (C:N) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	59
17 The changing percentage of carbohydrate per nitrogen ratios (C:N) (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	60
18 The percentage of nitrate (NO ₃ ⁻) (%) in leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	62

LIST OF TABLES (CONTINUED)

Table	Page
19 The changing percentage of nitrate (NO ₃ ⁻) (%) in leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	63
20 The percentage of phosphorus (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	65
21 The changing percentage of phosphorus (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	66
22 The percentage of potassium (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	68
23 The changing percentage of potassium (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	69
24 The percentage of calcium (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	71

LIST OF TABLES (CONTINUED)

Table	Page
25 The changing percentage of calcium (%) of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	72
26 The nitrate reductase activity (NRA) ($\mu\text{moleNO}_2\text{h}^{-1}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	74
27 The changing percentage of nitrate reductase activity (NRA) (%) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	75
28 IAA contents ($\mu\text{M}\cdot\text{gFW}^{-1}$) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	77
29 The changing percentage of IAA (%) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	78
30 Gibberellin-like substances contents $\mu\text{g GA}_3$ (Kyowa) equivalent $\cdot\text{gFW}^{-1}$ of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	80

LIST OF TABLES (CONTINUED)

Table	Page
31 The changing percentage of gibberellin-like substances (GAs) (%) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	81
32 Cytokinin-like substances contents (CKs) (µg kinetin equivalent·gFW ⁻¹) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	84
33 The changing percentage of cytokinin-like substances (CKs) (%) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	85
34 The gibberellin-like substance per cytokinin-like substance ratios (GAs:CKs) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	86
35 Ethylene contents (ppm) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	88
36 The changing percentage of ethylene (%) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	89

LIST OF FIGURES

Figure		Page
1	One year-old air-layered longan cv. Daw which used as experimental plants	20
2	Non-shading greenhouse with automatic water sprayer	22
3	The toxic symptoms of potassium chlorate at high concentration on derooted air-layered longan cv. Daw (A:normal; B:leaf drop; C, D and E:chlorosis; F:dehydration)	34
4	Floral buds of derooted air-layered longan cv. Daw treated with $KClO_3$ 500 ppm	35
5	The terminal bud of air-layered longan cv. Daw at 10 (A), 15 (B), 20 (C) and 25 (D) days, non-treated with $KClO_3$ (ab = axillary bud, am = apical meristem, yl = young leaf)	36
6	The terminal bud of derooted air-layered longan cv. Daw at 10 (A), 15 (B), 20 (C) and 25 (D) days, non-treated with $KClO_3$ (ab = axillary bud, am = apical meristem, yl = young leaf)	37
7	The terminal bud of air-layered longan cv. Daw at 10 (A), 15 (B), 20 (C) and 25 (D) days, treated with $KClO_3$ (ab = axillary bud, am = apical meristem, yl = young leaf, fb = floral bud)	38
8	The terminal bud of derooted air-layered longan cv. Daw at 10 (A), 15 (B), 20 (C) and 25 (D) days, treated with $KClO_3$ (ab = axillary bud, am = apical meristem, yl = young leaf, fb = floral bud)	39
9	Floral buds induced by potassium chlorate of derooted air-layered longan at 35-40 DAT	40

LIST OF APPENDIX TABLES

Appendix table		Page
1	The chlorophyll a changes ($\mu\text{g}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	109
2	The chlorophyll b changes ($\mu\text{g}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	110
3	Total chlorophyll changes ($\mu\text{g}\cdot\text{gFW}^{-1}$) of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	111
4	Total nonstructural carbohydrate (TNC) ($\text{mg D-glucose equivalent}\cdot\text{gDW}^{-1}$) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	112
5	Total sugar (TS) ($\text{mg D-glucose equivalent}\cdot\text{gDW}^{-1}$) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	113
6	Reducing sugar (RS) contents ($\text{mg D-glucose equivalent}\cdot\text{gDW}^{-1}$) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate ($+\text{KClO}_3$) at the concentration of 500 ppm	114

LIST OF APPENDIX TABLES (CONTINUED)

Appendix table		Page
7	The total nitrogen content (%) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	115
8	The carbohydrate per nitrogen ratio (C:N) (%) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	116
9	The percentage of nitrate (NO ₃ ⁻) changes in leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	117
10	The percentage of phosphorus (%) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	118
11	The percentage of potassium (%) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	119
12	The percentage of calcium (%) changes of leaves and shoots of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	120

LIST OF APPENDIX TABLES (CONTINUED)

Appendix table		Page
13	The nitrate reductase activity (NRA) ($\mu\text{moleNO}_2\text{h}^{-1}\cdot\text{gFW}^{-1}$) changes of leaves of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	121
14	IAA changes ($\mu\text{M}\cdot\text{gFW}^{-1}$) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	122
15	Gibberellin-like substances changes ($\mu\text{g GA}_3$ (kyowa) $\cdot\text{gFW}^{-1}$) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	123
16	Cytokinin-like substances changes ($\mu\text{g kinetin}\cdot\text{gFW}^{-1}$) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	124
17	Ethylene changes (ppm) of air-layered (R) and derooted air-layered (DR) longan cv. Daw, non-treated and treated with potassium chlorate (+KClO ₃) at the concentration of 500 ppm	125
