Acknowledgements	iii
Abstract (English)	v
Abstract (Thai)	ix
List of Tables	xvi
List of Figures	xix
Chapter 1 Introduction	1
Chapter 2 Literature review	4
2.1 Definition of genetic diversity	4
2.2 Definition of local varieties	4
2.3 Structure of genetic diversity in local varieties	5
2.3.1 Allelic richness and genotype diversity	5
2.3.2 Adaptation to the local environment	6
2.3.3 Diversity to meet temporal environmental variation	7
2.3.4 Continuing crop evolutionary process	7
2.4 Threat to local varieties	8
2.5 Farmers management of diversity	9
2.6 Factors affecting genetic diversity of local populations	10
2.7. Rice diversity base on ecosystem in Laos	11
2.7.1 Rice diversity in the rainfed lowland environment	11
2.7.2 Rice diversity in the rainfed upland environment	12

2.8 Conservation of traditional rice varieties in Laos	13
2.9 Measurement of genetic diversity of local rice varieties	13
2.9.1 Measurement of morphological and physiological characteristics	14
2.9.2 Measurement of genetic diversity with DNA level	15
Chapter 3 Materials and Methods	17
3.1 Household survey	17
3.1.1 Site selection	17
3.1.2 Methodology	17
3.1.3 Data analysis	18
3.2 Characterization of local rice varieties	21
3.2.1 Farmers' seed characterization	21
3.2.2 Progeny tested	21
3.2.3 DNA analysis	22
3.2.4 Data analysis	24
Chapter 4 Results	25
4.1 Field survey	25
4.2 Characterization of local rice varieties	31
4.2.1 Farmers' seed characterization	31
4.2.2 Progeny test	41
Morphological characteristics	41
Physiological characteristics	62
DNA analysis of local rice varieties	77

Chapter 5 Discussion	84
Chapter 6 Conclusion	89
References	90
Appendix	98
Curriculum Vitae	105

LIST OF TABLES

Table	Page
3.1 Description of local rice in the study areas	20
3.2 Primer sequences, repeat motif, expected PCR product size, annealing temperature and chromosomal locations of six microsatellite primers.	23
4.1.1 Number of household, populations, ethnic group and main staple in four villages, Ban Houyman (HM) and Ban Thapho (TP) of Phonxay (PX) district and Ban Ladthahae (LTH) and Ban Houyleung (HL) of Pak Ou (PO) district, Luang Prabang province	26
4.1.2 Distribution and percentage (in parenthesis) of number rice varieties, ecosystem, endosperm type and maturity of rice varieties in four villages	27
4.1.3 Rank and proportion of rice varieties (no of household) in four villages	28
4.1.4 Number of rice varieties per household, rice seed exchange and storage in four villages	30
4.2.1 Husk color of rice varieties in farmers' seed lots in four villages	33
4.2.2 Pericarp color of rice varieties in farmers' seed lots in four villages	34
4.2.3 Percentage of non-glutinous, glutinous and Shannon-Weaver Index (H') of rice varieties in farmers' seed lots in four villages	35
4.2.4 Seed length of rice varieties in farmers' seed lots in four villages	36
4.2.5 Seed width of rice varieties in farmers' seed lots in four villages	37
4.2.6 100 seeds weight of rice varieties in farmers' seed lots in four villages	38

4.2.7	Leaf blade color of rice varieties in progeny test in four villages	45
4.2.8	Basal leaf sheath color of rice varieties in progeny test in four villages	46
4.2.9	Leaf blade pubescence of rice varieties in progeny test in four villages	47
4.2.10	Auricle color of rice varieties in progeny test in four villages	48
4.2.11	Collar color of rice varieties in progeny test in four villages	49
4.2.12	Ligule color of rice varieties in progeny test in four villages	50
4.2.13	Ligule shape of rice varieties in progeny test in four villages	51
4.2.14	Stigma color of rice varieties in progeny test in four villages	52
4.2.15	Apiculus color of rice varieties in progeny test in four villages	53
4.2.16	Pericarp color of rice varieties in progeny test in four villages	54
4.2.17	Husk color of rice varieties in progeny test in four villages	55
4.2.18	Grain awning of rice varieties in progeny test in four villages	57
4.2.19	Husk pubescence of rice varieties in progeny test in four villages	58
4.2.20	Days to flowering of rice varieties in progeny test in four villages	63
4.2.21	Number of tillers per plant of rice varieties in progeny test in four villages	65
4.2.22	Culm length (cm) of rice varieties in progeny test in four villages	67
4.2.23	Number of panicles per plant of rice varieties in progeny test in four villages	69
4.2.24	Panicle length (cm) of rice varieties in progeny test in four villages	71
4.2.25	Number of seeds per panicle of rice varieties in progeny test in four villages	73
4.2.26	Percent of filled seeds of rice varieties in progeny test in four villages	75

4.2.27	Number of alleles of six microsatellite loci, of twelve samples of five local rice varieties collected from different villages	77
4.2.28	Gene diversity per locus for six markers loci, of twelve samples of five local rice varieties collected from different villages	78
4.2.29	Genetic parameter for samples of twelve samples of five local rice varieties collected different villages	80
4.2.30	Genetic parameter for varieties of twelve samples of five local rice varieties collected different villages	81
4.2.31	Genetic parameter for villages of twelve samples of five local rice varieties collected different villages	82

LIST OF FIGURES

Figure	Page
3.1	19
4.1.1	29
4.1.2	29
4.2.1	39
4.2.2	39
4.2.3	40
4.2.4	59
4.2.5	60
4.2.6	61
4.2.7	64
4.2.8	66

4.2.9	Distribution of culm length (cm) of rice varieties in progeny test	68
4.2.10	Distribution of number of panicle per plant of rice varieties in progeny test	70
4.2.11	Distribution of panicle length (cm) of rice varieties in progeny test	72
4.2.12	Distribution of number of seed per panicle of rice varieties in progeny test	74
4.2.13	Distribution of percent of filled seeds of rice varieties in progeny test	76
4.2.14	Microsatellite amplification product from of twelve samples of five local rice varieties genomic DNA with primer RM316.	78
4.2.15	Genetic distance clustering by UPGMA methods showing genetic relationship among samples of local rice varieties	83
