

## Table of Contents

	<b>Page</b>
Acknowledgements.....	iii
Abstract in English.....	v
Abstract in Thai.....	viii
List of Tables.....	xiv
List of Figures.....	xvi
<b>Chapter I Introduction.....</b>	<b>1</b>
<b>1.1 General background .....</b>	<b>1</b>
1.2 Rational of the study.....	3
1.3 Objectives of the study.....	4
1.4 Usefulness of the study .....	4
<b>Chapter II Literature Review .....</b>	<b>5</b>
2.1 Agroecology of the study area.....	5
2.1.1 The study area and its location.....	5
2.1.2 Physical characteristics .....	5
2.1.3 Biological characteristics .....	9
2.2 Botanical characteristics of mango .....	11
2.3 Growing areas and yields of mango in Lao PDR .....	12
2.4 Factors affecting successfulness of mango production.....	14
2.4.1 Mango varieties.....	14
2.4.2 Survival of mango trees .....	15
2.4.3 Water and moisture .....	15
2.4.4 Diseases and insect pests .....	16
2.5 Mango propagation .....	17

2.5.1 Sexual method.....	19
2.5.2 Asexual method.....	20
<b>Chapter III Materials and Methods .....</b>	<b>24</b>
3.1 Household survey.....	25
3.1.1 Site selection .....	25
3.1.2 Data collection .....	25
3.1.3 Data analysis .....	26
3.2 Field experiment .....	26
3.2.1 Experimental site.....	26
3.2.2 Experimental design.....	26
3.2.2.1 Grafting on old seedling rootstocks .....	26
3.2.2.2 Grafting on young seedlings (stone grafting) .....	29
3.3 Climatic data .....	31
3.4 Economic data.....	31
3.5 Assessing the feasibility of grafting techniques .....	31
3.6 Data analysis .....	32
<b>Chapter IV Results of Field Survey.....</b>	<b>33</b>
4.1 Study site.....	33
4.2 Mango production systems in Luang Prabang Province.....	34
4.2.1 Farmers' practices in mango production.....	34
4.2.2 Farmers' practices in mango propagation.....	43
4.2.3 Mango marketing.....	44
4.2.4 Farmers' family economy .....	45
<b>Chapter V Results of Field Experiment .....</b>	<b>48</b>
5.1 Climatic data during the period of grafting.....	48
5.1.1 Rainfall .....	48
5.1.2 Temperature .....	48

5.2 Grafting of cv. Kaew scions on old seedlings .....	50
5.2.1 Survival of Kaew scions .....	50
5.2.2 Duration of new flushing .....	51
5.2.3 Growth .....	52
5.2.3.1 Stem diameter of old aged rootstocks .....	52
5.2.3.2 Grafted union diameter .....	53
5.2.3.3 Scion diameter .....	54
5.2.3.4 Length of new scions .....	55
5.2.3.5 Number of new leaves .....	56
5.3 Grafting of cv. Kaew scions on young seedlings rootstocks (stone grafting).....	57
5.3.1 Fruit weight and fruit size.....	57
5.3.2 Seed weight and seed size.....	58
5.3.3 Percentage and duration of seed germination. ....	59
5.3.4 Number of shoots per seed .....	59
5.3.5 Stem diameter of young Tlap-Nak seedlings at grafting day.. ....	60
5.3.6 Survival of cv. Kaew scions .....	61
5.3.7 Duration of new flushing .....	61
5.3.8 Growth .....	63
5.3.8.1 Stem diameter of young Tlap-Nak seedlings.....	63
5.3.8.2 Grafted union diameter .....	63
5.3.8.3 Scion diameter .....	63
5.3.8.4 Length of scions .....	65
5.3.8.5 Number of new leaves .....	65
5.4 Economic assessment .....	67
5.5 Feasibility assessment of grafting techniques. ....	71
5.5.1 Survival .....	71
5.5.2 Time consumption of producing grafted materials.....	71
5.5.2.1 Time consuming by side veneer grafting.....	71
5.5.2.2 Time consuming by stone grafting.....	72

5.5.4 Feasibility assessment of grafting techniques by the farmers .....	73
Chapter VI Discussion .....	78
6.1 Effect of farmers' management on mango production and propagation .....	78
6.2 Effect of old aged seedling rootstocks on scion survival and growth of grafted seedlings.....	80
6.3 Effect of young aged seedling rootstocks on scion survival and growth of grafted seedlings.....	82
6.4 Feasibility assessment of grafting techniques.....	83
6.4.1 Economic aspect.....	83
6.4.2 Timing aspect.....	84
6.4.3 Trade off between side veneer grafting and stone grafting.....	85
6.4.4 Farmers' opinions on feasibility of grafting techniques .....	86
Chapter VII Conclusion .....	88
Chapter VIII Recommendation.....	91
References.....	93
Appendices.....	103
Curriculum Vitae.....	145

### List of Tables

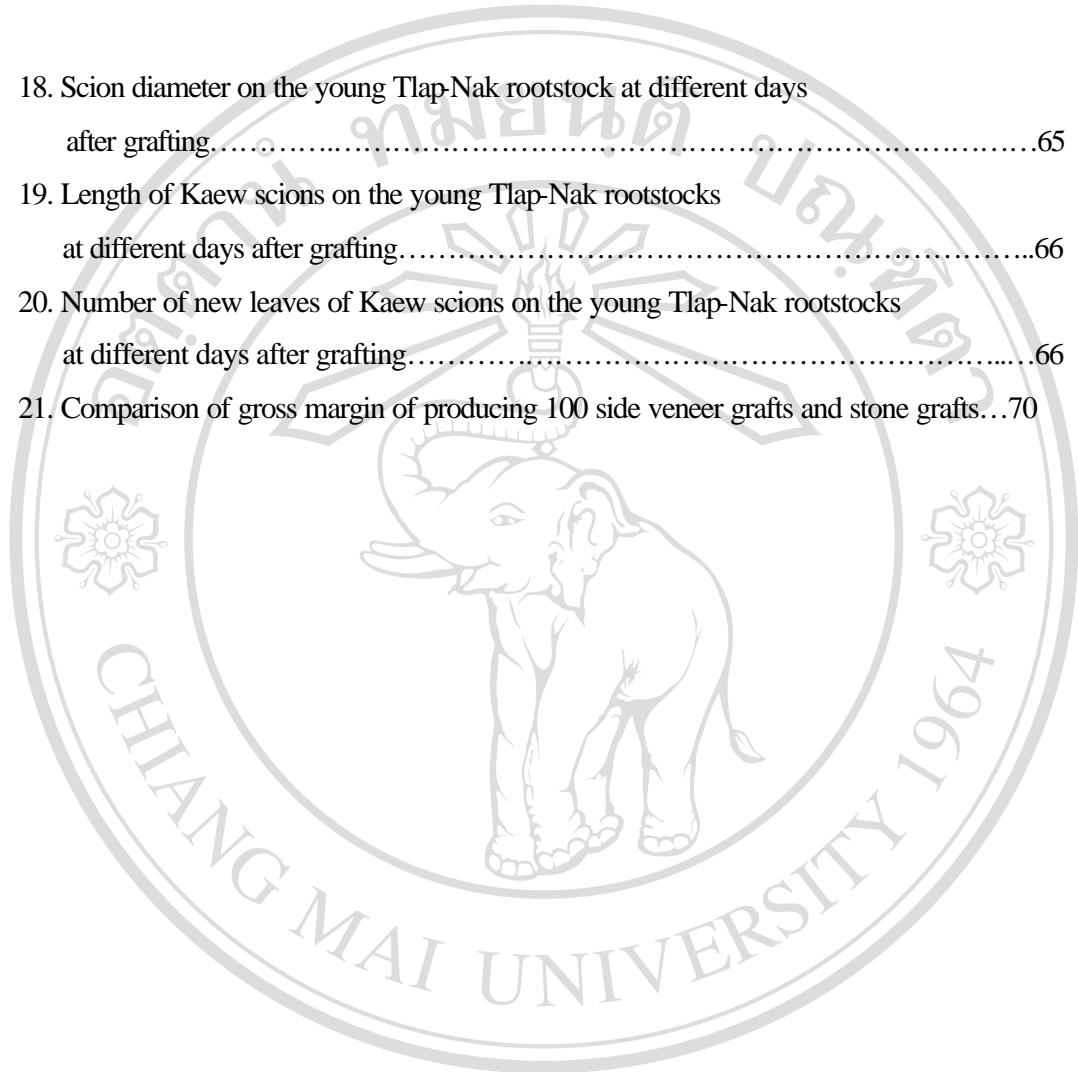

Table	Page
1. Characteristics of soils in Luang Prabang province.....	9
2. Characteristics of some fruit trees in Lao PDR in 1999 .....	13
3. Farmers' profile in Luang Prabang province .....	34
4. Land holding, mango areas and mango ages in Luang Prabang province.....	35
5. Location of Farmers' mango areas in Luang Prabang province .....	36
6. Forms of mango orchards in Luang Prabang province .....	37
7. The use of mango varieties by farmers in Luang Prabang province.....	37
8. Spacing of mango growing in Luang Prabang province.....	39
9. The use of fertilizers by the farmers in Luang Prabang province .....	40
10. Most commonly reporting pests in Luang Prabang province .....	41
11. Farmers' perception on seriousness of pests.....	41
12. Time of mango pruning practiced by farmers in Luang Prabang province .....	42
13. Time of mango harvesting in Luang Prabang province.....	43
14. Farmers' methods of mango propagation in Luang Prabang province.....	44
15. Marketing channel of mango in Luang Prabang province .....	45
16. Income from mango fruits and grafted materials.....	46
17. Expenses in growing mango and producing grafted aterials .....	47
18. Survival of Kaew scions on old Tlab-Nak seedling rootstocks at 20 and 60 DAG.....	51
19. Duration for the new flushing of Kaew scions after grafting on old Tlab-Nak seedling rootstocks.....	52
20. Fruit weight and fruit size of mango cv. Tlab-Nak (rootstock cultivar) .....	58
21. Seed weight and seed size of mango cv. Tlab-Nak (rootstock cultivar) .....	59
22. Seed germination of mango cv. Tlab-Nak (rootstock cultivar) .....	60

23. Duration of seed germination, number of shoots per seed and stem diameter of Tlab-Nak seedlings.....	60
24. Survival rate of Kaew scions on young Tlab-Nak seedling rootstocks at 20 and 60 DAG.....	62
25. Duration of the new flushing of Kaew scions after grafting on young Tlab-Nak seedling rootstocks.....	62
26. Invested costs and gross margin of producing 100 grafts of side veneer grafting .....	68
27. Invested costs and gross margin of producing 100 grafts of stone grafting.....	69
28. Time consuming by the side veneer grafts preparing from different ages of reootstock.....	72
29. Time consuming by the stone grafts preparinf from different ages of rootstocks.....	72
30. Farmers' profile from five villages in Luang Prabang province .....	73
31. Farmers' education level of five villages in Luang Prabang province.....	74
32. Farmers' access to extension services and training course on mango propagation....	75
33. The opinion of farmers on feasibility of the mango grafting techniques.....	76
34. Farmers' preferences on feasibility of the mango grafting techniques.....	76
35. The opinion of farmers on future improvement of mango propagation.....	77
36. Comparison of advantages and weaknesses between side veneer grafting and stone grafting.....	86

### List of Figures

Figure	Page
1. Map of lao PDR showing location of study site-Luang Prabang province.....	6
2. Average monthly rainfall for the Luang Prabang province (1997-2001).....	7
3. Air temperature for the Luang Prabang province (1997-2001).....	8
4. Major cropping systems of Luang Prabang province .....	10
5. Animal production of Luang Prabang province.....	10
6. Mango production in Lao PDR from 1990 to 2000.....	13
7. Methods of mango propagation.....	18
8. Problem and research perspective of grafting techniques of mango.....	24
9. Monthly climatic data at the Irrigated Agricultural Research Station, Faculty of Agriculture, Chiang Mai University, Chiang Mai Province during June 2002 to February 2003 (A) Amount of rainfall (mm) and (B) average of maximum, minimum and mean temperature (°C).....	49
10. Average of maximum, minimum and mean air temperature (°C) during the period of stone grafting in the nursery.....	50
11. Growth rate of rootstock diameter of the old Tlap-Nak seedling rootstocks.....	53
12. Growth rate of the grafted union diameter for the old seedling rootstocks.....	54
13. Diameter of Kaew scions on the old Tlap-Nak rootstocks at different days after grafting.....	55
14. Length of Kaew scions on the old Tlap-Nak rootstocks at different days after grafting .....	56
15. Number of leaves of Kaew scions on the old Tlap-Nak seedling rootstocks at different days after grafting .....	57
16. Growth rate of rootstock diameter of the young Tlap-Nak seedlings.....	64

17. Growth rate of the grafted union diameter of the young grafted seedlings.....	64
18. Scion diameter on the young Tlap-Nak rootstock at different days after grafting.....	65
19. Length of Kaew scions on the young Tlap-Nak rootstocks at different days after grafting.....	66
20. Number of new leaves of Kaew scions on the young Tlap-Nak rootstocks at different days after grafting.....	66
21. Comparison of gross margin of producing 100 side veneer grafts and stone grafts...	70
