ENGLISH ABSTRACT	iv
THAI ABSTRACT	vii
TABLE OF CONTENTS	x
LIST OF TABLES	xiii
LIST OF ILLUSTRATIONS	xiv
CHAPTER I INTRODUCTION	1
CHAPTER II LITERATURE REVIEW	4
Botanical characteristic of bitter gourd (<i>Momordica charantia</i> L.)	4
<i>Momordica</i> anti-viral protein of 30 kilodalton (MAP30)	5
Activities and potentialities of MAP30	6
Toxicity of MAP30	9
Activities and toxicity of other ribosome-inactivating protein in bitter gourd	10
Extraction and isolation of <i>Momordica</i> seed proteins	13
Methods for increasing protein levels in plants	15
Factors affecting the quality and yield of seed protein	18
CHAPTER III MATERIALS AND METHODS	20
1. Varietal collection and inbred seeds production.	20
2. Yield and horticultural characteristics.	20
3. Extraction of 30 kDa protein in inbred seeds.	25
4. Extraction of 30 kDa protein in F ₁ hybrid seeds.	28
5. Genetic analysis of 30 kDa protein in F ₁ hybrid seeds.	29

TABLE OF CONTENTS (continue)

	Page
CHAPTER IV RESULTS	32
1. Varietal collection and inbred seeds production.	32
2. Yield and horticultural characteristics.	32
2.1 Botanical characteristics,	32
2.2 Fruit yield,	42
2.3 Horticultural characteristics,	44
2.4 Correlation analysis of yield and some horticultural characteristics,	49
2.5 Ripe fruit, seed and endosperm	52
3. Extraction of 30 kDa protein in inbred seeds.	57
3.1 Weight of partially purified protein,	57
3.2 Weight of total protein,	57
3.3 Weight of 30 kDa protein	58
3.4 Correlation analysis of weights of partially purified protein, total protein and 30 kDa protein in inbred seeds	59
4. 30 kDa protein in F ₁ hybrid seeds.	61
4.1 Seed yield,	61
4.2 Partially purified protein,	62
4.3 Total protein,	62
4.4 30 kDa protein,	62
4.5 Correlation of partially purified protein, total protein and 30 kDa protein in F ₁ hybrid seeds	64
5. Genetic analysis of 30 kDa protein in F ₁ hybrid seeds.	67
CHAPTER V DISCUSSION	70
CHAPTER VI CONCLUSION	74
REFERENCES	76

LIST OF TABLES

Table	Page
1 Diallel crosses of 4 parental lines of local bitter gourd (16 treatments combination of 4 parents).	28
2 Color and size of leaf of local bitter gourd.	34
3 Botanical characteristics and sessile bract of pistillate flowers of local bitter gourd.	36
4 Botanical characteristics and sessile bract of staminate flowers of local bitter gourd.	37
5 Botanical characteristics of fruit of local bitter gourd.	39
6 Botanical characteristics of seeds of local bitter gourd.	41
7 Fruit yield of local bitter gourd.	43
8 Horticultural characteristics of local bitter gourd.	46
9 Yield of ripe fruit of local bitter gourd.	53
10 Yield of seed and endosperm of local bitter gourd.	54
11 Some horticultural characteristics of local bitter gourd.	56
12 Mean values of seed yield, partially purified protein, total protein and 30 kDa protein in 5 g endosperm of F ₁ hybrid and parental lines of local bitter gourd.	63
13 Analysis of variance and combining ability for seed yield, partially purified protein, total protein and 30 kDa protein in 5 g endosperm of F ₁ hybrid and parental lines of local bitter gourd.	68
14 Estimates of the effects of combining ability for seed yield, partially purified protein, total protein and 30 kDa protein in 5 g endosperm of F ₁ hybrid and parental lines of local bitter gourd.	69

LIST OF ILLUSTRATIONS

Figure	Page
1 The Hunter L, a, b Color Space.	23
2 CIE chromaticity diagram.	24
3 Pistillate flower of local bitter gourd accession.	35
4 Stamilate flower of local bitter gourd accession.	35
5 Correlation of width and length of seeds of local bitter gourd.	42
6 Fruits of accession numbers 7 and 10.	43
7 Correlation between fruit yield and fruit weight/fruit of local bitter gourd.	44
8 Correlation between fruit yield and days to 50% female flower and days to first harvest of local bitter gourd.	49
9 Correlation between fruit yield and number of node/plant of local bitter gourd.	49
10 Correlation between number of fruit/plant and main stem length of local bitter gourd.	50
11 Correlation between number of fruit/plant and number of lateral vine/plant of local bitter gourd.	51
12 Correlation between fruit weight/fruit and main stem length of local bitter gourd.	51
13 Correlation between fruit weight/fruit and number of lateral vine/plant of local bitter gourd.	52
14 Ripe fruit and seed of accession numbers 12 and 13.	55
15 Weight of partially purified protein of endosperm of local bitter gourd.	57
16 Weight of total protein of endosperm of local bitter gourd.	58
17 Protein fractions with molecular weight at 30 kDa of endosperm of local bitter gourd.	59
18 Weight of 30 kDa protein of endosperm of local bitter gourd.	59

LIST OF ILLUSTRATIONS (continue)

Figure	Page
19 Correlation between partially purified protein and total protein of endosperm of local bitter gourd.	60
20 Correlation between 30 kDa protein and total protein of endosperm of local bitter gourd.	60
21 Ripe fruits and seeds of accession numbers 1 and 10.	61
22 Correlation between partially purified protein and total protein of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	64
23 Correlation between partially purified protein and 30 kDa protein of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	64
24 Correlation between total protein and 30 kDa protein of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	65
25 Correlation between partially purified protein and seed yield of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	66
26 Correlation between total protein and seed yield of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	66
27 Correlation between 30 kDa protein and seed yield of endosperm of F ₁ hybrid and parental lines of local bitter gourd.	67
