First let me take this opportunity to sincerely thank all the teaching and non-teaching staff of Multiple Cropping Center, Faculty of Agriculture, Chiang Mai University for extending their support during my two years of stay in Chiang Mai.

I would like to express my sincere gratitude to Dr. Benchaphun Ekasingh, my Thesis Advisor, Dr. Methi Ekasingh, Thesis Committee member and Dr. Chanchai Saengchyoswat, Academic Advisor for their constant guidance and timely advice. I should especially thank my Thesis Advisor for introducing me to the new research methodology and supporting my participation in trainings on MAS.

Dr. François Bousquet, Thesis committee who tirelessly helped me to build the model. I would like to sincerely express my gratitude and appreciation for his effort to make me understand CORMAS and build the model. I would also like to sincerely express my gratitude for his moral, professional and financial support and encouragement provided to me in learning Companion Modeling through series of trainings I attended. Dr. Guy Trébuil, External Examiner, I would like to sincerely express my gratitude for your moral and professional support and encouragement provided. I extremely appreciate your critical comments and untiring efforts in making me understand and improve my research capacity. I will vividly remember all those educative discussions and motivating words that kept me going.

I would also like to express my gratitude to Ministry of Agriculture, Royal Government of Bhutan for allowing me to pursue my study in Thailand. My personal appreciation to Dr. Pema Gyamtsho, the then Deputy Secretary, PPD, Ministry of Agriculture and Dr. Pema Choephyel, Director, Council of Research and Extension, without whose support I would not have availed this scholarship. My sincere appreciation goes to the Department of Technical and Economic Cooperation (DTEC), Thailand for providing financial support to undertake this study.

For all the support, care and guidance, I would like to express my sincere appreciation to Acharn Phrek. I would also like to express my appreciation to Khun Om for her consistent support and finding time to help all the students even when she was sick. To all my AGS friends, thank you, it has been a great pleasure to have companions like you all.

With regard to my field work, I would like to express my sincere gratitude to Sangey Duba, Program Director, RNRRC, Thinlay Gyamtsho; Aita Bhujyel; Karma Tshewang, DAO, Punakha and his staff Gyembo and Yeshi Lhamo for their support, without which it would have been difficult to conduct the field work so efficiently. To all the farmers and GYT members who tirelessly participated in Role-playing game in Dompola, I would like to express my appreciation. There are yet many more who extended their help to me along the way in past two years both personal and professional, to all of them I extend my sincere appreciation.

To my loving mother, I take this opportunity to dedicate this thesis to her for the love, care and blessings she has bestowed on me. I would not have completed my study as smoothly as I could, if my wife would not have taken all the trouble to manage our home and children single handedly. To my wife, Hari M Gurung (Ami) and sons Rihan and Nayat, let me take this opportunity to earnestly express my gratitude for being so considerate and constantly providing me the much needed moral support and encouragement. Without their support I would not have made it.

Tayan Raj Gurung
