	Page
Acknowledgements.....	iii
Abstract (Thai).....	v
Abstract (English).....	viii
List of Tables.....	xiii
List of Figures.....	xv
Abbreviations.....	xvi
Chapter 1 INTRODUCTION.....	1
Chapter 2 LITERATURE REVIEW.....	4
2.1 Merkus Pine tree: Description and uses.....	4
2.1.1 Taxonomic notes.....	4
2.1.2 Description of the pine tree.....	4
2.1.3 The uses of the Merkus pine tree.....	5
2.1.4 Distribution and habitat.....	6
2.2 The life cycle of Pine caterpillar and its effect.....	7
2.2.1 Taxonomic notes.....	7
2.2.2 Description of pine caterpillar life cycle.....	8
2.2.3 The occurrence calendar of pine caterpillar.....	10
2.3 Factors effecting and controlling insect.....	11
2.4 Methodologies to predict the pest outbreak and its damage.....	17
Chapter 3 STUDY SITE DESCRIPTION.....	22
3.1 General natural conditions.....	22
3.1.1 Location.....	22
3.1.2 Topography.....	23
3.1.3 Climate.....	24
3.1.4 Land resource.....	24
3.2 Social Economic Characteristics.....	25

3.2.1 Population and labors.....	25
3.2.2 Social economic development situation of the province	26
3.3 Forest and forestland resource.....	26
3.3.1 Natural forests.....	27
3.3.2 Plantation forest	28
3.3.3 Denuded hill and barren land.....	30
3.3.4 Factors effecting forest resources	31
Chapter 4 RESEARCH METHOD.....	33
4.1 Data collection	33
4.1.1 Secondary data collection	33
4.1.2 Primary data collection	34
4.2 Data analysis	35
4.2.1 The conceptual framework for developing and validating statistical model	35
4.2.2 Describe distribution of pine caterpillar and other relative factors.....	36
4.2.2.1 Descriptive statistics	36
4.2.2.2 Cross tabulation (contingency table)	37
4.2.3 Develop statistical models	38
4.2.3.1 Multiple linear regression analysis	38
4.2.3.2 Binary logistic regression analysis.....	41
4.2.4 Model selection and validation	46
Chapter 5 THE DISTRIBUTION OF PINE CATERPILLAR OUTBREAK AND OTHER RELATIVE FACTORS.....	47
5.1 Pine caterpillar epidemic in Thua thien Hue province.....	47
5.1.1 Pine caterpillar outbreak occurrence in study period.....	47
5.1.2 The distribution of outbreak occurrence depending on age of forest	49
5.1.3 The distribution of outbreak occurrence relating to month	52
5.2 The status of pine forest in Thua thien Hue province.....	53
5.2.1 The distribution of pine forest according to the functions of forests.....	53
5.2.2 The distribution of pine forest by pine species	54
5.2.3 The distribution of pine forest by the age and density of the forests.....	55

5.3 The distribution of weather factors in Thua Thien Hue province.....	57
5.3.1 The distribution of temperature	57
5.3.2 The distribution of humidity	58
5.3.3 The distribution of rainfall regime	59
5.3.4 The distribution of number of sunshine hours	61
Chapter 6 STATISTICAL MODELS TO PREDICT THE PINE CATERPILLAR OUTBREAK.....	63
6.1 The multiple regression of larva density in December	63
6.1.1 The models developed by considering all weather factors in each month ...	63
6.1.2 The models developed by using same weather factor in all months.....	66
6.1.3 The model Developed based on selected independent variables	69
6.2 The logistic regression of epidemic occurrence in December	70
6.2.1 The models developed by considering all weather factors in each month ...	70
6.2.2 The models developed by using same weather factor in all months.....	74
6.2.3 The model based on the selected independent variables	78
6.3 Model validation	80
6.3.1 Validating the multiple linear regression.....	80
6.3.2 Validating the binary logistic regression	82
Chapter 7 CONCLUSIONS AND RECOMMENDATIONS.....	85
7.1 Conclusions.....	85
7.2 Recommendations.....	88
References.....	90
Curriculum vitae	95

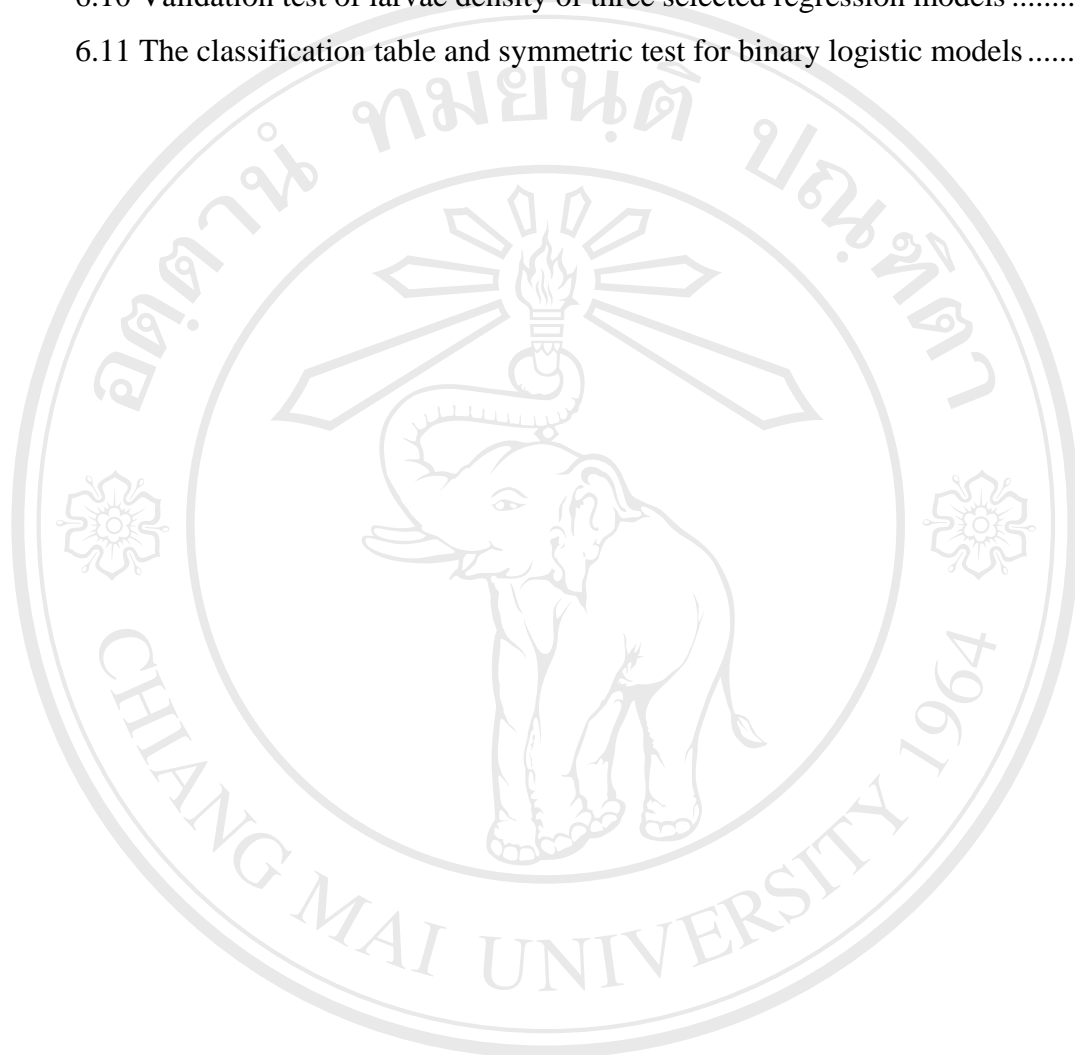

List of Tables

Table	Page
2.1 The occurrence calendar of pine caterpillar in Thua Thien Hue province	11
2.2 Damage potential of pine caterpillar base on density in each stage	20
2.3 Economical and preventive thresholds for pine caterpillar in North Central of Vietnam (for pine forest which age from 10 to 15 years old).....	20
3.1 Natural forest types, area and estimated volume	28
3.2 Area of the forest according to forest tree species	29
5.1 Pine caterpillar outbreak and its damage	48
5.2 The outbreak occurrence in different level of forest age	50
5.3 Area of classified pine forest based on its utility in different locations.....	53
5.4 Area of pine forest classified according to pine species in habitat.....	54
5.5 Area of pine forest classified according to forest age and location.....	55
5.6 Area of pine forest classified according to level of forest density.....	56
6.1 Regression models for larvae density in December in relation to forest age and all weather factors in each month	65
6.2 Regression model for larvae density in December in relation to forest age and each weather factor in all months	68
6.3 Regression model to predict the larvae density in December.....	70
6.4 Binary logistic regression for epidemic occur in December with all weather factors in each month.....	71
6.5 Classification table for observed and predicted of occurrence and Hosmer and Lemeshow Test for goodness-of-fit for models developed by each month.....	73
6.6 Binary logistic regression for epidemic occur in December with each weather factor in all months	75
6.7 Classification table for observed and predicted of occurrence and Hosmer and Lemeshow Test for goodness-of-fit for models developed by each factor.....	77
6.8 Binary logistic regression for epidemic occur in December.....	78

6.9 Classification table for observed and predicted of occurrence and Hosmer and Lemeshow Test for goodness-of-fit for models developed by selected variables .79

6.10 Validation test of larvae density of three selected regression models80

6.11 The classification table and symmetric test for binary logistic models83

List of Figures

Figure	Page
2.1 The life cycle of pine caterpillar (<i>Dendrolimus punctatus</i> Walker)	9
3.1 Location and land-use of Thua Thien Hue province	22
3.2 Land categories in Thua Thien Hue province.....	25
3.3 Distribution of forest and forestland in 2003	27
3.4 Distribution of 3 types of forest in 2003 of Thua Thien Hue	27
4.1 Map of study site for data collection.....	34
4.2 The conceptual framework for developing and validating the statistical model to predict the outbreak of pine caterpillar	36
5.1 The epidemic occurrence of pine caterpillar in different forest ages.....	49
5.2 Distribution of larvae density in different level of forest age	51
5.3 Pine caterpillar outbreak in different months.....	52
5.4 Distribution of temperature factors averaged over 17 years and their CVs.....	57
5.5 Distribution of average humidity averaged over 17 years and its CV	59
5.6 Distribution of total rainfall (RAIN) and number of rain days (RAIND) averaged over 17 years	60
5.7 The CV of total rainfall (RAIN) and number of rain days (RAIND)	60
5.8 Distribution of number of sunshine hours averaged over 17 years and its CV	61

Abbreviations

$^{\circ}$ ‘ ‘	Degree – minute – second of latitude and longitude
$^{\circ}\text{C}$	degree Celsius
a.m.s.l.	above mean sea level
cm	centimeter
<i>D.</i>	<i>Dendrolimus</i>
df	degree of freedom
DFP	Department of Forest Protection
FAO	Food and Agriculture Organization of the United Nations
FIPI	Institute for Forest Investigate and Planning of Vietnam
FORAGE1	Forest age level 1 (younger than 5 years old)
FORAGE2	Forest age level 2 (Between 6 and 10 years old)
FORAGE3	Forest age level 3 (Between 11 and 15 years old)
FORAGE4	Forest age level 4 (Between 16 and 20 years old)
FORAGE5	Forest age level 5 (older than 20 years old)
GDP	Gross Domestic Product
ha	hectare
kg	kilogram
km	kilometer
LARDEN	Larvae density in December (number of larvae/tree)
m	meter
m^3	cubic meter
mm	millimeter
Month.HUMID	average humidity in this month (%)
Month.RAIN	total rainfall in this month (mm)
Month.RAIND	number of rainfall days in this month (days)
Month.SUNH	number of sunshine hours in this month (hours)
Month.TAVER	average temperature in this month ($^{\circ}\text{C}$)
Month.TMAX	the highest temperature in this month ($^{\circ}\text{C}$)
Month.TMIN	the lowest temperature in this month ($^{\circ}\text{C}$)

<i>P.</i>	<i>Pinus</i>
PIAWFR	Program for Investigation, Assessment, and Watching after the Forest Resource
RMSE	Root Mean Square Error
SE	Standard Error of Estimate
Sig.	Significant level
SPSS	Statistical Software Package for Social Sciences
Sub-FIPI	Sub-Institute for Forest Investigate and Planning of Central Vietnam
TTH-DFD	Thua Thien Hue Department of Forest Development
TTH-DFP	Thua Thien Hue Department of Forest Protection
