## ACKNOWLEDGEMENTS

I am deeply grateful to my advisor, Professor Dr. Benjavan Rerkasem, for her supervision and encouragement during my study.

I am grateful to Professor Dr. Bernard Dell, for his valuable suggestion and comments all my work and help in revising my thesis.

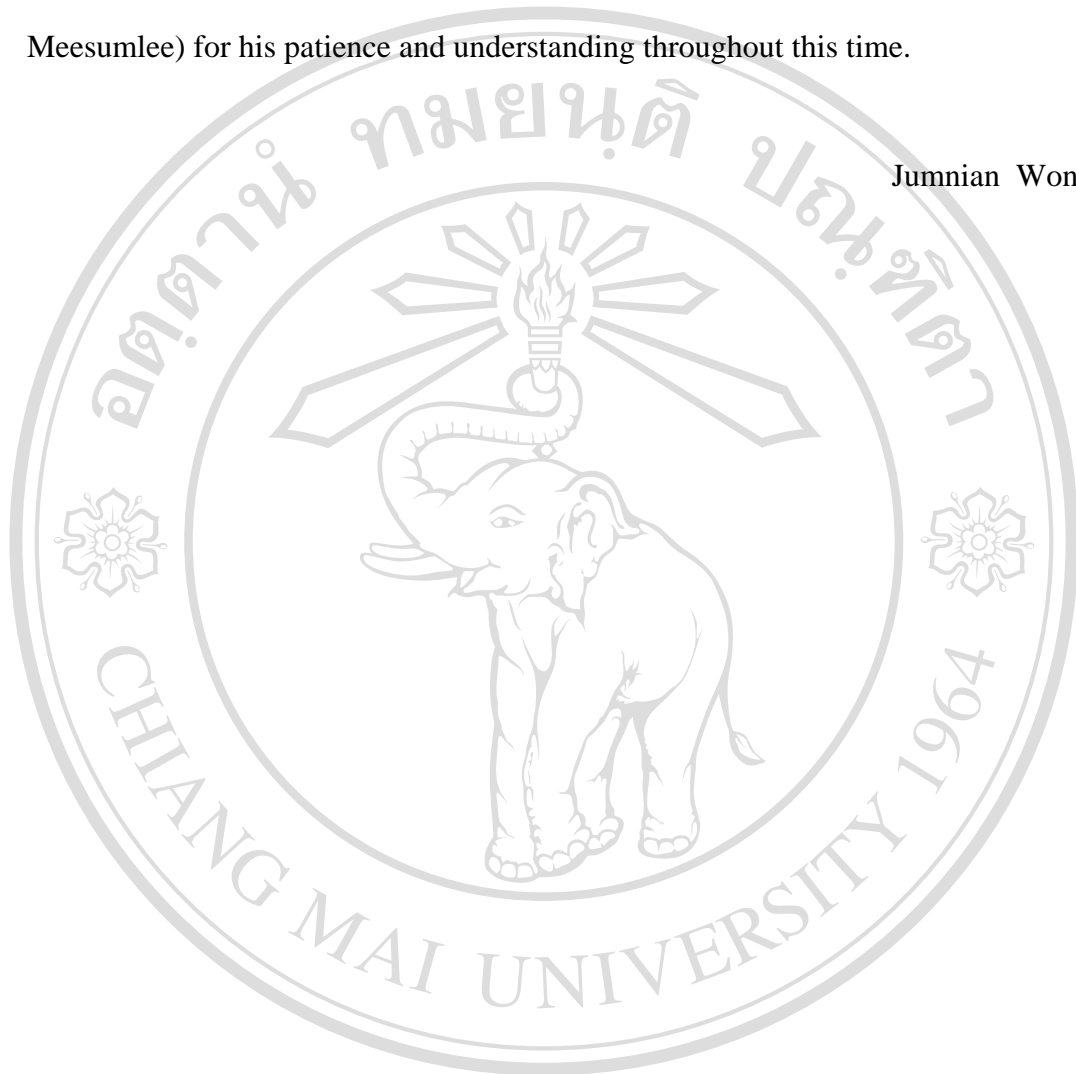

Special thanks to Professor Dr. Saisamorn Lumyong and Associate Professor Dr. Sansanee Jamjod for their advisory opinions on my work and all their support. I also thank Associate Professor Dr. Dumnern Karladee and Assistant Professor Dr. Pathipan Sutigoolabud for valuable advice and kind suggestions to improve my thesis.

Financial support from Thailand Research Fund (DBG4980004 and Prof. Benjavan Rerkasem's Research Group), the Collaborative Crop Research Program of the McKnight Foundation and the United Nations University is gratefully acknowledged.

During the long period of my study, I have received much support from colleagues and students at the CMUPN*lab*, Agronomy Department, Chiang Mai University; I especially appreciate Dr. Sittichai Lordkaew and Mrs. Kanjanaporn Lordkaew for their help with laboratory work. Big thanks to the farmers at Huai Tee Cha village, Mae Hong Son province for access to their fields and for providing seed of their swidden crops. Dr. Narit Yimyam of the Highland Coffee Research and Development Centre, Chiang Mai University kindly facilitated work in the upland fields. Dr. Chanakan Prom-u-thai is thanked for her enthusiastic help.

I am indebted to my parents, my brothers, my sisters and thank them for their love and unwavering support. Finally, I would like to thank my husband (Wichan Meesumlee) for his patience and understanding throughout this time.
