ACKNOWLEDGEMENTS

This is a great opportunity to express my respect to my supervisor Associate Professor Dr. Dumnern Karladee, who is most responsible for helping me complete the writing of this dissertation as well as the challenging research that lies behind it. I am highly indebted for his valuable supervision, crucial support, encouragement and guidance throughout my course of study in Chiang Mai University.

A special thank goes to my co-advisor, Assistant Professor Dr. Ampan Bhromsiri who had confidence in me when I doubted myself and brought out the good ideas in me. Without her encouragement and tender loving care of me, I could not have finished this dissertation. She was always there to meet and talk about my ideas, feelings and to ask me good questions to help me think through my problems. Thank you for her continuous support, lessons and encouragement. This study never would be realized without her. She also made her laboratory of soil science a wonderful work place. Also thanks to the folks at the Laboratory for kind help, support and being fun to be with for two years.

My deep appreciation also goes to my graduate committee, Assistant Professor Dr. Wipa Homhaul for her kind help, suggestion and guidance. I am deeply grateful to all professors, lecturers, staffs of the Division of Agronomy, Department of Plant Science and Natural Resources in Chiang Mai University for their valuable knowledge, guidance, kindness and help during my study and their valuable advice and support. I am also greatly indebted to all the teachers at Yezin Agricultural University, and in the past.

My cordial gratitude goes to Thailand International Development Cooperation Agency (TICA), Royal Thailand Government for granting a scholarship to me to study in Chiang Mai University. I am really grateful to them for providing me with necessary assistance and help throughout my study and as well as Ministry of Agriculture and Irrigation (MOAI), Union of Myanmar for allowing me to pursue this study.

Let me also say deepest thank to my parents, (U Maung Hla) and Daw Seinn Oo, for giving me life in the first place, for educating me with aspects for unconditional support and encouragement. Besides my parents, I would like to thank my sisters and nieces who heartily took good care and support to me throughout my study in abroad.

My special thanks go to my beloved friends, Ma Thet Thet Mar, Ma May Phyo Way and Tin Win Win Ei, for their patience, valuable advices and strong insights of my life, for listening to my complaints and frustrations, for believing in me, for giving energy to me when my downhearted time. And also my Cambodia friend, Cheachy Haneda, special thanks to Thailand friends, Kai (Supranee Jeemoon), Korn (Korranat Naveerat) and all friends from Central Laboratory for giving me kindness, unconditional help, strong support and encouragement.

Last, but not least, I thank my beloved two senior sisters for teaching me to know knowledge about people and also for giving power to energetic and stand well in our surrounding. And I don't forget their guideline, kind and gratitude forever. Furthermore, I did not want to disappoint the persons who believed in me and thank you so much if I necessitate saying thank.

Khin Myat Soe
