ACKNOWLEDGEMENTS	iii
ABSTRACT (Thai)	vi
ABSTRACT (English)	viii
TABLE OF CONTENTS	xi
LIST OF TABLES	xvi
LIST OF FIGURES	xviii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Seasonal cotton cropping systems in Central Myanmar	4
1.3 Government support to cotton production	5
1.4 Role of cotton research and extension system	7
1.5 Rationale	9
1.6 Objectives	11
CHAPTER II LITERATURE REVIEW	
2.1 Constraints of cotton production	12
2.2 Sustainable livelihoods framework	17
2.2.1 Vulnerability context	19
2.2.2 Sustainable livelihood capitals	21
(a) Human capital	22
(b) Natural capital	22
(c) Physical capital	22

TABLE OF CONTENTS (Continued)

	Page
(d) Social capital	23
(e) Financial capital	23
2.2.3 Transforming structures and processes	24
2.2.4 Livelihood strategies	24
2.2.5 Livelihood outcomes	27
2.3 Use of multiple regression analysis in relationship between dependent variable and independent variables	27
CHAPTER III RESEARCH METHODS	
3.1 Conceptual framework of the study	30
3.2 Selection of the study area	32
3.3 Sampling technique and data collection	34
3.4 Analytical procedures	34
3.4.1 Descriptive analysis	34
3.4.2 Correlation matrix analysis	35
3.4.3 Multiple regression analysis	35
CHAPTER IV CHARACTERISTICS OF UPLAND COTTON-BASED FARMING SYSTEMS IN THE STUDY AREA	
4.1 Description of the study areas	37
4.2 General characteristics of post-monsoon cotton farmer respondents	42
4.2.1 Current production practices of post-monsoon cotton	42
(a) Use of improved varieties	42

TABLE OF CONTENTS (Continued)

	Page
(b) Land preparation methods	42
(c) Sowing time	43
(d) Recommended spacing and population	43
(e) Timely thinning	43
(f) Fertility management	44
(g) Intercultivation and weeding	46
(h) Management of pest infestation	47
(i) Harvesting	48
4.2.2 Competitiveness of cotton with the other crops	49
4.3 Contract farming system in cotton production	51
4.4 Production constraints of post-monsoon cotton production	52
4.5 Farmers' access to livelihood assets in post-monsoon cotton production	58
4.5.1 Human capital	58
4.5.2 Natural capital	60
4.5.3 Physical capital	63
4.5.4 Social capital	66
4.5.5 Financial capital	66
4.6 Effects of livelihood assets on cotton yield	67
4.6.1 Correlation matrix analysis	68
4.6.2 Multiple regression analysis	72

CHAPTER V FARMERS' LIVELIHOOD STRATEGIES IN COTTON PRODUCTION AND COTTON-BASED FARMING SYSTEMS

5.1 Farmers' strategies in post-monsoon cotton production systems 80

5.1.1 Constituents of farmers' strategies in post-monsoon cotton production 80

5.1.2 Contribution of farmers' strategies in post-monsoon cotton production 84

5.1.3 Cost of production and economic returns of post-monsoon cotton 86

5.2 Framers' strategies in cotton-based cropping system 89

5.2.1 Constituents of yearly income distribution under each major livelihood strategy 92

5.2.2 Farmers' perception of crop diversification and cropping patterns 96

CHAPTER VI SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

6.1 Summary and conclusions 102

6.1.1 Production practices, constraints and livelihood assets 103

6.1.2 Relationship between seed cotton yield and livelihood assets through multiple regression analysis 106

LIST OF TABLES

Table		Page
1.1	Annual planted area, yield and production of cotton in Myanmar (2000-2010)	3
3.1	Definition of independent variables: livelihood assets	36
4.1	Land utilization (ha) in the selected study areas (2009-2010)	38
4.2	Area planted and per hectare yield of long-staple cotton in Kyaukse, Myittha and Wundwin townships (2009-2010)	41
4.3	Current production practices used by sample farmers in the selected townships	46
4.4	Diversity of agricultural crops and their cultivated areas as a percentage of total land size in the cotton production areas of the selected townships	50
4.5	Common constraints perceived by the farmer respondents on post-monsoon cotton	56
4.6	Comparison of main five capital assets of post-monsoon cotton production under the three selected townships	62
4.7	Correlation matrix for listed variables of Kyaukse township	69
4.8	Correlation matrix for listed variables of Myittha township	70
4.9	Correlation matrix for listed variables of Wundwin township	71
4.10	Multiple regression analysis of livelihood assets on cotton yield of farmers in the selected townships	73
5.1	Farmers' strategies in post-monsoon cotton production system	83

LIST OF TABLES (Continued)

Table		Page
5.2	Cost of production, total revenue and profit in post-monsoon cotton under the selected areas (thousand kyats ha^{-1})	88
5.3	Main types of livelihood strategies used by the respondents as shown by percentage of number of participating households and income (thousand kyats $year^{-1}$)	90
5.4	Diversification of farmers' yearly income and share of income (%) in three selected townships by income categories (kyats $year^{-1}$)	93
5.5	Cropping pattern in Kyaukse study area	97
5.6	Cropping pattern in Myittha study area	98
5.7	Cropping pattern in Wundwin study area	99
5.8	Existing cultivated crops and sown area (ha) under the selected areas	100

LIST OF FIGURES

Figure		Page
2.1	Sustainable Livelihoods Framework (DFID, 1999)	26
3.1	A conceptual framework for household livelihood vulnerability and assets contribute to outcomes along with strategies	31
3.2	Location of the study areas, Kyaukse, Myittha and Wundwin townships, Mandalay Division	33
4.1	Distribution of rainfall (mm) and rainy days in Kyaukse township	39
4.2	Distribution of rainfall (mm) and rainy days in Myittha township	40
4.3	Distribution of rainfall (mm) and rainy days in Wundwin township	41
5.1	Comparison of cotton cultivated area (ha) in the study areas	85
5.2	Comparison of seed cotton yield (kg ha^{-1}) in the selected areas	86
5.3	Comparison of production cost, total revenue and seed cotton yield in the study areas	88
5.4	Comparison of cultivated crops (ha) under post-monsoon cotton-based cropping system in three selected areas	101
