ACKNOWLEDGEMENTS	iii
ABSTRACT (Thai)	v
ABSTRACT (English)	viii
TABLE OF CONTENTS	xi
LIST OF TABLES	xvi
LIST OF FIGURES	xviii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Vegetable cultivation in Vietnam	4
1.3 Problem of heavy metals in Vietnam	7
CHAPTER II LITERATURE REVIEW	
2.1 Situation of vegetable production and consumption in the world	10
2.2 Situation of vegetable production and consumption in Vietnam and Thai Nguyen	11
2.2.1 Jute	15
2.2.2 Basella alba	16
2.2.3 Bitter melon	17
2.3 Current status of heavy metals (Pb, Cd) pollution in soil and water in vegetable land	20

TABLE OF CONTENTS (Continued)

	Page
2.3.1 Lead (Pb)	20
2.3.1.1 Distribution and existence form of lead (Pb) in the environment	20
2.3.1.2 Emission source of lead (Pb) in soil and water environment	23
2.3.1.3. Factors affecting the accumulation of Pb in soil, vegetables and water	25
2.3.1.4 Lead (Pb) effects on plant and human	27
2.3.1.5 Management of lead (Pb) in Vietnam's agricultural	30
2.3.2 Cadmium (Cd)	32
2.3.2.1 Distribution and existence form of cadmium (Cd) in the environment	32
2.3.2.2 Emission source of cadmium (Cd) in soil and water environment	33
2.3.2.3 Factors affecting the accumulation of Cd in soil, vegetables and water	35
2.3.2.4 Cadmium (Cd) effects on plant and human	38
2.3.2.5 Management of cadmium (Cd) in Vietnam's agricultural	40
2.4 Factor analysis and multiple regression analysis in heavy metal contamination	41
2.4.1 Factors analysis	41
2.4.2 Multiple regression analysis	42

TABLE OF CONTENTS (Continued)

	Page
CHAPTER III RESEARCH METHOD	
3.1 The study site	44
3.2 Sampling technique	46
3.3 Data collection	46
3.3.1 Primary data	46
3.3.2 Secondary data	48
3.4 Data analysis	48
3.4.1 Descriptive statistic	49
3.4.2 Factor analysis	49
3.4.3 Multiple regression	55
CHAPTER IV VEGETABLE PRODUCTION SITUATION	
4.1 Biophysical environment	56
4.1.1 Location and area	56
4.1.2 Cultivated soil	57
4.1.3 Climate	57
4.1.4 Water resources	57
4.2 Farmer's socio-economic characteristics	58
4.3 Vegetable production status	66
4.3.1 Situation of using irrigation water	66
4.3.2 Situation of using pesticides and fertilizer	69

TABLE OF CONTENTS (Continued)

	Page
4.4 The accumulation of lead (Pb) and cadmium (Cd) in cultivated soil, irrigation water and three selected vegetables	72
4.4.1 Lead (Pb) content	73
4.4.1.1 In irrigation water	73
4.4.1.2 In cultivated soil	76
4.4.1.3 In vegetables	79
4.4.2 Cadmium (Cd) content	84
4.4.2.1 In irrigation water	84
4.4.2.2 In cultivated soil	87
4.4.2.3 In vegetables	90
CHAPTER V FACTORS AFFECTING CD AND PB ACCUMULATION IN CULTIVATED SOIL AND VEGETABLES	
5.1 Factors affecting lead (Pb) accumulation in vegetables	95
5.2 Factors affecting lead (Pb) accumulation in cultivated soil	106
5.3 Factors affecting cadmium (Cd) accumulation in vegetables	116
5.4 Factors affecting cadmium (Cd) accumulation in cultivated soil	126
CHAPTER VI CONCLUSION, DISCUSSION AND RECOMENDATIONS	
6.1. Conclusion	136
6.2. Discussion	142
6.3. Recommendations	145

TABLE OF CONTENTS (Continued)

	Page
6.3.1 The accumulation of heavy metals (Pb, Cd) in cultivated soil and vegetables	145
6.3.2 The accumulation of heavy metals (Pb, Cd) in irrigation water	147
6.4 Recommendations for further studies	148
REFERENCES	150
APPENDICES	160
APPENDIX A	161
APPENDIX B	169
APPENDIX C	177
APPENDIX D	185
CURRICULUM VITAE	193

LIST OF TABLES

Table	Page
3.1 Explanatory variables affecting Lead (Pb) and Cadmium (Cd) accumulation in cultivated soil and selected vegetables	50
4.1 Descriptive socio-economic characteristics of the interviewed farmers	58
4.2 Percentage of socio-economic characteristics of the interviewed farmers	59
4.3 Accumulation of Pb in irrigation water, cultivated soil and three selected vegetables Tuc Duyen ward	73
4.4 Accumulation of Cd in irrigation water, cultivated soil and three selected vegetables in Tuc Duyen ward	85
5.1 Variables and measurements in model of Lead (Pb) accumulation in vegetables	97
5.2 Group of independent variables extracted by factor analysis	99
5.3 Rotated factors loading of independent variables	100
5.4 Correlation matrix of each component	102
5.5 Summary of the regression results of Pb accumulation model in vegetables	102
5.6 Variables and measurements in model of Lead (Pb) accumulation in cultivated soil	107
5.7 Group of independent variables extracted by factor analysis	110
5.8 Rotated factors loading of independent variables	111
5.9 Correlation matrix of each component	112

LIST OF TABLES (Continued)

Table	Page
5.10 Summary of the regression results of Pb accumulation model in cultivated soil	113
5.11 Variables and measurements in model of Cadmium (Cd) accumulation in vegetables	118
5.12 Group of independent variables extracted by factor analysis	120
5.13 Rotated factors loading of independent variables	121
5.14 Correlation matrix of each component	123
5.15 Summary of the regression results of Cd accumulation model in vegetables	123
5.16 Variables and measurements in model of Cd accumulation in cultivated soil	128
5.17 Group of independent variables extracted by factor analysis	130
5.18 Rotated factors loading of independent variables	131
5.19 Correlation matrix of each component	133
5.20 Summary of the regression results of Cd accumulation model in cultivated soil	133

LIST OF FIGURES

Figure	Page
2.1 Jute (<i>Corchorus capsularis</i> L)	15
2.2 <i>Basella alba</i> (<i>Basella rubra</i> L.)	17
2.3 Bitter melon (<i>Momordica charantia</i> L)	18
3.1 Location of study area, Tuc Duyen ward, Thai Nguyen city, Vietnam	45
4.1 The percentage of age of the respondents in study area (n =75)	60
4.2 Genders of head of households	60
4.3 Education levels of the farmers	61
4.4 Extent of land ownership of vegetable farmers in the study area	62
4.5 Access information sources about clean and safe vegetables	64
4.6 Type of discussion groups about clean and safe vegetables	65
4.7 Sources understanding of farmers about the accumulation of heavy metals in vegetables	66
4.8 Sources of irrigation water for vegetable production in Tuc Duyen ward	67
4.9 Frequency of watering vegetables per day in Tuc Duyen ward	68
4.10 Average number of spraying pesticides for vegetables	71
4.11 Locations of research vegetables fields	72
4.12 Lead (Pb) content in irrigation water samples	74
4.13 Accumulation lead (Pb) in irrigation water of three selected vegetables	75
4.14 Lead (Pb) content in cultivated soil	76
4.15 Spatial distribution of Pb accumulation in cultivated soil in Tuc Duyen ward	77

LIST OF FIGURES (Continued)

Figure		Page
4.16	Accumulation of lead (Pb) in cultivated soil of three selected vegetables	79
4.17	Lead (Pb) content in three selected vegetables	80
4.18	Spatial distribution of Pb accumulation in vegetables in Tuc Duyen ward	82
4.19	Accumulation of Lead (Pb) in three selected vegetables	83
4.20	Accumulation of Cd in irrigation water of three selected vegetables	86
4.21	Cadmium (Cd) content in cultivated soil	88
4.22	Accumulation of Cd in cultivated soil of three selected vegetables	89
4.23	Cd content in three selected vegetables	91
4.24	Spatial distribution of Cd accumulation in vegetables in Tuc Duyen ward	93
4.25	The accumulation of Cadmium (Cd) in three selected vegetables	94
